

to buy or sell equity instruments. Also included are derivatives (including written and purchased options) for which the underlying is a covered equity position.

(A) For covered equity positions that are derivatives, a bank must risk weight (as described in paragraph (c)(2)(iii) of this section) the market value of the effective notional amount of the underlying equity instrument or equity portfolio. Swaps must be included as the notional position in the underlying equity instrument or index portfolio, with a receiving side treated as a long position and a paying side treated as a short position; and

(B) For covered equity positions that are options, whether long or short, a bank must risk weight (as described in paragraph (c)(2)(iii) of this section) the market value of the effective notional amount of the underlying equity instrument or index multiplied by the option's delta.

(i) A bank may net long and short covered equity positions (including derivatives) in identical equity issues or equity indices in the same market.¹⁴

(ii)(A) A bank must multiply the absolute value of the current market value of each net long or short covered equity position by a risk weighting factor of 8.0 percent, or by 4.0 percent if the equity is held in a portfolio that is both liquid and well-diversified.¹⁵ For covered equity positions that are index contracts comprising a well-diversified portfolio of equity instruments, the net long or short position is multiplied by a risk weighting factor of 2.0 percent.

(B) For covered equity positions from the following futures-related arbitrage strategies, a bank may apply a 2.0 percent risk weighting factor to one side (long or short) of each position with the opposite side exempt from charge:

¹⁴ A bank may also net positions in depository receipts against an opposite position in the underlying equity or identical equity in different markets, provided that the bank includes the costs of conversion.

¹⁵ A portfolio is liquid and well-diversified if: (1) It is characterized by a limited sensitivity to price changes of any single equity issue or closely related group of equity issues held in the portfolio; (2) the volatility of the portfolio's value is not dominated by the volatility of any individual equity issue or by equity issues from any single industry or economic sector; (3) it contains a large number of individual equity positions, with no single position representing a substantial portion of the portfolio's total market value; and (4) it consists mainly of issues traded on organized exchanges or in well-established over-the-counter markets.

(1) Long and short positions in exactly the same index at different dates or in different market centers; or

(2) Long and short positions in index contracts at the same date in different but similar indices.

(C) For futures contracts on broadly-based indices that are matched by offsetting positions in a basket of stocks comprising the index, a bank may apply a 2.0 percent risk weighting factor to the futures and stock basket positions (long and short), provided that such trades are deliberately entered into and separately controlled, and that the basket of stocks comprises at least 90 percent of the capitalization of the index.

(iv) The specific risk capital charge component for covered equity positions is the sum of the weighted values.

Section 6. Reservation of Authority

The OCC reserves the authority to modify the application of any of the provisions in this appendix to any bank, upon reasonable justification.

Subpart A—Organization and Functions

§ 4.1 Purpose.

This subpart describes the organization and functions of the Office of the Comptroller of the Currency (OCC), and provides the OCC's principal addresses.

§ 4.2 Office of the Comptroller of the Currency.

The OCC supervises and regulates national banks and Federal branches and agencies of foreign banks by examining these institutions to determine compliance with applicable laws and regulations; approving or denying applications for new charters or for changes in corporate or banking structure; approving or denying activities; taking supervisory or enforcement actions; appointing receivers and conservators; and issuing rules and regulations applicable to these institutions, their subsidiaries, and affiliates.

§ 4.3 Comptroller of the Currency.

The Comptroller of the Currency (Comptroller), as head of the OCC, is responsible for all OCC programs and functions. The Comptroller is appointed by the President, by and with the advice and consent of the Senate, for a term of five years. The Comptroller serves as a member of the board of the Federal Deposit Insurance Corporation, a member of the Federal Financial Institutions Examination Council, and a member of the board of the Neighborhood Reinvestment Corporation. The Comptroller is advised and assisted by OCC staff, who perform the duties and functions that the Comptroller directs.

§ 4.4 Washington office.

The Washington office of the OCC is the main office and headquarters of the OCC. The Washington office directs OCC policy, oversees OCC operations, and is responsible for the direct supervision of certain national banks, including the largest national banks (through its Multinational Banking Department) and other national banks requiring special supervision. The Washington office is located at 250 E Street, SW, Washington, DC 20219.
