

employing a simplified planning process will need to develop a transportation plan to be approved by the MPO and a TIP to be approved by the MPO and the Governor.

(d) The metropolitan transportation planning process shall include preparation of technical and other reports to assure documentation of the development, refinement, and update of the transportation plan. The reports shall be reasonably available to interested parties, consistent with § 450.316(b)(1).

[58 FR 58064, Oct. 28, 1993, as amended at 61 FR 67175, Dec. 19, 1996]

§ 450.318 Metropolitan transportation planning process: Major metropolitan transportation investments.

(a) Where the need for a major metropolitan transportation investment is identified, and Federal funds are potentially involved, major investment (corridor or subarea) studies shall be undertaken to develop or refine the plan and lead to decisions by the MPO, in cooperation with participating agencies, on the design concept and scope of the investment. Where the studies have not been completed prior to plan approval, the provisions of § 450.322(b)(8) apply.

(b) When any of the implementing agencies or the MPO wish to initiate a major investment study, a meeting will be convened to determine the extent of the analyses and agency roles in a cooperative process which involves the MPO, the State department of transportation, public transit operators, environmental, resource and permit agencies, local officials, the FHWA and the FTA and where appropriate community development agencies, major governmental housing bodies, and such other related agencies as may be impacted by the proposed scope of analysis. A reasonable opportunity, consistent with § 450.316(b)(1), shall be provided for citizens and interested parties including affected public agencies, representatives of transportation agency employees, and private providers of transportation to participate in the cooperative process. This cooperative process shall establish the range of alternatives to be studied, such as alternative modes and technologies (including intelligent vehicle and highway systems), general

alignment, number of lanes, the degree of demand management, and operating characteristics.

(c) To the extent appropriate as determined under paragraph (b) of this section, major investment studies shall evaluate the effectiveness and cost-effectiveness of alternative investments or strategies in attaining local, State and national goals and objectives. The analysis shall consider the direct and indirect costs of reasonable alternatives and such factors as mobility improvements; social, economic, and environmental effects; safety; operating efficiencies; land use and economic development; financing; and energy consumption.

(d) These major investment studies will serve as the “alternatives analyses” required by section 3(i)(1)(A) of the Federal Transit Act (49 U.S.C. app. 1602(i)) for certain projects for which discretionary section 3 “New Start” funding is being sought. The studies will also be used as the primary source of information for the other section 3(i)(1)(A) Secretarial findings on cost-effectiveness, local financial commitment and capacity, mobility improvements, environmental benefits, economic development, operating efficiency, etc.

(e) These major investment studies also will, when appropriate, serve as the analysis of demand reduction and operational management strategies pursuant to 23 CFR 500.109(b).

(f) A major investment study will include environmental studies which will be used for environmental documents as described in paragraphs (f)(1) and (2) of this section:

(1) As a minimum the participating agencies will use the major investment study as input to an environmental impact statement or environmental assessment prepared subsequent to the completion of the study. In such a case, the major investment study reports shall document the consideration given to alternatives and their impacts; or

(2) The participating agencies may elect to develop a draft environmental impact statement or environmental assessment as part of the major investment study. At any time after the completion of the study and the inclusion of the major transportation investment

§ 450.320

23 CFR Ch. I (4-1-04 Edition)

in the plan and the TIP the participating agencies may request the development of final environmental decision documents required under NEPA for such major transportation investments, culminating in the execution of a Record of Decision or Finding of No Significant Impact by the FHWA and/or the FTA.

(g) Major investment studies may lead to decisions that modify the project design concept and scope assumed in the plan development process. In this case, the study shall lead to the specification of a project's design concept and scope in sufficient detail to meet the requirements of the U.S. EPA conformity regulations (40 CFR part 51).

(h) Major investment studies are eligible for funds authorized under sections 8, 9 and 26 of the Federal Transit Act (49 U.S.C. app. 1607, 16072, and 1622) and planning and capital funds apportioned under title 23, U.S.C., and shall be included in the UPWP. If CMAQ, STP, NHS, or other capital funds administered by the FHWA are utilized for this purpose, the study must also be included in the TIP.

(i) Where the environmental process has been completed and a Record of Decision or Finding of No Significant Impact has been signed, § 450.318 does not apply. Where the environmental process has been initiated but not completed, the FHWA and the FTA shall be consulted on appropriate modifications to meet the requirements of this section.

[58 FR 58064, Oct. 28, 1993, as amended at 61 FR 67175, Dec. 19, 1996]

§ 450.320 Metropolitan transportation planning process: Relation to management systems.

(a) Within all metropolitan areas, congestion, public transportation, and intermodal management systems, to the extent appropriate, shall be part of the metropolitan transportation planning process required under the provisions of 23 U.S.C. 134 and 49 U.S.C. 5303-5305.

(b) In TMAs designated as nonattainment for ozone or carbon monoxide, Federal funds may not be programmed for any project that will result in a significant increase in carrying capacity

for single occupant vehicles (a new general purpose highway on a new location or adding general purpose lanes, with the exception of safety improvements or the elimination of bottlenecks) unless the project results from a congestion management system (CMS) meeting the requirements of 23 CFR part 500. Such projects shall incorporate all reasonably available strategies to manage the SOV facility effectively (or to facilitate its management in the future). Other travel demand reduction and operational management strategies, as appropriate for the corridor, but not appropriate for incorporation into the SOV facility itself, shall be committed to by the State and the MPO for implementation in a timely manner, but no later than the completion date for the SOV project. Projects that had advanced beyond the NEPA stage prior to April 6, 1992, and which are actively advancing to implementation, e.g., right-of-way acquisition has been approved, shall be deemed programmed and not subject to this provision.

(c) In TMAs, the planning process must include the development of a CMS that provides for effective management of new and existing transportation facilities through the use of travel demand reduction and operational management strategies and meets the requirements of 23 CFR part 500.

(d) The effectiveness of the management systems in enhancing transportation investment decisions and improving the overall efficiency of the metropolitan area's transportation systems and facilities shall be evaluated periodically, preferably as part of the metropolitan planning process.

[58 FR 58064, Oct. 28, 1993, as amended at 61 FR 67175, Dec. 19, 1996]

§ 450.322 Metropolitan transportation planning process: Transportation plan.

(a) The metropolitan transportation planning process shall include the development of a transportation plan addressing at least a twenty-year planning horizon. The plan shall include both long-range and short-range strategies/actions that lead to the development of an integrated intermodal
