

§ 275.18

7 CFR Ch. II (1-1-03 Edition)

a deficiency is included in the State agency's corrective action plan.

[Amdt. 160, 45 FR 15909, Mar. 11, 1980, as amended by Amdt. 266, 52 FR 3409, Feb. 4, 1987]

§ 275.18 Project area/management unit corrective action plan.

(a) The State agency shall ensure that corrective action plans are prepared at the project area/management unit level, addressing those deficiencies not required to be included in the State corrective action plan. State agencies may elect to prepare these plans for or in cooperation with the project area. These project area/management unit corrective action plans shall be open-ended and shall remain in effect until all deficiencies in program operations have been reduced substantially or eliminated. Any deficiencies detected through any source not previously reported to the State agency which require incorporation into the Project Area/Management Unit Corrective Action Plan shall be submitted to the State agency within 60 days of identification. As deficiencies are reduced substantially or eliminated, the project area/management unit shall notify the State agency in writing. The project area/management unit shall be responsible for documenting why each deficiency is being removed from the Plan. The removal of any deficiency from the Plan will be subject to State agency and FNS review and validation.

(b) *Content.* Project area/management unit corrective action plans shall contain all the information necessary to enable the State agency to monitor and evaluate the corrective action properly. Also, State agencies shall establish requirements for project area/management units in planning, implementing and reporting corrective action to assist the State agency's efforts to fulfill its responsibilities for determining which deficiencies must be addressed in the State corrective action plan. States should consider requiring project area/management unit plans to include the following, based on the most recent information available:

- (1) Specific description and identification of each deficiency;
- (2) Source(s) through which the deficiency was detected;

(3) Magnitude of each deficiency, if appropriate, as defined in § 275.15(c)(3) of this part;

(4) Geographic extent of the deficiency (throughout the project area/management unit or only in specific offices);

(5) Identification of causal factor(s) contributing to the occurrence of each deficiency;

(6) Identification of any action already completed to eliminate the deficiency;

(7) For each deficiency, an outline of actions to be taken, the expected outcome of each action, the target date for each action, the date by which each deficiency will have been eliminated; and

(8) For each deficiency, a description of the manner in which the project area/management unit will monitor and evaluate the effectiveness of the corrective action in eliminating the deficiency.

[Amdt. 160, 45 FR 15909, Mar. 11, 1980]

§ 275.19 Monitoring and evaluation.

(a) The State agency shall establish a system for monitoring and evaluating corrective action at the State and project area levels. Monitoring and evaluation shall be an ongoing process to determine that deficiencies are being substantially reduced or eliminated in an efficient manner and that the program provides responsive service to eligible households.

(b) The State agency shall ensure that corrective action on all deficiencies identified in the State Corrective Action Plan and Project Area/Management Unit Corrective Action Plan is implemented and achieves the anticipated results within the specified time frames. The State agency shall monitor and evaluate corrective action at the State and project levels through a combination of reports, field reviews, and examination of current data available through program management tools and other sources.

(c) In instances where the State agency and/or the project area/management unit determines that the proposed corrective action is not effective in reducing substantially or eliminating deficiencies, the State agency and/or the project area/management

unit shall promptly reevaluate the deficiency, causes, and the corrective action taken, and develop and implement new corrective actions.

Subpart F—Responsibilities for Reporting on Program Performance

§ 275.20 ME review schedules.

(a) Each State agency shall submit its review schedule to the appropriate FNS regional office at least 60 days prior to the beginning of the next year's review period (the Federal fiscal year). These schedules must ensure that all project areas/management units will be reviewed within the required time limits. Each schedule shall identify the project areas/management units in each classification and list each project area to be reviewed by month or by quarter. A State agency may submit a request to use an alternate review schedule at any time. The alternate schedule shall not be effective until approved by FNS in accordance with §275.5(b)(2).

(b) State agencies shall notify the appropriate FNS regional office of all changes in review schedules.

[Amdt. 266, 52 FR 3410, Feb. 4, 1987]

§ 275.21 Quality control review reports.

(a) *General.* Each State agency shall submit reports on the performance of quality control reviews in accordance with the requirements outlined in this section. These reports are designed to enable FNS to monitor the State agency's compliance with Program requirements relative to the Quality Control Review System. Every case selected for review during the sample month must be accounted for and reflected in the appropriate report(s).

(b) *Individual cases.* The State agency shall report the review findings on each case selected for review during the sample month. For active cases, the State agency shall submit the edited findings of the Integrated Review Schedule, Form FNS-380-1. For negative cases, the State agency shall submit a summary report which is produced from the edited findings on indi-

vidual cases which are coded on the Negative Quality Control Review Schedule, Form FNS-245. The review findings shall be reported as follows:

(1) The State agency shall input and edit the results of each active and negative case into the FNS supplied computer terminal and transmit the data to the host computer. For State agencies that do not have FNS supplied terminals, the State agency shall submit the results of each QC review in a format specified by FNS. Upon State agency request, FNS will consider approval of a change in the review results after they have been reported to FNS.

(2) The State agency shall dispose of and report the findings of 90 percent of all cases selected in a given sample month so that they are received by FNS within 75 days of the end of the sample month. All cases selected in a sample month shall be disposed of and the findings reported so that they are received by FNS within 95 days of the end of the sample month.

(3) The State agency shall supply the FNS Regional Office with individual household case records and the pertinent information contained in the individual case records, or legible copies of that material, as well as legible hard copies of individual Forms FNS-380, FNS-380-1, and FNS-245 or other FNS-approved report forms, within 10 days of receipt of a request for such information.

(4) For each case that remains pending 95 days after the end of the sample month, the State agency shall immediately submit a report that includes an explanation of why the case has not been disposed of, documentation describing the progress of the review to date, and the date by which it will be completed. If FNS determines that the above report does not sufficiently justify the case's pending status, the case shall be considered overdue. Depending upon the number of overdue cases, FNS may find the State agency's QC system to be inefficient or ineffective and suspend and/or disallow the State agency's Federal share of administrative funds in accordance with the provisions of §276.4.

(c) *Monthly status.* The State agency shall report the monthly progress of sample selection and completion on the
