

Relocation Allowances

§ 302-17.8

(see appendix A of this part) and 28 percent for Year 2 (1990) (see appendix C of this part). These rates would be used regardless of how much of the \$84,100 was attributable to reimbursement for the employee's relocation expenses. (Note that these marginal rates are different from the withholding tax rate used for the WTA.) If the employee incurs only Federal income tax (i.e., there are no State or local taxes), the Federal marginal tax rates determined from appendices A and C of this part are the CMTR's to be used in the RIT gross-up formula provided in § 302-17.8(f). In such cases, the provisions of paragraphs (e)(2) and (3) of this section, do not apply.

(2) *State marginal tax rate.* (i) If the employee incurs an additional State income tax (see definition in § 302-17.5(a)) liability as a result of moving expense reimbursements, the appropriate State tax table in appendix B of this part is to be used to determine the applicable State marginal tax rate that will be substituted into the formula for determining the CMTR for both Year 1 and Year 2. The appropriate State tax table will be the one that corresponds to the tax year in which the reimbursements are paid to the employee (Year 1). The income level determined in paragraph (d) of this section for Federal taxes shall be used to identify the appropriate income bracket in the State tax table. The applicable State marginal tax rate is obtained from the selected income bracket column for the State where the employee is required to pay State income tax on moving expense reimbursements. The tax rates shown in the table apply to all employees regardless of their filing status, except where a separate rate is shown for a single filing status.

(ii) The lowest income bracket shown in the State tax tables in appendix B of this part is \$20,000-\$24,999. In cases where the employee's (employee's and spouse's, if filing jointly) earned income as determined under paragraph (d) of this section is less than this income bracket, an appropriate State marginal tax rate shall be established by the employing agency from the applicable State tax code or regulations issued pursuant thereto. Such State marginal tax rate shall be representa-

tive of the earned income level in question but in no case more than the marginal tax rate established in appendix B of this part for the \$20,000-\$24,999 income bracket for the particular State in which an additional tax obligation has been incurred.

(iii) The prescribed State marginal tax rates generally are expressed as a percent of taxable income. However, if the applicable State marginal tax rate is stated as a percentage of the Federal income tax liability, the State tax rate must be converted to a percent of taxable income to be used in the CMTR formulas in paragraph (e)(5) of this section. This is accomplished by multiplying the applicable Federal tax rate for Year 1 by the applicable State tax rate. For example, if the Federal tax rate is 33 percent for Year 1 and the State tax rate is 25 percent of the Federal income tax liability, the State tax rate stated as a percent of taxable income would be 8.25 percent. The State tax rate thus determined for Year 1 will be used in determining the CMTR for both Year 1 and Year 2.

(iv) An employee may incur a State income tax liability on moving expense reimbursements in more than one State at the same or different marginal tax rates (i.e., double taxation). For example, an employee may incur taxes on moving expense reimbursements in one State because of residency in that State, and in another State because that particular State taxes income earned within its jurisdiction irrespective of whether the employee is a resident. In such cases, a single State marginal tax rate must be determined for use in the CMTR formulas in paragraph (e)(5) of this section. The general rules in paragraph (e)(2)(iv) (A) through (C) of this section apply in determining the applicable single State marginal tax rate in such cases.

(A) If two or more States impose an income tax on an employee's moving expense reimbursement, but no two States tax the same portion of the reimbursement, then the reimbursement is not subject to double taxation. In this situation, the average of the applicable State marginal tax rates, as determined under paragraphs (e)(2) (i) through (iii) of this section, shall be treated as being imposed on the entire
