

§ 74.984

hour. Visual or aural transmissions shall be employed.

(c) The hourly station identification announcement during operation may be deferred if it would interrupt a single consecutive demonstration, lecture, or other similar discourse or otherwise impair the continuity of a program in progress. In such cases the station identification announcement shall be made at the first normal break in the continuity of the program.

(d) In cases where an instructional television fixed station is operating as a relay for signals originating at some other station operated by the same licensee, its call sign shall be announced by the originating station at the times and in the manner prescribed in paragraph (b) of this section.

(e) Where an instructional television fixed station is operating as a relay for signals originating at a station operated by some other licensee, its call sign may be transmitted by the originating station, if suitable arrangements can be made with the other licensee, or means shall be provided for the transmission of the call sign by the relay transmitter itself. Low power relay stations, authorized by § 74.950(f)(4) will not be assigned individual call signs. Station identification will be accomplished by the retransmission of the call sign of the primary station.

(f) Temporary fixed ITFS stations shall identify with the call sign of the primary station and a temporary fixed identifier.

(g) The provisions of paragraphs (b) through (e) of this section shall not apply to any ITFS licensee's station or transmissions where digital transmissions are utilized by the ITFS licensee on any of its licensed or shifted channels.

[28 FR 13731, Dec. 14, 1963, as amended at 36 FR 8873, May 4, 1971; 38 FR 25991, Sept. 17, 1973; 49 FR 32596, Aug. 15, 1984; 63 FR 65125, Nov. 25, 1998]

§ 74.984 Retransmissions.

An instructional television fixed station may not retransmit the signals of any class of station without consent of the station originating the signals to be retransmitted.

47 CFR Ch. I (10-1-03 Edition)

§ 74.985 Signal booster stations.

(a) An ITFS booster station may reuse channels to repeat the signals of ITFS stations or to originate signals on ITFS channels. The aggregate power flux density generated by an ITFS station and all associated signal booster stations and all simultaneously operating cochannel response stations licensed to or applied for by the applicant may not exceed -73 dBW/m² (or the appropriately adjusted value based on the actual bandwidth used if other than 6 MHz, see § 74.903(a)(6)(i)) at or beyond the boundary of the protected service area, as defined by § 21.902(d) of this chapter, of the main ITFS station whose channels are being reused, as measured at locations for which there is an unobstructed signal path, unless the consent of the cochannel licensee is obtained.

(b) A licensee or the capacity lessee of such ITFS station upon the written consent of the licensee, may secure a license for a high power signal booster station that has a maximum EIRP in excess of -9 dBW + $10 \log(X/6)$ dBW where X is the channel width in MHz, if it complies with the out-of-band emission requirements of § 21.908. Any licensee of a high-power booster station that is a capacity lessee shall, upon termination or expiration of the capacity lease, automatically assign the booster station license to the licensee of the ITFS station by and upon written notice to the Commission signed by the lessee and such. If upon termination or expiration of the capacity lease the licensee no longer desires or needs the high-power booster station license, such a license must be returned to the Commission. Furthermore, such capacity lessee must reserve 20 hours per week per channel for ITFS use, or reserve for recapture by the ITFS licensee for its ITFS educational usage, subject to one year's advance, written notification by the ITFS licensee to its lessee and accounting for all recapture already exercised, with no economic or operational detriment to the licensee, for a lessor using analog transmissions. Alternatively, the capacity lessee must reserve a minimum of 5% of the capacity of its channels for instructional purposes only and provide at least 20 hours
