

Internal Revenue Service, Treasury

§ 1.23-5

by \$9,000 plus \$6,000) and B is allowed a \$1,600 credit (\$4,000 times \$6,000 divided by \$9,000 plus \$6,000) with respect to the expenditures attributable to the jointly owned house. C is entitled to a credit of \$4,000 with respect to the expenditures attributable to the other house.

(2) *Example.* The application of this subparagraph may be illustrated by the following example:

Example. A, B, and C each has a separate principal residence. They agree to finance jointly the construction of a solar collector, each providing one-third of the costs and taking one-third of the output of the collector. Each will separately pay for the costs of connecting the solar collector with his or her principal residence. Provided the solar collector and connection equipment otherwise qualify as renewable energy source property, A, B, and C will each be considered to have made renewable energy source expenditures equal to one-third of the cost of the collector plus his or her separate connection costs. Such expenditures will be subject to the limitations and other rules separately applicable to A, B, and C with respect to each principal residence, such as those with respect to the \$10 minimum (§1.23-1(d)(1)), prior expenditures (§1.23-1(d)(2)), residential use (paragraph (g) of this section), and joint occupancy (paragraph (h) of this section).

(k) *Basic adjustments.* If a credit is allowed under section 23 or former section 44C for any expenditure with respect to any property, the increase in the basis of that property which would (but for this paragraph) result from such expenditure shall be reduced by the amount of the credit allowed.

(1) *Recordkeeping*—(1) *In general.* No residential energy credit is allowable unless the taxpayer maintains the records described in paragraph (1)(2) of this section. The records shall be retained so long as the contents thereof may become material in the administration of any internal revenue law.

(2) *Records.* The taxpayer must maintain records that clearly identify the energy-conserving components and renewable energy source property with respect to which a residential energy credit is claimed, and substantiate their cost to the taxpayer, any labor costs properly allocable to them paid

for by the taxpayer, and the method used for allocating such labor costs.

[T.D. 7717, 45 FR 57719, Aug. 29, 1980. Redesignated and amended by T.D. 8146, 52 FR 26672, July 16, 1987]

§ 1.23-4 Performance and quality standards. [Reserved]

[T.D. 7717, 45 FR 57721, Aug. 29, 1980. Redesignated by T.D. 8146, 52 FR 26672, July 16, 1987]

§ 1.23-5 Certification procedures.

(a) *Certification that an item meets the definition of an energy-conserving component or renewable energy source property.* Upon the request of a manufacturer of an item pursuant to paragraph (b) of this section which is supported by proof that the item is entitled to be certified, the Assistant Commissioner (Technical) shall certify (or shall notify the manufacturer that the request is denied) that:

(1) The item meets the definition of insulation (see §1.23-2(c)(1)).

(2) The item meets the definition of an other energy-conserving component specified in section 23(c)(4) or former section 44C(c)(4) see (§1.23-2(d)(4)).

(3) The item meets the definition of solar energy property (see §1.23-2(f)), wind energy property (see §1.23-2(g)), or geothermal energy property (see §1.23-2(h)).

(4) The item meets the definition of a category of energy-conserving component that has been added to the list of approved items pursuant to paragraph (d)(4)(viii) of §1.23-2.

(5) The item meets the definition of renewable energy source property that transmits or uses a renewable energy source that has been added to the list of approved renewable energy sources pursuant to paragraph (e)(2) of §1.23-2.

(b) *Procedure*—(1) *In general.* A manufacturer of an item desiring to apply under paragraph (a) shall submit the application to the Commissioner of Internal Revenue, Attention: Associate Chief Counsel (Technical), CC:C:E, 1111 Constitution Avenue NW., Washington, DC 20224. Upon being advised by the National Office, orally or in writing, that an adverse decision is contemplated a manufacturer may request a conference. The conference must be

§ 1.23-6

held within 21 calendar days from the date of that advice. Procedures for requesting an extension of the 21-day period and notifying the manufacturer of the Service's decision on that request are the same as those applicable to conferences on ruling requests by taxpayers (see section 9.05 of Rev. Proc. 80-20).

(2) *Contents of application.* The application shall include a description of the item (including appropriate design drawings and specifications) and an explanation of the purpose and function of the item. There shall accompany the application a declaration in the following form: "Under penalties of perjury, I declare that I have examined this application, including accompanying documents and, to the best of my knowledge and belief, the facts presented in support of the application are true, correct, and complete." The statement must be signed by the person or persons making the application.

(c) *Effect of certification under paragraph (a).* Certifications granted under paragraph (a)(1), (2), or (3) will be applied retroactively to April 20, 1977. However, certifications granted under paragraph (a) (4) or (5) will be applied retroactively only to the date the applicable energy-conserving component or renewable energy source was added by Treasury decision to the list of qualifying components or sources. Certification of an item under this section means that the applicable definitional requirement of § 1.23-2 is considered satisfied in the case of any person claiming a residential energy credit with respect to such item. However, it does not relieve manufacturers of the need to establish that their items conform to performance and quality standards (if any) provided under § 1.23-4 and that their items can reasonably be expected to remain in operation at least 3 years, in the case of insulation and other energy-conserving components, or at least 5 years, in the case of renewable energy source property.

[T.D. 7717, 45 FR 57721, Aug. 29, 1980. Redesignated and amended by T.D. 8146, 52 FR 26672, July 16, 1987]

26 CFR Ch. I (4-1-03 Edition)

§ 1.23-6 Procedure and criteria for additions to the approved list of energy-conserving components or renewable energy sources.

(a) *Procedures for additions to the list of energy-conserving components or renewable energy sources—(1) In general.* A manufacturer of an item (or a group of manufacturers) desiring to apply for addition to the approved list of energy-conserving components or renewable energy sources pursuant to paragraph (d)(4)(viii) or (e)(2) of § 1.23-2 shall submit an application to the Internal Revenue Service, Attention: Associate Chief Counsel (Technical), CC:C:E, 1111 Constitution Avenue, NW., Washington, DC 20224. The term "manufacturer" includes a person who assembles an item or a system from components manufactured by other persons. The application shall provide the information required under paragraph (b) of this section. An application may request that more than one item be added to the approved list. It will be the responsibility of the Office of the Associate Chief Counsel (Technical) upon receipt of the application to determine whether all the information required under paragraph (b) of this section has been furnished with the application. If an application lacks essential information, the applicant will be advised of the additional information required. If the information (or a reasonable explanation of the reason why the information cannot be made available) is not forthcoming within 30 days of the date of that advice, the application will be closed and the applicant will be so informed. Any resubmission of information beyond the 30-day period will be treated as a new application. If the Office of the Associate Chief Counsel (Technical) already is considering an application with respect to the same or a similar item, it may consolidate applications. The Office of the Associate Chief Counsel will make a report and recommendation to the ad hoc advisory board as to whether each item that is the subject to an application should be added in accordance with the manufacturer's request to the approved list of energy-conserving components or renewable energy
