

§ 30.213 How does a claimant establish that the cancer was at least as likely as not related to the employment at the DOE facility or the atomic weapons employer facility?

HHS, with the advice of the Advisory Board on Radiation and Worker Health, has issued guidelines for making the determination whether cancer was at least as likely as not related to the employment at the DOE facility or the atomic weapons employer facility at 42 CFR part 81. Claimants should consult those guidelines for information regarding the type of evidence that will be considered by OWCP, in addition to the employee's radiation dose reconstruction that will be provided by HHS, in making this determination.

§ 30.214 How does a claimant establish that the employee is a member of the Special Exposure Cohort?

(a) For purposes of establishing eligibility as a member of the Special Exposure Cohort (SEC) under § 30.210(a), the employee must have been a DOE employee, a DOE contractor employee, or an atomic weapons employee who meets any of the following requirements:

(1) The employee was so employed for a number of workdays aggregating at least 250 workdays before February 1, 1992, at a gaseous diffusion plant located in Paducah, Kentucky; Portsmouth, Ohio; or Oak Ridge, Tennessee; and during such employment:

(i) Was monitored through the use of dosimetry badges for exposure at the plant of the external parts of the employee's body to radiation; or

(ii) Worked in a job that had exposures comparable to a job that is or was monitored through the use of dosimetry badges.

(2) The employee was so employed before January 1, 1974, by DOE or a DOE contractor or subcontractor on Amchitka Island, Alaska, and was exposed to ionizing radiation in the performance of duty related to the Long Shot, Milrow, or Cannikin underground nuclear tests.

(3) The employee is a member of a group or class of employees subsequently designated as additional members of the SEC by HHS.

(b) For purposes of satisfying the 250 workday requirement of paragraph (a)(1) of this section, the claimant may aggregate the days of service at more than one gaseous diffusion plant.

(c) Proof of employment by the DOE or a DOE contractor, or an atomic weapons employer, for the requisite time periods set forth in paragraph (a) of this section, may be made by the submission of any trustworthy records that, on their face or in conjunction with other such records, establish that the employee was so employed and the time period(s) of such employment. If the evidence shows that exposure occurred while the employee was employed by an employer that would have to be designated by DOE as an atomic weapons employer under section 7384l(4) of the Act to be a covered employer, and that the employer has not been so designated, OWCP will deny the claim on the ground that the employer is not a covered atomic weapons employer.

(d) Records from the following sources may be considered as evidence for purposes of establishing employment or presence at a covered facility:

(1) Records or documents created by any Federal government agency (including verified information submitted for security clearance), any tribal government, or any State, county, city or local government office, agency, department, board or other entity, or other public agency or office.

(2) Records or documents created as a byproduct of any regularly conducted business activity or by an entity that acted as a contractor or subcontractor to the DOE.

§ 30.215 How does a claimant establish that the employee has been diagnosed with cancer or has sustained a consequential injury, illness or disease?

(a) Evidence that the employee contracted a specified cancer (in the case of SEC members) or other cancer should include a written medical document that contains an explicit statement of diagnosis and the date on which that diagnosis was first made.

(b) An injury, illness, impairment or disability sustained as a consequence of a diagnosed cancer covered by the provisions of § 30.210(a) and (b) must be
