(b) Causing, with respect to a specific covered product, the output of content from such product in a format as necessary to match the display format of another device connected to such product, including but not limited to providing for content conversion between widely-used formats for the transport, processing and display of audiovisual signals or data, such as between analog and digital formats and between PAL and NTSC or RGB and Y,Pb,Pr.

§76.1909 Redistribution control of unencrypted digital terrestrial broadcast content.

(a) For the purposes of this section, the terms unencrypted digital terrestrial broadcast content, EIT, PMT, broadcast flag, covered demodulator product, and marked content shall have the same meaning as set forth in §73.9000 of this chapter.

(b) *Encrypted retransmission.* Where a multichannel video programming distributor retransmits unencrypted digital terrestrial broadcast content in encrypted form, such distributor shall, upon demodulation of the 8-VSB, 16-VSB, 64-QAM or 256-QAM signal, inspect either the EIT or PMT for the broadcast flag, and if the broadcast flag is present:

(1) Securely and robustly convey that information to the consumer product used to decrypt the distributor's signal information, and

(2) Require that such consumer product, following such decryption, protect the content of such signal as if it were a covered demodulator product receiving marked content.

(c) *Unencrypted retransmission.* Where a multichannel video programming distributor retransmits unencrypted digital terrestrial broadcast content in unencrypted form, such distributor shall, upon demodulation:

(1) Preserve the broadcast flag, if present, in both the EIT and PMT; and

(2) Use 8-VSB, 16-VSB, 64-QAM, or 256-QAM signal modulation for the retransmission.

(d) *Unmarked content.* Where a multichannel video programming distributor retransmits unencrypted digital terres-

trial broadcast content that is not marked with the broadcast flag, the multichannel video programming distributor shall not encode such content to restrict its redistribution.

Subpart A—General

§ 78.1 Purpose.

The rules and regulations set forth in this part provide for the licensing and operation of fixed or mobile cable television relay service stations (CARS) used for the transmission of television and related audio signals, signals of standard and FM broadcast stations, signals of instructional television fixed stations, and cablecasting from the point of reception to a terminal point from which the signals are distributed to the public by cable. In addition CARS stations may be used to transmit television and related audio signals to TV translator and low power TV stations.
