

## §21.14

(1) The operation is accomplished according to general instructions provided for by the applicant;

(2) The applicant retains effective control over the radio facilities and their operations; and

(3) The applicant assumes full responsibility for both the quality of service and for contractor compliance with the Commission's Rules.

[44 FR 60534, Oct. 19, 1979, as amended at 47 FR 29244, July 6, 1982; 51 FR 15003, Apr. 22, 1986; 52 FR 37778, Oct. 9, 1987; 55 FR 46008, Oct. 31, 1990; 58 FR 19774, Apr. 16, 1993; 58 FR 44894, Aug. 25, 1993; 60 FR 36551, July 17, 1995; 61 FR 26673, May 28, 1996]

### §21.14 [Reserved]

### §21.15 Technical content of applications.

Applications shall contain all technical information required by the application form and any additional information necessary to fully describe the proposed facilities and to demonstrate compliance with all technical requirements of the rules governing the radio service involved (see subparts C, F and K as appropriate). The following paragraphs describe a number of technical requirements.

(a)(1) Except in the case of applicants for Multipoint Distribution Service, applicants proposing a new station location (including receive-only stations and passive repeaters) must indicate whether the station site is owned. If it is not owned, its availability for the proposed radio station site must be demonstrated. Under ordinary circumstances, this requirement will be considered satisfied if the site is under lease or under written option to buy or lease.

(2) Where any lease or agreement to use land limits or conditions in any way the applicant's access or use of the site to provide public service, a copy of the lease or agreement (which clearly indicates the limitations or conditions) must be filed with the application, except in the case of applicants for stations in the Multipoint Distribution Service. Multipoint Distribution Service applicants must instead certify compliance with the limitations and conditions contained in the lease or option agreement.

## 47 CFR Ch. I (10-1-03 Edition)

(3) Except for BTA and PSA authorization holders, Multipoint Distribution Service applicants proposing a new station location must certify the proposed station site will be available to the applicant for timely construction of the facilities during the initial construction period.

(4) An applicant's failure to include a certification required under this Section will result in dismissal of the application. The submission of a false certification will subject the applicant to all remedies available to the Commission, including the dismissal with prejudice of all applications filed by the offending applicant and the revocation of authorizations of the offending applicant. Also, if evidence of intent exists, the case will be referred to the Department of Justice for criminal prosecution under 18 U.S.C. 1001. In addition, the submission of an intentionally falsified certification will be treated as a reflection on an applicant's basic qualifications to become or to remain a licensee.

(b) [Reserved]

(c) Each application involving a new or modified transmitting antenna supporting structure, passive facility, or the addition or removal of a transmitting antenna, or the repositioning of an authorized antenna for a station must be accompanied by a vertical profile sketch of the total structure depicting its structural nature and clearly indicating the ground elevation (above sea level) at the structure site, the overall height of the structure above ground (including obstruction lights when required, lightning rods, etc.) and, if mounted on a building, its overall height above the building. The proposed antenna on the structure must be clearly identified and its height above-ground (measured to the center of radiation) clearly indicated. Alternatively, applicants in the Multipoint Distribution Service who filed applications on or after September 15, 1995, may provide this information in the MDS long-form application.

(d) Each application proposing a new or modified antenna structure for a station (including a passive repeater or signal booster station) so as to change its overall height shall indicate whether any necessary notification of the

FAA has been made. Complete information as to rules concerning the construction, marking and lighting of antenna structures is contained in part 17 of this chapter. See also §21.111 if the structure is used by more than one station.

(e) *Antenna Structure Registration Number.* Applications proposing construction of a new antenna structure or alteration of the overall height of an existing antenna structure, where FAA notification prior to such construction or alteration is required by part 17 of this chapter, must include the FCC Antenna Structure Registration Number for the affected structure. If no such number has been assigned at the time the application is filed, the applicant must state in the application whether or not the antenna structure owner has notified the FAA of the proposed construction or alteration and applied to the FCC for an Antenna Structure Registration Number in accordance with Part 17 of this chapter of this structure for the antenna structure in question.

(f) Except for applicants in the Multipoint Distribution Service who filed applications on or after September 15, 1995, an applicant proposing construction of one or more new stations or modification of existing stations where substantial changes in the operation or maintenance procedures are involved must submit a showing of the general maintenance procedures involved to insure the rendition of good public communications service. The showing should include but need not be limited to the following.

(1) Location and telephone number (if known) of the maintenance center for a point to point microwave system. In lieu of providing the location and telephone number of the maintenance on a case by case basis, a licensee may file a complete list for all operational stations with the Commission and the Engineer-In-Charge of the appropriate radio district on an annual basis or at more frequent intervals as necessary to keep the information current.

(2) The manner in which technical personnel are made aware of malfunction at any of the stations and the appropriate time required for them to reach any of the stations in the event of an emergency. If fault alarms are to

be used, the items to be alarmed shall be specified as well as the location of the alarm center.

(g) Applications in the Multipoint Distribution Service filed before September 15, 1995, proposing a new or replacement antenna (excluding omnidirectional antennas) shall include an antenna radiation pattern showing the antenna power gain distribution in the horizontal plane expressed in decibels, unless such pattern is known to be on file with the Commission in which case the applicant may reference in its application the FCC-ID number that indicates that the pattern is on file with the Commission. Multipoint Distribution Service applicants who filed applications on or after September 15, 1995 must provide related information in completing an MDS long-form application.

(h) Except for applications in the Multipoint Distribution Service filed on or after September 15, 1995, each application in the Point-to-Point Radio, Local Television Transmission and Digital Electronic Message Service (excluding user stations) proposing a new or replacement antenna (excluding omnidirectional antennas) shall include an antenna radiation pattern showing the antenna power gain distribution in the horizontal plane expressed in decibels, unless such pattern is known to be on file with the Commission in which case the applicant may reference in its application the FCC-ID number that indicates that the pattern is on file with the Commission. Multipoint Distribution Service applicants who filed applications on or after September 15, 1995 must provide related information in completing an MDS long-form application.
