

## Railroad Retirement Board

## § 228.17

of title 20 (dealing with the entitlement to more than one child's benefit), be entitled to a child's annuity on the basis of the compensation of one or more other insured individuals, the total benefits payable may not be reduced to less than the smaller of—

(i) The sum of the maximum amounts of benefits payable on the basis of the compensation of all such insured individuals, or

(ii) The last figure in column V of the applicable table published each year by the Secretary of Health and Human Services. The "applicable table" refers to the table which is effective for the month the benefit is payable.

(2) *The employee attains age 62, has a period of disability or dies in 1979.* The maximum is computed as follows:

(i) 150 percent of the first \$230 of the individual's primary insurance amount, plus

(ii) 272 percent of the primary insurance amount over \$230 but not over \$332, plus

(iii) 134 percent of the primary insurance amount over \$332 but not over \$433, plus

(iv) 175 percent of the primary insurance amount over \$433.

If the total of this computation is not a multiple of \$0.10, it will be rounded to the next lower multiple of \$0.10.

(3) *The employee attains age 62, or has a period of disability or dies after 1979.* The maximum is computed as in paragraph (b)(2) of this section. However, the dollar amounts shown there will be updated each year after 1979 as average earnings rise. This updating is done by first dividing the average of the total wages for the second year before the individual dies or becomes eligible, by the average of the total wages for 1977. The result of that computation is then multiplied by each dollar amount in the formula in paragraph (b)(2) of this section. Each updated dollar amount will be rounded to the nearer dollar, if the amount is an exact multiple of \$0.50 (but not of \$1), it will be rounded to the next higher \$1. Before November 2 of each calendar year after 1978, the Secretary of Health and Human Services will publish in the FEDERAL REGISTER the formula and updated dollar amounts to be used for determining the

monthly maximum for the following year.

(c) *Special minimum PIA.* Regardless of the method used to compute the primary insurance amount, if the special minimum primary insurance amount described in §404.261 to this title is higher, then the family maximum will be based upon the special minimum primary insurance amount.

### § 228.15 Reduction for age.

(a) *Widow(er), surviving divorced spouse, or remarried widow(er).* The tier I annuity component is reduced 19/40 of 1 percent multiplied by the number of months before the annuitant attains full retirement age (presently age 65) effective with the annuity beginning date for widow(ers) born before 1/2/40. (For widow(ers) born after 1/1/40, see section 216(l) of the Social Security Act.)

(b) *Disabled widow(er), disabled surviving divorced spouse, or disabled remarried widow(er).* The tier I annuity component is reduced for a maximum of 60 months even though the annuity may begin at age 50.

### § 228.16 Adjustments in the age reduction factor (ARF).

Upon the attainment of retirement age, the previously-computed age reduction factor is adjusted to remove those months for which a full annuity was not paid even though the individual was entitled.

### § 228.17 Adjustments to the widow(er)'s, disabled widow(er)'s, surviving divorced spouse's, and remarried widow(er)'s tier I annuity amount.

(a) If the employee died before attaining age 62 and after 1978 and the widow(er), disabled widow(er), remarried widow(er), or surviving divorced spouse is first eligible after 1984, the Board will compute the tier I annuity amount as if the employee had not died but had reached age 62 in the second year after the indexing year (see §225.2 of this chapter); *provided, however*, that if the employee was entitled to a primary insurance amount based on average monthly wages this section is not applicable. The indexing year is never earlier than the second year before the
