

account the desirability of safe location.

(B) Arrange with management, on a voluntary basis, to keep a group of key managers, engineers, and skilled workers familiar with the items planned for mobilization production.

(C) Determine the gaps which exist in government-owned packages of tools and production equipment needed to produce mobilization requirements in privately-owned plants. Within the limit of fund availability, plan the procurement of such tools and equipment with priority being given to long lead-time tools and equipment or those not used in general manufacturing. These tools and equipment, when procured, should be placed in the status provided by DMO-VII-4, as amended, taking into account the desirability of safe locations.

(D) Determine which government-owned tools and equipment have become obsolete, or which would not be used in event of mobilization, and plan for their disposal in accordance with the provisions of DMO-VII-4, as amended.

§321.4 Achieving production readiness.

(a) In order to achieve a capability for maximum production of "urgent" items during the initial phase of war, the following readiness measures shall be taken where advisable for facilities producing such items:

(1) Establishment of emergency production schedules.

(2) Development of a production capability which would function under widespread disruption and damage imposed by enemy attack, including, where necessary:

(i) Maintenance of an increased inventory of finished components and related production supplies at assembly plants, or arrangements for alternative supply lines where increased inventories are not feasible.

(ii) A capability to carry on urgent production without dependence on additional personnel, external sources of power, fuel, and water, or on long-distance communications; with spare replacements for highly vulnerable or unreliable parts of production equipment.

(iii) Protection of production facilities from enemy sabotage through adequate physical security measures.

(iv) Protection of personnel from widespread radiological fallout through provisions for decontamination and shelter.

§321.5 Retention of industrial facilities.

(a) Industrial properties, owned by the Department of Defense, the Department of Energy, and the Maritime Administration, shall be retained in the Industrial reserves (National Industrial Reserve, Departmental Industrial Reserve for the Department of Defense) of the department and agencies to the extent the capacity of said reserves is necessary for the production of defense or defense-supporting end items, materials or components in a mobilization period.

(b) Each idle plant in the reserves shall be reviewed annually by the heads of the respective agencies to determine if the capacity of the plant continues necessary for mobilization purposes.

(c) Upon the determination by the head of the agency that the capacity of a plant is excess to the mobilization requirements of the agency immediate steps will be taken to dispose of the plant through existing government channels for surplus disposal. The Federal Emergency Management Agency shall be informed by General Services Administration of each proposed surplus action prior to final determination.

§321.6 Participation of small business.

The agencies concerned with the order shall, in all of their programs for maintaining the mobilization base, be mindful of the national policy to protect the interests of small business, and to assure the maximum participation of small business in the mobilization base, including current procurement.

§321.7 [Reserved]

§321.8 Reports.

The Department of Defense, Department of Energy, and Maritime Administration shall furnish the Director of

the Federal Emergency Management Agency with reports on items and facilities for programs under §321.2 (a) and (b) of this part, and with such other periodic and special reports as he may require affecting the maintenance of the mobilization base.

PART 322 [RESERVED]

PART 323—GUIDANCE ON PRIORITY USE OF RESOURCES IN IMMEDIATE POST ATTACK PERIOD (DMO-4)

Sec.

323.1 Purpose.

323.2 General policy.

323.3 Responsibilities.

323.4 Priority activities in immediate post-attack period.

323.5 Assignment of resources.

APPENDIX 1 TO PART 323—LIST OF ESSENTIAL SURVIVAL ITEMS

AUTHORITY: National Security Act of 1947, as amended, 50 U.S.C. 404; Defense Production Act of 1950, as amended, 50 U.S.C. app. 2061 *et seq.*; Reorganization Plan No. 3 of 1978, 3 CFR, 1978 Comp., p. 329; E.O. 12148 of July 20, 1979, 44 FR 43239.

SOURCE: 45 FR 44579, July 1, 1980, unless otherwise noted.

§323.1 Purpose.

This part:

(a) States the policy of the Federal Government on use of resources in the period immediately following a nuclear attack on the United States;

(b) Provides general guidance for Federal, State, and local government officials on activities to be accorded priority in the use of postattack resources; and

(c) Lists those items essential to national survival in the immediate postattack period.

§323.2 General policy.

(a) In an immediate postattack period all decisions regarding the use of resources will be directed to the objective of national survival and recovery. In order to achieve this objective, postattack resources will be assigned to activities concerned with the maintenance and saving of lives, immediate military defense and retaliatory oper-

ations, economic activities essential to continued survival and recovery.

(b) This guidance is designed to achieve a degree of national equity in the use of resources and to assign and conserve resources effectively in the immediate postattack period. Until more specific instructions are available, these are the general guidelines within which managerial judgment and common sense must be used to achieve national objectives under widely differing emergency conditions.

§323.3 Responsibilities.

(a) As stated in The National Plan for Emergency Preparedness, the direction of resources mobilization is a Federal responsibility. However, in the period immediately following an attack, certain geographical areas may be temporarily isolated, and State and local governments will assume responsibility for the use of resources remaining in such areas until effective Federal authority can be restored. State and local governments will not assume responsibility for resources under the jurisdiction of a Federal agency where the Federal agency is able to function.

(b) As soon as possible after an attack and until specific national direction and guidance on the use of resources is provided, Federal, State, and local officials will determine what resources are available, to what needs they can be applied, how they are to be used, and the extent to which resources are deficient or in excess of survival needs. They will base determinations as to the relative urgency for use of resources primarily upon the importance of specific needs of defense, survival, and recovery.

§323.4 Priority activities in immediate postattack period.

The following activities are to be accorded priority over all other claims for resources. There is no significance in the order of the listing—all are important. The order in which and the extent to which they are supported locally may vary with local conditions and circumstances. If local conditions necessitate the establishment of an order of priority among these activities, that order shall be based on determinations of relative urgency among
