

reasonably be expected to use, would harm the product or others being cleaned with it;

(4) To fail to provide regular care instructions and warnings, except as to piece goods, in a form that can be referred to by the consumer throughout the useful life of the product;

(5) To fail to possess, prior to sale, a reasonable basis for all regular care information disclosed to the purchaser.

(b) *Violations of this regulation.* The Commission has adopted this regulation to prevent the unfair or deceptive acts or practices, defined in paragraph (a) of this section. Each manufacturer or importer covered by this regulation must comply with the requirements in §§ 423.2 and 423.6 through 423.8 of this regulation. Any manufacturer or importer who complies with the requirements of §§ 423.2 and 423.6 through 423.8 does not violate this regulation.

(Approved by the Office of Management and Budget under control number 3084-0046)

§ 423.6 Textile wearing apparel.

This section applies to textile wearing apparel.

(a) Manufacturers and importers must attach care labels so that they can be seen or easily found when the product is offered for sale to consumers. If the product is packaged, displayed, or folded so that customers cannot see or easily find the label, the care information must also appear on the outside of the package or on a hang tag fastened to the product.

(b) Care labels must state what regular care is needed for the ordinary use of the product. In general, labels for textile wearing apparel must have either a washing instruction or a drycleaning instruction. If a washing instruction is included, it must comply with the requirements set forth in paragraph (b)(1) of this section. If a drycleaning instruction is included, it must comply with the requirements set forth in paragraph (b)(2) of this section. If either washing or drycleaning can be used on the product, the label need have only one of these instructions. If the product cannot be cleaned by any available cleaning method without being harmed, the label must so state. [For example, if a product would be harmed both by washing and by dry-

cleaning, the label might say “Do not wash—do not dryclean,” or “Cannot be successfully cleaned.”] The instructions for washing and drycleaning are as follows:

(1) Washing, drying, ironing, bleaching and warning instructions must follow these requirements:

(i) *Washing.* The label must state whether the product should be washed by hand or machine. The label must also state a water temperature—in terms such as *cold*, *warm*, or *hot*—that may be used. However, if the regular use of hot water up to 145 degrees F (63 degrees C) will not harm the product, the label need not mention any water temperature. [For example, *Machine wash* means hot, warm or cold water can be used.]

(ii) *Drying.* The label must state whether the product should be dried by machine or by some other method. If machine drying is called for, the label must also state a drying temperature that may be used. However, if the regular use of a high temperature will not harm the product, the label need not mention any drying temperature. [For example, *Tumble dry* means that a high, medium, or low temperature setting can be used.]

(iii) *Ironing.* Ironing must be mentioned on a label only if it will be needed on a regular basis to preserve the appearance of the product, or if it is required under paragraph (b)(1)(v) of this section, *Warnings*. If ironing is mentioned, the label must also state an ironing temperature that may be used. However, if the regular use of a hot iron will not harm the product, the label need not mention any ironing temperature.

(iv) *Bleaching.* (A) If all commercially available bleaches can safely be used on a regular basis, the label need not mention bleaching.

(B) If all commercially available bleaches would harm the product when used on a regular basis, the label must say “No bleach” or “Do not bleach.”

(C) If regular use of chlorine bleach would harm the product, but regular use of a non-chlorine bleach would not, the label must say “Only non-chlorine bleach, when needed.”

(v) *Warnings.* (A) If there is any part of the prescribed washing procedure

§ 423.7

16 CFR Ch. I (1–1–06 Edition)

which consumers can reasonably be expected to use that would harm the product or others being washed with it in one or more washings, the label must contain a warning to this effect. The warning must use words “Do not,” “No,” “Only,” or some other clear wording. [For example, if a shirt is not colorfast, its label should state “Wash with like colors” or “Wash separately.” If a pair of pants will be harmed by ironing, its label should state “Do not iron.”]

(B) Warnings are not necessary for any procedure that is an alternative to the procedure prescribed on the label. [For example, if an instruction states “Dry flat,” it is not necessary to give the warning “Do not tumble dry.”]

(2) *Drycleaning*—(i) *General*. If a drycleaning instruction is included on the label, it must also state at least one type of solvent that may be used. However, if all commercially available types of solvent can be used, the label need not mention any types of solvent. The terms “Drycleanable” or “Commercially Dryclean” may not be used in an instruction. [For example, if drycleaning in perchlorethylene would harm a coat, the label might say “Professionally dryclean: fluorocarbon or petroleum.”]

(ii) *Warnings*. (A) If there is any part of the drycleaning procedure which consumers or drycleaners can reasonably be expected to use that would harm the product or others being cleaned with it, the label must contain a warning to this effect. The warning must use the words “Do not,” “No,” “Only,” or some other clear wording. [For example, the drycleaning process normally includes moisture addition to solvent up to 75% relative humidity, hot tumble drying up to 160 degrees F and restoration by steam press or steam-air finish. If a product can be drycleaned in all solvents but steam should not be used, its label should state “Professionally dryclean. No steam.”]

(B) Warnings are not necessary to any procedure which is an alternative to the procedure prescribed on the label. [For example, if an instruction states “Professionally dryclean, fluorocarbon,” it is not necessary to give the

warning “Do not use perchlorethylene.”]

(c) A manufacturer or importer must establish a reasonable basis for care information by processing prior to sale:

(1) Reliable evidence that the product was not harmed when cleaned reasonably often according to the instructions on the label, including instructions when silence has a meaning. [For example, if a shirt is labeled “Machine wash. Tumble dry. Cool iron,” the manufacturer or importer must have reliable proof that the shirt is not harmed when cleaned by machine washing (in hot water), with any type of bleach, tumble dried (at a high setting), and ironed with a cool iron]; or

(2) Reliable evidence that the product or a fair sample of the product was harmed when cleaned by methods warned against on the label. However, the manufacturer or importer need not have proof of harm when silence does not constitute a warning. [For example, if a shirt is labeled “Machine wash warm. Tumble dry medium”, the manufacturer need not have proof that the shirt would be harmed if washed in hot water or dried on high setting]; or

(3) Reliable evidence, like that described in paragraph (c)(1) or (2) of this section, for each component part of the product in conjunction with reliable evidence for the garment as a whole; or

(4) Reliable evidence that the product or a fair sample of the product was successfully tested. The tests may simulate the care suggested or warned against on the label; or

(5) Reliable evidence of current technical literature, past experience, or the industry expertise supporting the care information on the label; or

(6) Other reliable evidence.

[48 FR 22743, May 20, 1983; 48 FR 24869, June 3, 1983, as amended at 65 FR 47275, Aug. 2, 2000]

§ 423.7 Certain piece goods.

This section applies to certain piece goods.

(a) Manufacturers and importers of certain piece goods must provide care information clearly and conspicuously on the end of each bolt or roll.

(b) Care information must say what regular care is needed for the ordinary
