

## § 404.250

### SPECIAL COMPUTATION RULES FOR PEOPLE WHO HAD A PERIOD OF DISABILITY

#### § 404.250 Special computation rules for people who had a period of disability.

If you were disabled at some time in your life, received disability insurance benefits, and those benefits were terminated because you recovered from your disability or because you engaged in substantial gainful activity, special rules apply in computing your primary insurance amount when you become eligible after 1978 for old-age insurance benefits or if you become re-entitled to disability insurance benefits or die. (For purposes of §§ 404.250 through 404.252, we use the term *second entitlement* to refer to this situation.) There are two sets of rules:

(a) *Second entitlement within 12 months.* If 12 months or fewer pass between the last month for which you received a disability insurance benefit and your second entitlement, see the rules in § 404.251; and

(b) *Second entitlement after more than 12 months.* If more than 12 months pass between the last month for which you received a disability insurance benefit and your second entitlement, see the rules in § 404.252.

#### § 404.251 Subsequent entitlement to benefits less than 12 months after entitlement to disability benefits ended.

(a) *Disability before 1979; second entitlement after 1978.* In this situation, we compute your second-entitlement primary insurance amount by selecting the highest of the following:

(1) The primary insurance amount to which you were entitled when you last received a benefit, increased by any automatic cost-of-living or *ad hoc* increases in primary insurance amounts that took effect since then;

(2) The primary insurance amount resulting from a recomputation of your primary insurance amount, if one is possible; or

(3) The primary insurance amount computed for you as of the time of your second entitlement under any method for which you are qualified at that time, including the average-indexed-monthly-earnings method if the

## 20 CFR Ch. III (4-1-04 Edition)

previous period of disability is disregarded.

(b) *Disability and second entitlement after 1978.* In this situation, we compute your second-entitlement primary insurance amount by selecting the highest of the following:

(1) The primary insurance amount to which you were entitled when you last received a benefit, increased by any automatic cost-of-living or *ad hoc* increases in primary insurance amount that took effect since then;

(2) The primary insurance amount resulting from a recomputation of your primary insurance amount, if one is possible (this recomputation may be under the average-indexed-monthly-earnings method only); or

(3) The primary insurance amount computed for you as of the time of your second entitlement under any method (including an old-start method) for which you are qualified at that time.

(c) *Disability before 1986; second entitlement after 1985.* When applying the rule in paragraph (b)(3) of this section, we must consider your receipt of a monthly pension based on noncovered employment. (See § 404.213). However, we will disregard your monthly pension if you were previously entitled to disability benefits before 1986 and in any of the 12 months before your second entitlement.

[47 FR 30734, July 15, 1982, as amended at 52 FR 47918, Dec. 17, 1987]

#### § 404.252 Subsequent entitlement to benefits 12 months or more after entitlement to disability benefits ended.

In this situation, we compute your second-entitlement primary insurance amount by selecting the higher of the following:

(a) *New primary insurance amount.* The primary insurance amount computed as of the time of your second entitlement under any of the computation methods for which you qualify at the time of your second entitlement; or

(b) *Previous primary insurance amount.* The primary insurance amount to which you were entitled in the last month for which you were entitled to a disability insurance benefit.

**§ 404.261**

SPECIAL MINIMUM PRIMARY INSURANCE AMOUNTS

**§ 404.260 Special minimum primary insurance amounts.**

Regardless of the method we use to compute your primary insurance amount, if the special minimum primary insurance amount described in § 404.261 is higher, then your benefits (and those of your dependents or survivors) will be based on the special minimum primary insurance amount. Special minimum primary insurance amounts are not based on a worker's average earnings, as are primary insurance amounts computed under other methods. Rather, the special minimum primary insurance amount is designed to provide higher benefits to people who worked for long periods in low-paid jobs covered by social security.

**§ 404.261 Computing your special minimum primary insurance amount.**

(a) *Years of coverage.* (1) The first step in computing your special minimum primary insurance amount is to find the number of your years of coverage, which is the sum of—

(i) The quotient found by dividing your total creditable social security earnings during the period 1937–1950 by \$900, disregarding any fractional remainder; plus

(ii) The number of your computation base years after 1950 in which your social security earnings were at least the amounts shown in appendix IV. (*Computation base years* mean the same here as in other computation methods discussed in this subpart.)

(2) You must have at least 11 years of coverage to qualify for a special minimum primary insurance amount computation. However, special minimum primary insurance amounts based on little more than 10 years of coverage are usually lower than the regular minimum benefit that was in effect before 1982 (see §§ 404.212(e) and 404.222(b) of this part). In any situation where your primary insurance amount computed under another method is higher, we use that higher amount.

(b) *Computing your special minimum primary insurance amount.* (1) First, we subtract 10 from your years of coverage

and multiply the remainder (at least 1 and no more than 20) by \$11.50;

(2) Then we increase the amount found in paragraph (b)(1) of this section by any automatic cost-of-living or *ad hoc* increases that have become effective since December 1978 to find your special minimum primary insurance amount. See appendix V for the applicable table, which includes the 9.9 percent cost-of-living increase that became effective June 1979, the 14.3 percent increase that became effective June 1980, and the 11.2 percent increase that became effective June 1981.

*Example:* Ms. F, who attained age 62 in January 1979, had \$10,000 in total social security earnings before 1951 and her post-1950 earnings are as follows:

Year	Earnings
1951	\$1,100
1952	950
1953	0
1954	1,000
1955	1,100
1956	1,200
1957	0
1958	1,300
1959	0
1960	1,300
1961	0
1962	1,400
1963	1,300
1964	0
1965	500
1966	700
1967	650
1968	900
1969	1,950
1970	2,100
1971	2,000
1972	1,500
1973	2,700
1974	2,100
1975	2,600
1976	3,850
1977	4,150
1978	0

Her primary insurance amount under the average-indexed-monthly-earnings method as of June 1981 is \$240.40 (based on average indexed monthly earnings of \$229). Her guaranteed-alternative primary insurance amount under the average-monthly-wage method as of June 1981 is \$255.80 (based on average monthly wages of \$131).

However, Ms. F has enough earnings before 1951 to allow her 11 years of coverage before 1951 ( $\$10,000 \div \$900 = 11$ , plus a remainder, which we drop). She has sufficient earnings in 1951–52, 1954–56, 1958, 1960, 1962–63, 1969–71, 1973, and 1976–77 to have a year of coverage for each of
