20 CFR Ch. II (4-1-06 Edition)

§ 229.43 When a divorced spouse can no longer be included in computing an annuity under the overall minimum.

A divorced spouse's inclusion in the computation of the overall minimum rate ends the earlier of:

- (a) The month before the month in which the divorced spouse dies; or
- (b) The month before the month the employee dies; or
- (c) The month before the month in which the divorced spouse remarries; or
- (d) The month before the month in which the divorced spouse becomes entitled to a retirement or disability benefit under the Social Security Act based upon a primary insurance amount which is equal to or exceeds the divorced spouse annuity before reduction for age.

Subpart F—Computation of the Overall Minimum Rate

§ 229.45 Employee benefit.

The original employee 100 percent overall minimum amount, before adjustment for age, other family members, or other benefits, is the Overall Minimum PIA, as described in part 225 of this chapter. This is the PIA which would be used under the Social Security Act if the employee's railroad service had been covered under that Act instead of the Railroad Retirement Act. The Overall Minimum PIA may be recomputed for additional earnings and adjusted for cost-of-living increases. Delayed retirement credits are added to the Overall Minimum PIA as shown in part 225, subpart D of this chapter.

§ 229.46 Spouse or divorced spouse benefit.

If a spouse or divorced spouse is included in the computation of the overall minimum, a benefit of 50 percent times the Overall Minimum PIA is computed. In the case of a spouse, the benefit may be adjusted for the family maximum, age, or other benefits. In the case of a divorced spouse, the benefit may be adjusted only for age or other benefits.
