

§ 3110.5-3

43 CFR Ch. II (10-1-03 Edition)

§ 3110.5-3 Acquired lands.

(a) If the lands applied for lie within and conform to the rectangular system of public land surveys and constitute either all or a portion of the tract acquired by the United States, such lands shall be described by legal subdivision, section, township, range, and, if needed, meridian.

(b) If the lands applied for do not conform to the rectangular system of public land surveys, but lie within an area of the public land surveys and constitute the entire tract acquired by the United States, such lands shall be described by metes and bounds, giving courses and distances between the successive angle points with appropriate ties to the nearest official survey corner, or a copy of the deed or other conveyance document by which the United States acquired title to the lands may be attached to the offer and referred to therein in lieu of redescribing the lands on the offer form. If the desired lands constitute less than the entire tract acquired by the United States, such lands shall be described by metes and bounds, giving courses and distances between the successive angle points with appropriate ties to the nearest official survey corner. If a portion of the boundary of the desired lands coincides with the boundary in the deed or other conveyance document, that boundary need not be redescribed on the offer form, provided that a copy of the deed or other conveyance document upon which the coinciding description is clearly identified is attached to the offer. That portion of the description not coinciding shall be tied by description on the offer by courses and distances between successive angle points into the description in the deed or other conveyance document.

(c) If the lands applied for lie outside an area of the public land surveys and constitute the entire tract acquired by the United States, such lands shall be described as in the deed or other conveyance document by which the United States acquired title to the lands, or a copy of that document may be attached to the offer and referred to therein in lieu of redescribing the lands on the offer form. If the desired lands constitute less than the entire tract acquired by the United States, such

lands shall be described by courses and distances between successive angle points tying by courses and distances into the description in the deed or other conveyance document. If a portion of the boundary of the desired lands coincides with the boundary in the deed or other conveyance document, that boundary need not be redescribed on the offer form, provided that a copy of the deed or other conveyance document upon which the coinciding description is clearly identified is attached to the offer. That portion of the description not coinciding shall be tied by description in the offer by courses and distances between successive angle points into the description in the deed or other conveyance document.

(d) Where the acquiring agency has assigned an acquisition or tract number covering the lands applied for, without loss of priority to the offeror, the authorized officer may require that number in addition to any description otherwise required by this section. If the authorized officer determines that the acquisition or tract number, together with identification of the State and county, constitutes an adequate description, the authorized officer may allow the description in this manner in lieu of other descriptions required by this section.

(e) Where the lands applied for do not conform to the rectangular system of public land surveys, without loss of priority to the offeror, the authorized officer may require 3 copies of a map upon which the location of the desired lands are clearly marked with respect to the administrative unit or project of which they are a part.

§ 3110.5-4 Accreted lands.

Where an offer includes any accreted lands, the accreted lands shall be described by metes and bounds, giving courses and distances between the successive angle points on the boundary of the tract, and connected by courses and distances to an angle point on the perimeter of the tract to which the accretions appertain.

§ 3110.5-5 Conflicting descriptions.

If there is any variation in the land description among the required copies

Bureau of Land Management, Interior

§ 3110.9-2

of the official forms, the copy showing the date and time of receipt in the proper BLM office shall control.

[53 FR 22840, June 17, 1988; 53 FR 31868, Aug. 22, 1988]

§ 3110.6 Withdrawal of offer.

An offer for noncompetitive lease under this subpart may be withdrawn in whole or in part by the offeror. However, a withdrawal of an offer made in accordance with § 3110.1(b) of this title may be made only if the withdrawal is received by the proper BLM office after 60 days from the date of filing of such offer. No withdrawal may be made once the lease, an amendment of the lease, or a separate lease, whichever covers the lands so described in the withdrawal, has been signed on behalf of the United States. If a public domain offer is partially withdrawn, the lands retained in the offer shall comply with § 3110.3-3(a) of this title.

§ 3110.7 Action on offer.

(a) No lease shall be issued before final action has been taken on any prior offer to lease the lands or any extension of, or petition for reinstatement of, an existing or former lease on the lands. If a lease is issued before final action, it shall be canceled, if the prior offeror is qualified to receive a lease or the petitioner is entitled to reinstatement of a former lease.

(b) The authorized officer shall not issue a lease for lands covered by a lease which terminated automatically, until 90 days after the date of termination.

(c) The United States shall indicate its acceptance of the lease offer, in whole or in part, and the issuance of the lease, by signature of the authorized officer on the current lease form. A signed copy of the lease shall be delivered to the offeror.

(d) Except as otherwise specifically provided in the regulations of this group, an offer that is not filed in accordance with the regulations in this part shall be rejected.

(e) Filing an offer on a lease form not currently in use, unless such lease form has been declared obsolete by the Director prior to the filing shall be allowed, on the condition that the offeror

is bound by the terms and conditions of the lease form currently in use.

§ 3110.8 Amendment to lease.

After the competitive process has concluded in accordance with subpart 3120 of this title, if any of the lands described in a lease offer for lands available during the 2-year period are open to oil and gas filing when the offer is filed but are omitted from the lease for any reason the original lease shall be amended to include the omitted lands unless, before the issuance of the amendment, the proper BLM office receives a withdrawal of the offer with respect to such lands or the offeror elects to receive a separate lease in lieu of an amendment. Such election shall be made by submission of a signed statement of the offeror requesting a separate lease, and a new offer on the required form executed pursuant to this part describing the remaining lands in the original offer. The new offer shall have the same priority as the old offer. No new application fee is required with the new offer. The rental payment held in connection with the original offer shall be applied to the new offer. The rental and the term of the lease for the lands added by an amendment shall be the same as if the lands had been included in the original lease when it was issued. If a separate lease is issued, it shall be dated in accordance with § 3110.3-2 of this title.

§ 3110.9 Future interest offers.

§ 3110.9-1 Availability.

A noncompetitive future interest lease shall not be issued until the lands covered by the offer have been made available for competitive lease under subpart 3120 of this title. An offer made for lands that are leased competitively shall be rejected.

§ 3110.9-2 Form of offer.

An offer to lease a future interest shall be filed in accordance with this subpart, and may include tracts in which the United States owns a fractional present interest as well as the future interest for which a lease is sought.
