

§710.401

These procedures should contain a prioritized appraisal, acquisition, and relocation strategy as well as check points for STD approval, such as approval of just compensation, replacement housing payment calculations, replacement housing payment and moving cost claims, appraisals, administrative and stipulated settlements that exceed determined thresholds based on a risk management analysis, etc. STD's which have an FHWA approved procedures manual, in accordance with 23 CFR 710.201(c), may comply with this section by requiring the design-builder to execute a certification in its proposal that it has received the approved right-of-way manual and will comply with the procedures.

(ii) The written relocation plan must provide reasonable time frames for the orderly relocation of residents and businesses on the project as provided at 49 CFR 24.205. It should be understood that these time frames will be based on best estimates of the time it will take to acquire the right-of-way and relocate families in accordance with certain legal requirements and time frames which may not be violated. Accordingly, the time frames estimated for right-of-way acquisition will not be compressed in the event other necessary actions preceding right-of-way acquisition miss their assigned due dates.

(2)(i) The design-builder must establish a project tracking system and quality control system. This system must show the appraisal, acquisition and relocation status of all parcels.

(ii) The quality control system may be administered by an independent consultant with the necessary expertise in appraisal, acquisition and relocation policies and procedures, who can make periodic reviews and reports to the design-builder and the STD.

(3) The STD may consider the establishment of a hold off zone around all occupied properties to ensure compliance with right-of-way procedures prior to starting construction activities in affected areas. The limits of this zone should be established by the STD prior to the design-builder entering on the property. There should be no construction related activity within the

23 CFR Ch. I (4-1-04 Edition)

hold off zone until the property is vacated. The design-builder must have written notification of vacancy from the right-of-way quality control consultant or STD prior to entering the hold off zone.

(4) Adequate access shall be provided to all occupied properties to insure emergency and personal vehicle access.

(5) Utility service must be available to all occupied properties at all times prior to and until relocation is completed.

(6) Open burning should not occur within 305 meters (1,000 feet) of an occupied dwelling.

(7) The STD will provide a right-of-way project manager who will serve as the first point of contact for all right-of-way issues.

(e) If the STD elects to perform all right-of-way services relating to the design-build contract, the provisions in §710.311 will apply. The STD will notify potential offerors of the status of all right-of-way issues in the request for proposal document.

[67 FR 75935, Dec. 10, 2002]

Subpart D—Real Property Management

§710.401 General.

This subpart describes the acquiring agency's responsibilities to control the use of real property required for a project in which Federal funds participated in any phase of the project. Prior to allowing any change in access control or other use or occupancy of acquired property along the Interstate, the STD shall secure an approval from the FHWA for such change or use. The STD shall specify in the State's ROW operations manual, procedures for the rental, leasing, maintenance, and disposal of real property acquired with title 23 of the United States Code funds. The State shall assure that local agencies follow the State's approved procedures, or the local agencies own procedures if approved for use by the STD.

§710.403 Management.

(a) The STD must assure that all real property within the boundaries of a

federally-aided facility is devoted exclusively to the purposes of that facility and is preserved free of all other public or private alternative uses, unless such alternative uses are permitted by Federal regulation or the FHWA. An alternative use must be consistent with the continued operation, maintenance, and safety of the facility, and such use shall not result in the exposure of the facility's users or others to hazards.

(b) The STD shall specify procedures in the State manual for determining when a real property interest is no longer needed. These procedures must provide for coordination among relevant STD organizational units, including maintenance, safety, design, planning, right-of-way, environment, access management, and traffic operations.

(c) The STD shall evaluate the environmental effects of disposal and leasing actions requiring FHWA approval as provided in 23 CFR part 771.

(d) Acquiring agencies shall charge current fair market value or rent for the use or disposal of real property interests, including access control, if those real property interests were obtained with title 23 of the United States Code funding, except as provided in paragraphs (d) (1) through (5) of this section. Since property no longer needed for a project was acquired with public funding, the principle guiding disposal would normally be to sell the property at fair market value and use the funds for transportation purposes. The term fair market value as used for acquisition and disposal purposes is as defined by State statute and/or State court decisions. Exceptions to the general requirement for charging fair market value may be approved in the following situations:

(1) With FHWA approval, when the STD clearly shows that an exception is in the overall public interest for social, environmental, or economic purposes; nonproprietary governmental use; or uses under 23 U.S.C. 142(f), Public Transportation. The STD manual may include criteria for evaluating disposals at less than fair market value. Disposal for public purposes may also be at fair market value. The STD shall

submit requests for such exceptions to the FHWA in writing.

(2) Use by public utilities in accordance with 23 CFR part 645.

(3) Use by Railroads in accordance with 23 CFR part 646.

(4) Use for Bikeways and pedestrian walkways in accordance with 23 CFR part 652.

(5) Use for transportation projects eligible for assistance under title 23 of the United States Code.

(e) The Federal share of net income from the sale or lease of excess real property shall be used by the STD for activities eligible for funding under title 23 of the United States Code. Where project income derived from the sale or lease of excess property is used for subsequent title 23 projects, use of the income does not create a Federal-aid project.

(f) No FHWA approval is required for disposal of property which is located outside of the limits of the right-of-way if Federal funds did not participate in the acquisition cost of the property.

(g) Highway facilities in which Federal funds participated in either the right-of-way or construction may be relinquished to another governmental agency for continued highway use under the provisions of 23 CFR 620, subpart B.

§ 710.405 Air rights on the Interstate.

(a) The FHWA policies relating to management of airspace on the Interstate for non-highway purposes are included in this section. Although this section deals specifically with approval actions on the Interstate, any use of airspace contemplated by a STD must assure that such occupancy, use, or reservation is in the public interest and does not impair the highway or interfere with the free and safe flow of traffic as provided in 23 CFR 1.23.

(1) This subpart applies to Interstate facilities which received title 23 of the United States Code assistance in any way.

(2) This subpart does not apply to the following:

(i) Non-Interstate highways.

(ii) Railroads and public utilities which cross or otherwise occupy Federal-aid highway right-of-way.
