

## Rural Housing Service, USDA

## § 3575.24

economic feasibility is determined on the basis of the entire system or facility and not by considering the cost of separate extensions to, or parts thereof. Additionally, the borrower must publicly announce a plan for extending service to areas not initially receiving service. Also, the borrower must provide written notice to potential users located in the areas not to be initially served.

(3) The lender will determine that, when feasible and legally possible, inequities within the proposed project's service area for the same type service proposed (i.e., gas distribution system) will be remedied by the owner on, or before, completion of the project. Inequities are defined as unjustified variations in availability, adequacy, or quality of service. User rate schedules for portions of existing systems or facilities that were developed under different financing, rates, terms, or conditions do not necessarily constitute inequities.

### §§ 3575.21-3575.23 [Reserved]

(iii) Provide a certification by an engineer or architect that any construction performed complies fully with the plans and specifications, and
