

(vi) Proximity to the 100-year floodplain;

(vii) Panel and date of the applicable Flood Insurance Rate Map, if any;

(viii) The elevation of the first habitable floor and an estimate of the depth of flooding in the structure;

(ix) The estimated pre-event fair market value of the home. Applicants will estimate the value of properties using the best available information, such as inspections, public records and market values of similar properties in similar neighborhoods to arrive at a pre-event fair market value that reflects what a willing buyer would have paid a willing seller had the disaster not occurred. If tax assessment data are used as the basis, the applicant should add the relevant adjustment percentage for that jurisdiction to adjust the tax assessment to the current fair market value. These adjustment data should be obtained from the jurisdiction's tax assessor's office. For any jurisdictions where the adjustment factor is over 25 percent, applicants should include a justification for the high adjustment factor. Applicants should not include any other project costs in the property values. These costs will be reflected elsewhere;

(x) Indication whether flood insurance was in force at the time of the loss, and policy number, if available.

(xi) Indications that the property will meet the definition of uninhabitable:

(A) Substantial damage determination, and name and title of determining official, or if not yet determined then:

(1) For manufactured homes (mobile homes), inundation of 1 foot or more of water above the first habitable floor or other evidence of substantial damage; or

(2) For permanent structures other than manufactured homes, inundation of 5 feet or more of water above the first above-ground habitable floor or other evidence of substantial damage. Habitable floors do not include basements.

(B) Were red- or yellow-tagged and declared uninhabitable due to environmental contamination by floodwaters, or otherwise determined to be uninhabitable by a State or local official under current codes or ordinances; or

(C) Were demolished due to damage or environmental contamination by floodwaters.

(xii) Information regarding whether the structure is on the NFIP repetitive loss list (provide NFIP Repetitive Loss Property Locator Number, if available); and

(xiii) Observations on whether acquisition or elevation of the structure may result in a mixture of vacant lots and lots with structures remaining on them; and

(10) *FEMA review and approval.* We will review and verify the State's eligibility determination and either approve, deny, or request additional information within 60 days. The Regional Director may extend this timeframe if complicated issues arise. We have final approval authority for funding of all projects.

(Approved under OMB control number 3067-0279).

§ 209.9 Appeals.

The State may appeal any decision that we make regarding projects submitted for funding in the Supplemental Property Acquisition and Elevation Assistance program. The State must submit the appeal in writing to the Regional Director and must include documentation that justifies the request for reconsideration. The appeal must specify the monetary figure in dispute and the provisions in Federal law, regulation, or policy with which the appellant believes the initial action was inconsistent. The applicant must appeal within 60 days of the applicant's receipt of our funding decision. The State must forward any appeal from an applicant or subgrantee with a written recommendation to the Regional Director within 60 days of receipt. Within 90 days following the receipt of an appeal, the Regional Director will notify the State in writing as to the new decision or the need for more information.

§ 209.10 Project implementation requirements.

Subgrantees must enter into an agreement with the State, with the written concurrence of the Regional
