

§ 981.59

§ 981.59 Adjustment upon increase of salable percentage.

(a) Upon any increase in the salable percentage and corresponding decrease in the reserve percentage, the reserve obligation of each handler for the entire crop year to the effective date of such action shall be computed in accordance with such revised salable and reserve percentages. From the reserve almonds that may have been withheld by him and not yet disposed of, any handler authorized to act and acting as agent of the Board in disposing of reserve pursuant to § 981.66 shall be permitted to select, under the supervision and direction of the Control Board, the particular reserve almonds to be restored to his salable percentage, and such restoration shall be deemed to fulfill the obligation of the Board with respect to such increase.

(b) In the case of handlers who have not been authorized to dispose of their own reserves, and handlers who have terminated their agencies to dispose of their own reserves, prior to an increase in the salable percentage, insofar as practicable each such handler shall be permitted to select almonds from his own reserve to be restored to his salable quantity. In the event there are not sufficient reserve almonds held by the Board at the time the salable percentage is increased, to make full restoration, as represented by the increase in the salable percentage, to all such handlers, the restoration to the salable quantities of the respective handlers shall be pro rata on the basis of certified kernel weight poundage of reserve contributed by said handlers during the crop year to the date of increase of the salable percentage: *Provided*, That restoration shall be made in a manner that will result, to the extent practicable, in a comparable percentage of reserve disposition for each such handler and that no handler shall receive almonds in excess of his contribution. Such restoration to the salable quantity shall be deemed to fulfill the obligation of the Board with respect to the increase in the salable percentage.

7 CFR Ch. IX (1-1-05 Edition)

§ 981.60 Determination of kernel weight.

(a) *Almonds for which settlement is made on kernel weight.* All lots of almonds, whether shelled or unshelled, for which settlement is made on the basis of kernel weight shall be included in the total kernel weight for any handler at the settlement weight.

(b) *Almonds for which settlement is made on unshelled weight.* The settlement weight for unshelled almonds shall be determined on the basis of representative samples of unshelled almonds reduced to shelled weight.

[35 FR 11372, July 16, 1970, as amended at 61 FR 32921, June 26, 1996]

§ 981.61 Redetermination of kernel weight.

The Board, on the basis of reports by handlers, shall redetermine the kernel weight of almonds received by each handler for his own account during each crop year through each of the following dates: December 31, March 31, and June 30. Such redetermined kernel weight for each handler shall be the basis for computing his reserve obligation for the crop year through such dates, except that adjustment shall be made for almonds on which the obligation has been assumed by another handler. The redetermined kernel weight of each handler's receipts, as of any date during the crop year, shall be his carryover as of that date plus the weight of almonds delivered or used in products minus the carryover at the beginning of the crop year, the weight on which another handler has assumed the obligations, and the weight delivered to exempt outlets. Weights used in such computations for various classifications of almonds shall be:

(a) For unshelled almonds, the kernel weight based on representative samples reduced to shelled weight;

(b) For shelled almonds, the net weight; and

(c) For shelled almonds used in production of almond products, the net weight of such almonds.

[41 FR 26853, June 30, 1976, as amended at 61 FR 32921, June 26, 1996]
