

(b) The request shall include a commitment to provide sufficient funding to cover all costs associated with the development and maintenance of the proposed Voluntary Product Standard.

(c) The Department may require additional information such as technical, marketing, or other appropriate data essential to discussion and development of the proposed standard, including, but not limited to, physical, mechanical, chemical, or performance characteristics, and production figures.

(d) Upon receipt of an appropriate request and after a determination by the Department that the development of a Voluntary Product Standard is justified, the Department may initiate the development by requesting that a draft of the suggested standard be prepared by an appropriate committee, provided such a draft has not previously been submitted under paragraph (a) of this section.

(e) The Department may initiate the development of a Voluntary Product Standard, if such action is deemed by the Department to be in the public interest, notwithstanding the absence of a request from an outside source. A voluntary standard initiated by the Department shall be processed in accordance with all requirements of these procedures and shall be developed in the same manner as a voluntary standard initiated by any group referred to in paragraph (a) of this section.

(f) An agreement regarding funding procedures and receipt of a deposit estimated by the Department to be sufficient to cover the first year's costs shall occur prior to the initiation of any project.

§ 10.2 Funding.

Groups who represent producers, distributors, consumers or users, or others that wish to act or continue to act as proponent organizations for the development or maintenance of a Voluntary Product Standard will be required to pay for administrative and technical support services provided by the National Institute of Standards & Technology and such other direct or indirect costs associated with the development or maintenance of that standard as may be deemed appropriate by the Department, including costs to the De-

partment in connection with the operation of the Standard Review Committee and the Standing Committee. Funds may also be provided by a government agency at the request of a proponent organization or when acting on its own behalf for the development or maintenance of a Voluntary Product Standard. Proponents of standards that meet sponsorship criteria established in these procedures shall furnish an initial deposit of funds sufficient to cover the first year's services and other costs. Estimated annual costs will be based on an hourly rate for salary and overhead established by the Department for the National Institute of Standards & Technology's administrative and technical support services plus estimates of direct costs to provide funds for such items as the travel of consumer representatives unable to otherwise attend committee meetings, travel for Department staff, and printing costs. Project funds will be reviewed annually. Excess funds may be refunded or applied to the next accounting period. Should funds from deposits be inadequate during an accounting period, work on the project will continue only if funds are restored to a level estimated adequate to complete the 12-month period.

§ 10.3 Development of a proposed standard.

(a) A proposed standard as submitted to the Department:

(1) Shall be based on adequate technical information, or, in the case of size standards (including standards covering the quantities for packaged consumer commodities), on adequate marketing information, or both, as determined to be appropriate by the Department;

(2) Shall not be contrary to the public interest;

(3) Shall be technically appropriate and such that conformance or non-conformance with the standard can be determined either during or after the manufacturing process by inspection or other procedures which may be utilized by either an individual or a testing facility competent in the particular field;

§ 10.4

(4) Shall follow the format prescribed by the National Institute of Standards & Technology. (Copies of the recommended format may be obtained from the Office of Product Standards Policy, National Institute of Standards & Technology, Gaithersburg, Maryland 20899.);

(5) Shall include performance requirements if such are deemed by the Department to be technically sound, feasible, and practical, and the inclusion of such is deemed to be appropriate;

(6) May include dimensions, sizes, material specifications, product requirements, design stipulations, component requirements, test methods, testing equipment descriptions, and installation procedures. The appropriateness of the inclusion in a standard of any particular item listed in this subparagraph shall be determined by the Department; and

(7) Shall be accompanied by rational statements pertaining to the requirements and test methods contained in the standard, if deemed necessary by the Department.

(b) A proposed standard that is determined by the Department to meet the criteria set forth in paragraph (a) of this section may be subjected to further review by an appropriate individual, committee, organization, or agency (either government or non-government, but not associated with the proponent group).

(c) A proposed standard may be circulated by the Department to appropriate producers, distributors, users, consumers, and other interested groups for consideration and comment as well as to others requesting the opportunity to comment.

(d) The proponent group or appropriate committee which drafted the initial proposal under §10.1(d) shall consider all comments and suggestions submitted by the reviewer designated under paragraph (b) of this section, and those received by the Department as a result of any circulation under paragraph (c) of this section, and may make such adjustments in the proposal as are technically sound and as are believed to cause the standard to be generally acceptable to producers, distributors, users, consumers, and other interested

15 CFR Subtitle A (1-1-03 Edition)

parties. The proposal will then be submitted to the Department for further processing.

[51 FR 22497, June 20, 1986, as amended at 55 FR 38315, Sept. 18, 1990]

§10.4 Establishment of the Standard Review Committee.

(a) The Department shall establish and appoint the members of a Standard Review Committee within a reasonable time after receiving a proposed standard. The committee shall consist of qualified representatives of producers, distributors, and users or consumers of product for which a standard is sought or any other appropriate general interest groups such as State and Federal agencies. When requested by the Standard Review Committee, the Department shall appoint one voting member from among the representatives of the Federal agencies, other than the Department of Commerce. All other representatives of Federal agencies on the Standard Review Committees shall be advisory nonvoting members. (Alternates to committee members may be designated by the Department.) When deemed appropriate by the Department, project funds under §10.2 may be made available to assure participation by consumer interests on the committee at required meetings.

(b) A Standard Review Committee may remain in existence for a period necessary for the final development of the standard, or for 2 years, whichever is less.

(c) The Department shall be responsible for the organization of the committee. Any formal operating procedures developed by the committee shall be subject to approval by the Department. The committee may conduct business either in a meeting or through correspondence, but only if a quorum participates. A quorum shall consist of two-thirds of all voting members of the committee. A majority of the voting members of the committee participating shall be required to approve any actions taken by the committee except for the action of recommending a standard to the Department, the requirements for which are contained in §10.5(b).
