

the request and supporting information must be sent to the [Name of State] management program and the federal permitting or licensing agency. The Secretary may collect fees from you for administering and processing your request.

§ 930.64 Federal permitting agency responsibility.

Following receipt of a State agency objection to a consistency certification, the Federal agency shall not issue the federal license or permit except as provided in subpart H of this part.

§ 930.65 Remedial action for previously reviewed activities.

(a) Federal and State agencies shall cooperate in their efforts to monitor federal license or permit activities in order to make certain that such activities continue to conform to both federal and State requirements.

(b) The State agency shall notify the relevant Federal agency representative for the area involved of any federal license or permit activity which the State agency claims was:

(1) Previously determined to be consistent with the management program, but which the State agency later maintains is being conducted or is having an effect on any coastal use or resource substantially different than originally described and, as a result, is no longer consistent with the management program; or

(2) Previously determined not to be an activity affecting any coastal use or resource, but which the State agency later maintains is being conducted or is having coastal effects substantially different than originally described and, as a result, the activity affects any coastal use or resource in a manner inconsistent with the management program.

(c) The State agency notification shall include:

(1) A description of the activity involved and the alleged lack of compliance with the management program;

(2) supporting information; and

(3) a request for appropriate remedial action. A copy of the request shall be sent to the applicant and the Director. Remedial actions shall be linked to coastal effects substantially different than originally described.

(d) If, after 30 days following a request for remedial action, the State agency still maintains that the applicant is failing to comply substantially with the management program, the governor or State agency may file a written objection with the Director. If the Director finds that the applicant is conducting an activity that is substantially different from the approved activity, the applicant shall submit an amended or new consistency certification and supporting information to the Federal agency and to the State agency, or comply with the originally approved certification.

(e) An applicant shall be found to be conducting an activity substantially different from the approved activity if the State agency claims and the Director finds that the activity affects any coastal use or resource substantially different than originally described by the applicant and, as a result, the activity is no longer being conducted in a manner consistent with the enforceable policies of the management program. The Director may make a finding that an applicant is conducting an activity substantially different from the approved activity only after providing 15 days for the applicant and the Federal agency to review the State agency's objection and to submit comments for the Director's consideration.

§ 930.66 Supplemental coordination for proposed activities

(a) For federal license or permit proposed activities that were previously determined by the State agency to be consistent with the management program, but which have not yet begun, applicants shall further coordinate with the State agency and prepare a supplemental consistency certification if the proposed activity will affect any coastal use or resource substantially different than originally described. Substantially different coastal effects are reasonably foreseeable if:

(1) The applicant makes substantial changes in the proposed activity that are relevant to management program enforceable policies; or

(2) There are significant new circumstances or information relevant to the proposed activity and the proposed

§ 930.70

activity's effect on any coastal use or resource.

(b) The State agency may notify the applicant, the Federal agency and the Director of proposed activities which the State agency believes should be subject to supplemental coordination. The State agency's notification shall include information supporting a finding of substantially different coastal effects than originally described and the relevant enforceable policies, and may recommend modifications to the proposed activity (if any) that would allow the applicant to implement the proposed activity consistent with the management program. State agency notification under subsection (b) does not remove the requirement under subsection (a) for applicants to notify State agencies.

Subpart E—Consistency for Outer Continental Shelf (OCS) Exploration, Development and Production Activities

§ 930.70 Objectives.

The provisions of this subpart are intended to ensure that all federal license or permit activities described in detail in OCS plans and which affect any coastal use or resource are conducted in a manner consistent with approved management programs.

§ 930.71 Federal license or permit activity described in detail.

The term "federal license or permit activity described in detail" means any activity requiring a federal license or permit, as defined in § 930.51, which the Secretary of the Interior determines must be described in detail within an OCS plan.

§ 930.72 Person.

The term "person" means any individual, corporation, partnership, association, or other entity organized or existing under the laws of any State; the federal government; any State, regional, or local government; or any entity of such federal, State, regional or local government, who submits to the Secretary of the Interior, or designee following management program approval, an OCS plan which describes in

15 CFR Ch. IX (1-1-04 Edition)

detail federal license or permit activities.

§ 930.73 OCS plan.

(a) The term "OCS plan" means any plan for the exploration or development of, or production from, any area which has been leased under the Outer Continental Shelf Lands Act (43 U.S.C. 1331 *et seq.*), and the regulations under that Act, which is submitted to the Secretary of the Interior or designee following management program approval and which describes in detail federal license or permit activities.

(b) The requirements of this subpart do not apply to federal license or permit applications filed after management program approval for activities described in detail in OCS plans approved by the Secretary of the Interior or designee prior to management program approval.

§ 930.74 OCS activities subject to State agency review.

Except for States which do not anticipate coastal effects resulting from OCS activities, management program lists required pursuant to § 930.53 shall include a reference to OCS plans which describe in detail federal license or permit activities affecting any coastal use or resource.

§ 930.75 State agency assistance to persons.

As a preliminary matter, any person intending to submit to the Secretary of the Interior an OCS plan which describes in detail federal license or permit activities affecting any coastal use or resource should obtain the views and assistance of the State agency regarding the means for ensuring that such activities will be conducted in a manner consistent with the management program. As part of its assistance efforts, the State agency shall make available for inspection copies of the management program document. Upon request by such persons, the State agency shall identify any enforceable policies applicable to the proposed activities, based upon the information submitted to the State agency.
