

§ 24.1 Deception (general).

It is unfair or deceptive to misrepresent, directly or by implication, the kind, grade, quality, quantity, material content, thickness, finish, serviceability, durability, price, origin, size, weight, ease of cleaning, construction, manufacture, processing, distribution, or any other material aspect of an industry product.

§ 24.2 Deception as to composition.

It is unfair or deceptive to misrepresent, directly or by implication, the composition of any industry product or part thereof. It is unfair or deceptive to use the unqualified term “leather” or other unqualified terms suggestive of leather to describe industry products unless the industry product so described is composed in all substantial parts of leather.¹ This section includes, but is not limited to, the following:

(a) *Imitation or simulated leather.* If all or part of an industry product is made of non-leather material that appears to be leather, the fact that the material is not leather, or the general nature of the material as something other than leather, should be disclosed. For example: Not leather; Imitation leather; Simulated leather; Vinyl; Vinyl coated fabric; or Plastic.

(b) *Embossed or processed leather.* The kind and type of leather from which an industry product is made should be disclosed when all or part of the product has been embossed, dyed, or otherwise processed so as to simulate the appearance of a different kind or type of leather. For example:

(1) An industry product made wholly of top grain cowhide that has been processed so as to imitate pigskin may be represented as being made of Top Grain Cowhide.

(2) Any additional representation concerning the simulated appearance

of an industry product composed of leather should be immediately accompanied by a disclosure of the kind and type of leather in the product. For example: Top Grain Cowhide With Simulated Pigskin Grain.

(c) *Backing material.* (1) The backing of any material in an industry product with another kind of material should be disclosed when the backing is not apparent upon casual inspection of the product, or when a representation is made which, absent such disclosure, would be misleading as to the product’s composition. For example: Top Grain Cowhide Backed With Vinyl.

(2) The composition of the different backing material should be disclosed if it is visible and consists of non-leather material with the appearance of leather, or leather processed so as to simulate a different kind of leather.

(d) *Misuse of trade names, etc.* A trade name, coined name, trademark, or other word or term, or any depiction or device should not be used if it misrepresents, directly or by implication, that an industry product is made in whole or in part from animal skin or hide, or that material in an industry product is leather or other material. This includes, among other practices, the use of a stamp, tag, label, card, or other device in the shape of a tanned hide or skin or in the shape of a silhouette of an animal, in connection with any industry product that has the appearance of leather but that is not made wholly or in substantial part from animal skin or hide.

(e) *Misrepresentation that product is wholly of a particular composition.* A misrepresentation should not be made, directly or by implication, that an industry product is made wholly of a particular composition. A representation as to the composition of a particular part of a product should clearly indicate the part to which the representation applies.² Where a product is made principally of leather but has certain

¹For purposes of these Guides, footwear is composed of three parts: the upper, the lining and sock, and the outersole. These three parts are defined as follows: (1) The upper is the outer face of the structural element which is attached to the outersole; (2) the lining and sock are the lining of the upper and the insole, constituting the inside of the footwear article; and (3) the outersole is the bottom part of the footwear article subjected to abrasive wear and attached to the upper.

²With regard to footwear, it is sufficient to disclose the presence of non-leather materials in the upper, the lining and sock, or the outersole, provided that the disclosure is made according to predominance of materials. For example, if the majority of the upper is composed of manmade material: Upper of manmade materials and leather.
