

To encourage Americans to learn more about the dangers of accidental poisonings and to take appropriate preventive measures, the Congress, by joint resolution approved September 26, 1961, as amended (75 Stat. 681), has authorized and requested the President to issue a proclamation designating the third week of March each year as “National Poison Prevention Week.”

NOW, THEREFORE, I, GEORGE W. BUSH, President of the United States of America, do hereby proclaim March 21 through March 27, 2004, as National Poison Prevention Week. I call upon all Americans to observe this week by participating in appropriate activities and by learning how to prevent poisonings among children.

IN WITNESS WHEREOF, I have hereunto set my hand this nineteenth day of March, in the year of our Lord two thousand four, and of the Independence of the United States of America the two hundred and twenty-eighth.

GEORGE W. BUSH

Proclamation 7764 of March 25, 2004

Greek Independence Day: A National Day of Celebration of Greek and American Democracy, 2004

*By the President of the United States of America
A Proclamation*

The love of liberty that helped shape our Constitution has deep roots in the spirit of ancient Greece. As we observe Greek Independence Day, we celebrate the timeless democratic principles that all freedom-loving people cherish.

To continue to strengthen and spread liberty around the world, the values and traditions of democracy must be passed on to each new generation. In 1821, our Nation supported the cause of Greek independence when the brave men and women of Greece began their long struggle for liberty. This struggle continued through the end of World War II. On the anniversary of the Greek Declaration of Independence, we honor the courage of these proud patriots and celebrate our nations’ shared commitment to democracy.

Today, Greece and America are strong allies and strategic partners in the great struggles for liberty and the global war on terror. We are working together to bring a fair and lasting settlement to Cyprus. We look forward to a future of continued friendship and collaboration between our two great nations as we advance peace and democracy in the world.

In celebrating Greek Independence Day, we are also grateful for the many ways Greek Americans have enriched our communities and strengthened our country.

NOW, THEREFORE, I, GEORGE W. BUSH, President of the United States of America, by virtue of the authority vested in me by the Constitution and laws of the United States, do hereby proclaim March 25, 2004, as Greek Independence Day: A National Day of Celebration of Greek and American

Proc. 7765

Title 3—The President

Democracy. I call upon all Americans to observe this day with appropriate ceremonies and activities.

IN WITNESS WHEREOF, I have hereunto set my hand this twenty-fifth day of March, in the year of our Lord two thousand four, and of the Independence of the United States of America the two hundred and twenty-eighth.

GEORGE W. BUSH

Proclamation 7765 of April 2, 2004

Cancer Control Month, 2004

*By the President of the United States of America
A Proclamation*

We have made dramatic progress in our fight against cancer, yet this disease continues to be the second-leading cause of death in the United States. Cancer Control Month provides the opportunity for Americans to learn vital information about cancer prevention, detection, and treatment.

Medical science is helping cancer victims live healthier, longer lives. Survival rates are rising, and today our country has more than 9 million cancer survivors. However, much work remains to be done. Researchers estimate that more than 1.3 million people in the United States will be diagnosed with cancer this year, and more than 800,000 will die from the disease.

A good diet, regular exercise, and healthy choices help people reduce their risk of developing many chronic diseases, including cancer. Research suggests that being overweight or obese accounts for 14 percent of cancer deaths among men and 20 percent among women.

Regular check-ups are also important in the fight against cancer. Preventive health screenings can detect many forms of cancer at earlier, less dangerous stages, allowing doctors to stop cancer before it spreads. I encourage all Americans to talk to their doctors about preventive screenings and regular check-ups.

As we observe Cancer Control Month, I commend cancer survivors for their courage and determination. I applaud medical professionals, researchers, family members, and friends for their efforts to improve the lives of those suffering from cancer and for their work in finding a cure for this devastating disease. I encourage all Americans to learn more about cancer. By working together, we can save lives and win the fight against cancer.

In 1938, the Congress of the United States passed a joint resolution (52 Stat. 148; 36 U.S.C. 103) as amended, requesting the President to issue an annual proclamation declaring April as “Cancer Control Month.”

NOW, THEREFORE, I, GEORGE W. BUSH, President of the United States of America, do hereby proclaim April 2004 as Cancer Control Month. I encourage citizens, government agencies, private businesses, nonprofit organizations, and other interested groups to join in activities that will increase awareness of what Americans can do to prevent and control cancer.
