

share payments or other benefits for the same practice on same land under any other conservation program administered by USDA.

(11) Before NRCS will approve and issue any cost-share or incentive payment, the participant must certify that the conservation practice has been completed in accordance with the contract, and NRCS or other approved Technical Service Provider certifies that the practice has been carried out in accordance with the conservation practice standards of the applicable NRCS field office technical guide.

(12) The provisions of 7 CFR 1412.505 except that refunds will be determined by the State Conservationist.

§ 1466.25 Contract modifications and transfers of land.

(a) The participant and NRCS may modify a contract if the participant and NRCS agree to the contract modification and the EQIP plan of operations is revised in accordance with NRCS requirements and is approved by the Designated Conservationist.

(b) The participant and NRCS may agree to transfer a contract to another producer. The transferee must be determined by NRCS to be eligible to participate in EQIP and must assume full responsibility under the contract, including operation and maintenance of those conservation practices already installed and to be installed as a condition of the contract.

(c) NRCS may require a participant to refund all or a portion of any financial assistance earned under EQIP if the participant sells or loses control of the land under an EQIP contract and the new owner or controller is not eligible to participate in the program or refuses to assume responsibility under the contract.

§ 1466.26 Contract violations and termination.

(a)(1) If NRCS determines that a participant is in violation of the terms of a contract or documents incorporated by reference into the contract, NRCS shall give the participant a reasonable time, as determined by NRCS, to correct the violation and comply with the terms of the contract and attachments thereto. If a participant continues in

violation, NRCS may terminate the EQIP contract.

(2) Notwithstanding the provisions of paragraph (a)(1) of this section, a contract termination shall be effective immediately upon a determination by NRCS that the participant has submitted false information or filed a false claim, or engaged in any act, scheme, or device for which a finding of ineligibility for payments is permitted under the provisions of § 1466.35, or in a case in which the actions of the party involved are deemed to be sufficiently purposeful or negligent to warrant a termination without delay.

(b)(1) If NRCS terminates a contract, the participant will forfeit all rights for future payments under the contract and shall refund all or part of the payments received, plus interest determined in accordance with 7 CFR part 1403. NRCS may exercise the option of requiring only partial refund of the payments received if a previously installed conservation practice can function independently, is not adversely affected by the violation or the absence of other conservation practices that would have been installed under the contract, and the participant agrees to operate and maintain the installed conservation practice for the lifespan of the practice.

(2) If NRCS terminates a contract due to breach of contract or the participant voluntarily terminates the contract, the participant will forfeit all rights for further payments under the contract and shall pay such liquidated damages as are prescribed in the contract. NRCS will have the option to waive the liquidated damages, depending upon the circumstances of the case.

(3) When making contract termination decisions, NRCS may reduce the amount of money owed by the participant by a proportion that reflects the good faith effort of the participant to comply with the contract or the hardships beyond the participant's control that have prevented compliance with the contract.

(4) The participant may voluntarily terminate a contract if NRCS determines that termination is in the public interest.

§ 1466.27

7 CFR Ch. XIV (1–1–05 Edition)

(5) In carrying out its role in this section, NRCS may consult with the local conservation district.

§ 1466.27 Conservation Innovation Grants (CIG).

(a) *Definitions.* In addition to the terms defined in §1466.3 of this part, the following definitions shall be applicable to this section:

(1) *EQIP eligible* means any farming entity, land, and practice that meets the definitions of EQIP as defined in 7 CFR 1466.

(2) *Grant agreement* means a document describing a relationship between NRCS and a State or local government, or other recipient whenever the principal purpose of the relationship is the transfer of a thing of value to a recipient in order to accomplish a public purpose of support or stimulation authorized by Federal law, and substantial Federal involvement is not anticipated.

(3) *Grant Review Board* consists of the NRCS Deputy Chief for Programs, Deputy Chief for Science and Technology, Deputy Chief for Soil Survey and Resource Assessment, one Regional Assistant Chief, and one State Conservationist. The Review Board makes recommendations for grant awards to the Chief.

(4) *Peer Review Panel* means a panel consisting of Federal and non-Federal technical advisors who possess expertise in a discipline or disciplines deemed important to provide a technical evaluation of project proposals submitted under this notice.

(5) *Project* means the activities as defined within the scope of the grant agreement.

(6) *Project Director* means the individual responsible for the technical direction and management of the project as designated in the application.

(b) *Purpose and scope.* (1) *Purpose.* The purpose of CIG is to stimulate the development and adoption of innovative conservation approaches and technologies while leveraging Federal investment in environmental enhancement and protection, in conjunction with agricultural production. Notwithstanding any limitation of this part, NRCS will administer CIG in accordance with this section. Unless other-

wise provided for in this section, the provisions of 7 CFR 3015 and related Departmental regulations will be used to administer grants under CIG.

(2) *Geographic scope.* Applications for CIG are accepted from the fifty States, the District of Columbia, the Commonwealth of Puerto Rico, Guam, the Virgin Islands of the United States, American Samoa, and the Commonwealth of the Northern Mariana Islands.

(3) *Program scope.* Grants will be awarded using a two-tiered process. A nationwide grants competition will be announced in the FEDERAL REGISTER. In addition, at the Chief's discretion, each State Conservationist may implement a separate State-level component of CIG.

(4) *Program focus.* Applications for CIG should demonstrate the use of innovative approaches to leverage Federal investment in environmental enhancement and protection, in conjunction with agricultural production. CIG will fund projects that promote innovative on-the-ground conservation, including pilot projects and field demonstrations of promising approaches or technologies. CIG projects are expected to lead to the transfer of conservation technologies, management systems, and innovative approaches (such as market-based systems) into NRCS technical manuals and guides, or to the private sector. Technologies and approaches that are eligible for funding in the project's geographic area through EQIP are not eligible for CIG funding.

(5) *Innovative conservation projects or activities.* For the purposes of CIG, the proposed innovative project or activity must encompass the development and field testing, evaluation, and implementation of:

(i) Conservation adoption incentive systems, including market-based systems; or,

(ii) Promising conservation technologies, practices, systems, procedures, and approaches.

To be given priority consideration, the innovative project or activity:

(iii) Will have been studied sufficiently to indicate a good probability for success;

(iv) Demonstrates, tests, evaluates, or verifies environmental (soil, water,
