

MISSOURI

§ 117.687 Missouri River.

(a) The draws of the bridges across the Missouri River from the mouth to St. Joseph shall open on signal; except during the winter season between the date of closure and date of opening of the commercial navigation season as published by the Army Corps of Engineers, the draw need not open unless at least 24 hours advance notice is given.

(b) The lift span of the A-S-B highway and railway bridge, Mile 365.6, between Kansas City, Kansas, and Kansas City, Missouri, is operated from a remote location. Radiotelephone contact may be established with the remotely located bridge/train controller to request bridge openings. The bridge is also equipped with a directional microphone and horn to receive and deliver signals to vessels not equipped with a radiotelephone. Closed circuit TV cameras located at the bridge enable the remotely located bridge/train controller to view both river traffic and the bridge itself.

(1) When an approaching vessel requires a bridge opening, contact shall be established with the bridge/train controller by radiotelephone or appropriate signals prescribed in § 117.15.

(2) The bridge/train controller will confirm by radiotelephone or sound signal that the bridge will open promptly.

(3) When rail traffic is on bridge, the bridge/train controller will inform the vessel that bridge cannot be opened and will also give an approximate time of bridge opening via radiotelephone. The bridge/train controller will indicate via sound signals that lift span cannot be opened if the vessel doesn't have a radiotelephone, or if radiotelephone is not used.

(4) When the bridge is clear of rail traffic, the bridge/train controller will advise the waiting vessel by radiotelephone or sound signal of the intended opening. The lift span will be raised to its full height, and the midchannel bridge lights will change from red to green.

(5) The bridge/train controller will monitor the vessel's passage via closed circuit TV and radiotelephone until it has cleared the bridge.

(6) When the vessel has cleared the draw, midchannel bridge navigation lights will change from green to red and the lift span will be lowered to the closed-to-navigation position.

NEW HAMPSHIRE

§ 117.697 Hampton River.

The SR1A bridge, mile 0.0 at Hampton, operates as follows:

(a) The draw shall open on signal from April 1 through October 31 for the passage of vessels during daylight hours from three hours before to three hours after each high tide. "Daylight hours" means one-half hour before sunrise to one-half hour after sunset. High tide occurs one-half hour later than the time of high tide for Portland, Maine, as published in the tide tables published by private entities using data provided by the National Ocean Service. At all other times, the draw shall open on signal if at least three hours notice is given.

(b) The owners of the bridge shall provide and keep in good legible condition two board gages painted white with black figures not less than six inches high to indicate the vertical clearance under the closed draw at all stages of the tide. The gages shall be so placed on the bridge that they are plainly visible to operators of vessels

§ 117.699

approaching the bridge either up or downstream.

(c) Vessels which can pass under the closed draw with a clearance of one foot or more shall not signal for the opening of the draw. In case a vessel gives the prescribed signal and the drawtender is uncertain as to whether the vessel can safely pass, the drawtender shall open the draw. If the drawtender finds that there would have been a clearance of one foot or more had the draw remained closed, the matter shall be reported immediately to the District Commander, giving the name of the vessel, the time of opening the draw, the clearance under the bridge as indicated by the gage at the time of opening the draw, and the approximate vertical clearance required by the vessel.
