

KANSAS

§ 117.411 Missouri River.

(a) The draws of the bridges across the Missouri River from the mouth to Sioux City, Iowa, shall open on signal; except during the winter season between the date of closure and date of opening of the commercial navigation season as published by the Army Corps of Engineers, the draw need not open unless at least 24 hours advance notice is given.

(b) The lift span of the A-S-B highway and railroad bridge, Mile 365.6, between Kansas City, Kansas, and Kansas City, Missouri, is operated from a remote location. Radiotelephone contact may be established with the remotely located bridge/train controller to request bridge openings. The bridge is also equipped with a directional microphone and horn to receive and deliver signals to vessels not equipped with a radiotelephone. Closed circuit TV cameras located at the bridge enable the remotely located bridge/train controller to view both river traffic and the bridge itself.

(1) When an approaching vessel requires a bridge opening, contact shall be established with the bridge/train controller by radiotelephone or appropriate signals prescribed in §117.15.

(2) The bridge/train controller will confirm by radiotelephone or sound signal that the bridge will open promptly.

(3) When rail traffic is on bridge, the bridge/train controller will inform the vessel that bridge cannot be opened and will also give an approximate time of bridge opening via radiotelephone. The bridge/train controller will indicate via sound signals that lift span cannot be opened if the vessel doesn't have a radiotelephone, or if radiotelephone is not used.

(4) When the bridge is clear of rail traffic, the bridge/train controller will advise the waiting vessel by radiotelephone or sound signal of the intended opening. The lift span will be raised to its full height, and the midchannel bridge lights will change from red to green.

(5) The bridge/train controller will monitor the vessel's passage via closed

circuit TV and radiotelephone until it has cleared the bridge.

(6) When the vessel has cleared the draw, midchannel bridge navigation lights will change from green to red and the lift span will be lowered to the closed-to-navigation position.

KENTUCKY

§ 117.415 Green River.

(a) The draw of the CSX Transportation railroad bridge, Mile 8.3 at Spottsville, shall open on signal when there is 40 feet or less of vertical clearance beneath the draw. When vertical clearance is more than 40 feet, at least four hours notice shall be given. The owners of, or agencies controlling, the bridge shall arrange for ready telephone communication with the authorized representative at any time from the bridge or its immediate vicinity.

(b) The draw of the CSX Transportation Railroad bridge, Mile 79.6 at Small-house, is normally maintained in the fully open position and a vessel may pass through the draw without further signals. When the draw is in the closed position, it shall open on signal when there is 40 feet or less of vertical clearance. When the vertical clearance is more than 40 feet, at least four hours notice shall be given. During this period, if the drawtender is informed at the time the vessel passes through the draw that the vessel will return within four hours, the drawtender shall remain on duty until the vessel returns but is not required to remain for longer than four hours. The owners of, or agencies controlling, the bridge shall arrange for ready telephone communication with the authorized representative at any time from the bridge or its immediate vicinity.

(c) The bascule span of the Paducah and Louisville Railroad Bridge, Mile 94.8 at Rockport, is maintained in the closed position and is remotely operated. Bridge clearance in the closed position is 41.3 feet at pool stage. Vessels requiring more clearance for passage must contact the remote bridge operator by radio telephone to request

opening. The bridge operator will confirm by radiotelephone whether the bridge can be opened safely and promptly. If rail traffic is on or approaching the bridge, the bridge operator will advise the vessel that the bridge cannot be opened, and provide an approximate time when the bridge can be opened safely. Continuous radio contact between the bridge operator and the vessel shall be maintained until the vessel has transited and cleared the bridge.
