

provisions of paragraph (a)(3) of this section.

(b) *Reduction of match for participating jurisdictions in disaster areas.* If a participating jurisdiction is located in an area in which a declaration of major disaster pursuant to the Robert T. Stafford Disaster Relief and Emergency Assistance Act is made, it may request a reduction of its matching requirement. For a local participating jurisdiction, the HUD Field office may reduce the matching requirement specified in § 92.218 by up to 100 percent for the fiscal year in which the declaration of major disaster is made and the following fiscal year. For a State participating jurisdiction, the HUD Field office may reduce the matching requirement specified in § 92.218, by up to 100 percent for the fiscal year in which the declaration of major disaster is made and the following fiscal year with respect to any HOME funds expended in an area to which the declaration of a major disaster applies. At its discretion and upon request of the participating jurisdiction, the HUD Field Office may extend the reduction for an additional year.

### Subpart F—Project Requirements

#### § 92.250 Maximum per-unit subsidy amount and subsidy layering.

(a) *Maximum per-unit subsidy amount.* The amount of HOME funds that a participating jurisdiction may invest on a per-unit basis in affordable housing may not exceed the per-unit dollar limits established under section 221(d)(3)(ii) of the National Housing Act (12 U.S.C. 17151(d)(3)(ii)) for elevator-type projects that apply to the area in which the housing is located. These limits are available from the Multifamily Division in the HUD Field Office. If the participating jurisdiction's per-unit subsidy amount has already been increased to 210% as permitted under section 221(d)(3)(ii) of the National Housing Act, upon request of the Field Office, HUD will allow the per-unit subsidy amount to be increased on a program-wide basis to an amount, up to 240% of the original per unit limits.

(b) *Subsidy layering.* Before committing funds to a project, the participating jurisdiction must evaluate the

project in accordance with guidelines that it has adopted for this purpose and will not invest any more HOME funds, in combination with other governmental assistance, than is necessary to provide affordable housing.

[61 FR 48750, Sept. 16, 1997, as amended at 62 FR 28929, May 28, 1997]

#### § 92.251 Property standards.

(a) (1) Housing that is constructed or rehabilitated with HOME funds must meet all applicable local codes, rehabilitation standards, ordinances, and zoning ordinances at the time of project completion, except as provided in paragraph (b) of this section. The participating jurisdiction must have written standards for rehabilitation that ensure that HOME-assisted housing is decent, safe, and sanitary. In the absence of a local code for new construction or rehabilitation, HOME-assisted new construction or rehabilitation must meet, as applicable, one of three model codes: Uniform Building Code (ICBO), National Building Code (BOCA), Standard (Southern) Building Code (SBCCI); or the Council of American Building Officials (CABO) one or two family code; or the Minimum Property Standards (MPS) in 24 CFR 200.925 or 200.926. To avoid duplicative inspections when FHA financing is involved in a HOME-assisted property, a participating jurisdiction may rely on a Minimum Property Standards (MPS) inspection performed by a qualified person. Newly constructed housing must meet the current edition of the Model Energy Code published by the Council of American Building Officials.

(2) All other HOME-assisted housing (e.g., acquisition) must meet all applicable State and local housing quality standards and code requirements and if there are no such standards or code requirements, the housing must meet the housing quality standards in 24 CFR 982.401.

(3) The housing must meet the accessibility requirements at 24 CFR part 8, which implements Section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794) and covered multifamily dwellings, as defined at 24 CFR 100.201, must also meet the design and construction requirements at 24 CFR 100.205, which
