

§ 240.221

and explain, in writing, the basis for its denial decision. The document explaining the basis for the denial shall be mailed or delivered to the person within 10 days after the railroad's decision and shall give the date of the decision.

§ 240.221 Identification of qualified persons.

(a) After November 1, 1991, a railroad shall maintain a written record identifying each person designated by it as a supervisor of locomotive engineers.

(b) After November 1, 1991, a railroad shall maintain a written record identifying each person designated as a certified locomotive engineer. That listing of certified engineers shall indicate the class of service the railroad determines each person is qualified to perform and date of the railroad's certification decision.

(c) If a railroad is responsible for controlling joint operations territory, the listing shall include person(s) certified in accordance with § 240.229.

(d) The listing required by paragraphs (a), (b), and (c) shall be updated at least annually.

(e) The record required under this section shall be kept at the divisional or regional headquarters of the railroad and shall be available for inspection or copying by FRA during regular business hours.

(f) A railroad may obtain approval from FRA to maintain this record electronically or maintain this record at the railroad's general offices, or both. Requests for such approval shall be filed in writing with the Associate Administrator for Safety and contain sufficient information to explain how FRA will be given access to the data that is fully equivalent to that created by compliance with paragraph (e).

§ 240.223 Criteria for the certificate.

(a) As a minimum, each certificate issued in compliance with this part shall:

(1) Identify the railroad or parent company that is issuing it;

(2) Indicate that the railroad, acting in conformity with this part, has determined that the person to whom it is being issued has been determined to be qualified to operate a locomotive;

49 CFR Ch. II (10-1-05 Edition)

(3) Identify the person to whom it is being issued (including the person's name, date of birth and employee identification number, and either a physical description or photograph of the person);

(4) Identify any conditions or limitations, including the class of service or conditions to ameliorate vision or hearing acuity deficiencies, that restrict the person's operational authority;

(5) Show the date of its issuance;

(6) Be signed by a supervisor of locomotive engineers or other individual designated in accordance with paragraph (b) of this section;

(7) Show the date of the person's last operational monitoring event as required by § 240.129(c) and § 240.303(b), unless that information is reflected on supplementary documents which the locomotive engineer has in his or her possession when operating a locomotive; and

(8) Be of sufficiently small size to permit being carried in an ordinary pocket wallet.

(b) Each railroad to which this part applies shall designate in writing any person, other than a supervisor of locomotive engineers, that it authorizes to sign the certificates described in this section. The designation can identify such persons by name or job title.

(c) Nothing in paragraph (a) of this section shall prohibit any railroad from including additional information on the certificate or supplementing the certificate through other documents.

(d) It shall be unlawful for any railroad to knowingly or any individual to willfully:

(1) Make, cause to be made, or participate in the making of a false entry on that certificate; or

(2) Otherwise falsify that certificate through material misstatement, omission, or mutilation.

[56 FR 28254, June 19, 1991, as amended at 58 FR 19003, Apr. 9, 1993; 64 FR 60993, Nov. 8, 1999]

§ 240.225 Reliance on qualification determinations made by other railroads.

(a) After December 31, 1991, a railroad that is considering certification of a person as a qualified engineer may rely

on determinations made by another railroad concerning that person's qualifications. The railroad's certification program shall address how the railroad will administer the training of previously uncertified engineers with extensive operating experience or previously certified engineers who have had their certification expire. If a railroad's certification program fails to specify how to train a previously certified engineer hired from another railroad, then the railroad shall require the newly hired engineer to take the hiring railroad's entire training program. A railroad relying on another's certification shall determine that:

(1) The prior certification is still valid in accordance with the provisions of §§ 240.201, 240.217, and 240.307;

(2) The prior certification was for the same classification of locomotive or train service as the certification being issued under this section;

(3) The person has received training on and visually observed the physical characteristics of the new territory in accordance with § 240.123;

(4) The person has demonstrated the necessary knowledge concerning the railroad's operating rules in accordance with § 240.125;

(5) The person has demonstrated the necessary performance skills concerning the railroad's operating rules in accordance with § 240.127.

(b) [Reserved]

[64 FR 60993, Nov. 8, 1999]

§ 240.227 Reliance on qualification requirements of other countries.

(a) A railroad that conducts joint operations with a Canadian railroad may certify, for the purposes of compliance with this part, that a person is qualified to be a locomotive or train service engineer provided it determines that:

(1) The person is employed by the Canadian railroad; and

(2) The person meets or exceeds the qualifications standards issued by Transport Canada for such service.

(b) Any Canadian railroad that is required to comply with this regulation may certify that a person is qualified to be a locomotive or train service engineer provided it determines that:

(1) The person is employed by the Canadian railroad; and

(2) The person meets or exceeds the qualifications standards issued by Transport Canada for such service.

§ 240.229 Requirements for joint operations territory.

(a) Except for minimal joint operations provided for in paragraph (f) of this section, no railroad that is responsible for controlling the conduct of joint operations with another railroad shall permit or require any person to operate a locomotive in any class of train or engine service unless that person has been certified as a qualified locomotive engineer for the purposes of joint operations and issued a certificate that complies with § 240.223.

(b) Each railroad that is responsible for controlling the conduct of joint operations with another railroad shall certify a person as a qualified locomotive engineer for the purposes of joint operations either by making the determinations required under subpart C of this part or by relying on the certification issued by another railroad under this part.

(c) A railroad that controls joint operations may rely on the certification issued by another railroad under the following conditions:

(1) The controlling railroad shall determine:

(i) That the person has been certified as a qualified engineer under the provisions of this part by the railroad which employs that individual;

(ii) That the person certified as a locomotive engineer by the other railroad has demonstrated the necessary knowledge concerning the controlling railroad's operating rules, if the rules are different;

(iii) That the person certified as a locomotive engineer by the other railroad has the necessary operating skills concerning the joint operations territory; and

(iv) That the person certified as a locomotive engineer by the other railroad has the necessary familiarity with the physical characteristics for the joint operations territory; and,

(2) The railroad which employs the individual shall determine that the person called to operate on the controlling railroad is a certified engineer who
