

made to the same type of range (i.e., city or highway).⁶

(c) Fuel economy estimates derived from a non-EPA test may be disclosed provided that:

(1) The advertisement also discloses the “estimated city mpg” and/or the “estimated highway mpg,” as required by §259.2(a), and the disclosure required by §259.2(a), and gives the “estimated city mpg” and/or the “estimated highway mpg” figure(s) substantially more prominence than any other estimate;⁷ provided, however, for radio and television advertisements in which any other estimate is used only in the audio, equal prominence must be given the “estimated city mpg” and/or the “estimated highway mpg” figure(s);⁸

⁶For example, an advertisement could not state that “according to EPA estimates new automobiles in this class get as little as X mpg (citing a figure from the city range) while EPA estimates that this automobile gets X + mpg (citing the EPA highway estimates or a number from the EPA estimated in-use fuel economy highway range for the automobile).

⁷The Commission will regard the following as constituting “substantially more prominence:”

For television only: If the estimated city and/or highway mpg and any other mileage estimate(s) appear only in the visual portion, the estimated city and/or highway mpg must appear in numbers twice as large as those used for any other estimate, and must remain on the screen at least as long as any other estimate. If the estimated city and highway mpg appear in the audio portion, visual broadcast of any other estimate must be accompanied by the simultaneous, at least equally prominent, visual broadcast of the estimated city and/or highway mpg. Each visual estimated city and highway mpg must be broadcast against a solid color background that contrasts easily with the color used for the numbers when viewed on both color and black and white television.

For print only: The estimated city and/or highway mpg must appear in clearly legible type at least twice as large as that used for any other estimate. Alternatively, if the estimated city and highway mpg appear in type of the same size as such other estimate, they must be clearly legible and conspicuously circled. The estimated city and highway mpg must appear against a solid color, contrasting background. They may not appear in a footnote unless all references to fuel economy appear in a footnote.

⁸The Commission will regard the following as constituting equal prominence. For radio

(2) The source of the non-EPA test is clearly and conspicuously identified;

(3) The driving conditions and variables simulated by the test which differ from those used to measure the “estimated city mpg” and/or the “estimated highway mpg,” and which result in a change in fuel economy, are clearly and conspicuously disclosed.⁹ Such conditions and variables may include, but are not limited to, road or dynamometer test, average speed, range of speed, hot or cold start, and temperature; and

(4) The advertisement clearly and conspicuously discloses any distinctions in “vehicle configuration” and other equipment affecting mileage performance (e.g., design or equipment differences which distinguish sub-configurations as defined by EPA) between the automobiles tested in the non-EPA test and the EPA tests.

PART 260—GUIDES FOR THE USE OF ENVIRONMENTAL MARKETING CLAIMS

Sec.

260.1 Statement of purpose.

260.2 Scope of guides.

260.3 Structure of the guides.

260.4 Review procedure.

260.5 Interpretation and substantiation of environmental marketing claims.

260.6 General principles.

260.7 Environmental marketing claims.

260.8 Environmental assessment.

and television when any other estimate is used in the audio: The estimated city and/or highway mpg must be stated, either before or after each disclosure of such other estimate at least as audibly as such other estimate.

⁹For dynamometer tests any difference between the EPA and non-EPA tests must be disclosed. For in-use tests, the Commission realizes that it is impossible to duplicate the EPA test conditions, and that in-use tests may be designed to simulate a particular driving situation. It must be clear from the context of the advertisement what driving situation is being simulated (e.g., cold weather driving, highway driving, heavy load conditions). Furthermore, any driving or vehicle condition must be disclosed if it is significantly different from that which an appreciable number of consumers (whose driving condition is being simulated) would expect to encounter.

Federal Trade Commission

§ 260.5

AUTHORITY: 15 U.S.C. 41-58.

SOURCE: 61 FR 53316, Oct. 11, 1996, unless otherwise noted.

§ 260.1 Statement of purpose.

The guides in this part represent administrative interpretations of laws administered by the Federal Trade Commission for the guidance of the public in conducting its affairs in conformity with legal requirements. These guides specifically address the application of Section 5 of the FTC Act to environmental advertising and marketing practices. They provide the basis for voluntary compliance with such laws by members of industry. Conduct inconsistent with the positions articulated in these guides may result in corrective action by the Commission under Section 5 if, after investigation, the Commission has reason to believe that the behavior falls within the scope of conduct declared unlawful by the statute.

§ 260.2 Scope of guides.

(a) These guides apply to environmental claims included in labeling, advertising, promotional materials and all other forms of marketing, whether asserted directly or by implication, through words, symbols, emblems, logos, depictions, product brand names, or through any other means, including marketing through digital or electronic means, such as the Internet or electronic mail. The guides apply to any claim about the environmental attributes of a product, package or service in connection with the sale, offering for sale, or marketing of such product, package or service for personal, family or household use, or for commercial, institutional or industrial use.

(b) Because the guides are not legislative rules under Section 18 of the FTC Act, they are not themselves enforceable regulations, nor do they have the force and effect of law. The guides themselves do not preempt regulation of other federal agencies or of state and local bodies governing the use of environmental marketing claims. Compliance with federal, state or local law and regulations concerning such claims, however, will not necessarily

preclude Commission law enforcement action under Section 5.

[63 FR 24248, May 1, 1998]

§ 260.3 Structure of the guides.

The guides are composed of general principles and specific guidance on the use of environmental claims. These general principles and specific guidance are followed by examples that generally address a single deception concern. A given claim may raise issues that are addressed under more than one example and in more than one section of the guides. In many of the examples, one or more options are presented for qualifying a claim. These options are intended to provide a "safe harbor" for marketers who want certainty about how to make environmental claims. They do not represent the only permissible approaches to qualifying a claim. The examples do not illustrate all possible acceptable claims or disclosures that would be permissible under Section 5. In addition, some of the illustrative disclosures may be appropriate for use on labels but not in print or broadcast advertisements and vice versa. In some instances, the guides indicate within the example in what context or contexts a particular type of disclosure should be considered.

§ 260.4 Review procedure.

The Commission will review the guides as part of its general program of reviewing all industry guides on an ongoing basis. Parties may petition the Commission to alter or amend these guides in light of substantial new evidence regarding consumer interpretation of a claim or regarding substantiation of a claim. Following review of such a petition, the Commission will take such action as it deems appropriate.

§ 260.5 Interpretation and substantiation of environmental marketing claims.

Section 5 of the FTC Act makes unlawful deceptive acts and practices in or affecting commerce. The Commission's criteria for determining whether an express or implied claim has been
