

Bureau of Land Management, Interior

§ 2610.0-8

native grasses sufficient in quantity, if ungrazed by grazing animals, to make an ordinary crop of hay in usual seasons, are not desert lands. Lands which will produce an agricultural crop of any kind without irrigation in amount sufficient to make the cultivation reasonably remunerative are not desert. Lands containing sufficient moisture to produce a natural growth of trees are not to be classed as desert lands.

(d) *Economic feasibility* means the capability of an entry to provide an economic return to the settler sufficient to provide a viable farm enterprise and assure continued use of the land for farming purposes. Factors considered in determining feasibility may include the cost of developing or acquiring water, land reclamation costs, land treatment costs, the cost of construction or acquisition of a habitable residence, acquisition of farm equipment, fencing and other costs associated with a farm enterprise, such as water delivery, seed, planting, fertilization, harvest, etc.

(e) *Grant contract* means the contract between a State and the United States which sets the terms and conditions which the State or its assignees shall comply with before lands shall be patented.

(f) *Irrigation* means the application of water to the land for the purpose of growing crops.

(g) *Ordinary agricultural crops* means any agricultural product to which the land under consideration is generally adapted, and which would return a fair reward for the expense of producing them. Ordinary agricultural crops do not include forest products, but may include orchards and other plants which cannot be grown on the land without irrigation and from which a profitable crop may be harvested.

(h) *Reclamation* means the establishment of works for conducting water in adequate volume and quantity to the land so as to render it available for distribution when needed for irrigation and cultivation.

(i) *Segregation* means the action under the Act of August 19, 1894 (39

Stat. 422), as amended (43 U.S.C. 641), by which the lands are reserved from the public domain and closed to application or entry under the public land laws, including location under the mining laws.

(j) *Smallest legal subdivision* means a quarter quarter section (40 acres).

§ 2610.0-7 Background.

The Carey Act authorizes the Secretary of the Interior, with the approval of the President, to contract and agree to grant and patent to States, in which there are desert lands, not exceeding 1 million acres of such lands to each State, as the State may cause to be reclaimed. The State shall also cause not less than 20 acres of each 160 acre tract to be cultivated by actual settlers. A number of amendments allowed additional acreages for certain States. Colorado, Nevada and Wyoming were allowed up to 2 million acres. Idaho was allowed up to 3 million acres.

§ 2610.0-8 Lands subject to application.

(a) The lands shall be unreclaimed desert lands capable of producing ordinary agricultural crops by irrigation.

(b) The lands shall be nonmineral, except that lands withdrawn, classified or valuable for coal, phosphate, nitrate, potash, sodium, sulphur, oil, gas or asphaltic minerals may be applied for subject to a reservation of such deposit, as explained in subpart 2093 of this title.

(c) Lands embraced in mineral permits of leases, or in applications for such permits or leases, or classified, withdrawn or reported as valuable for any leasable mineral, or lying within the geologic structure of a field are subject to the provisions of §§ 2093.0-3 through 2093.0-7 of this title.

(d) A project or individual entry may consist of 2 or more noncontiguous parcels. However, noncontiguous lands should be in a pattern compact enough to be managed as an efficient, economic unit.
