

is for the “catching, taking, propagating, harvesting,” etc., of “aquatic forms of animal and vegetable life.” There is no limitation as to where these activities must take place other than, as the legislative history indicates, that they are “offshore” activities. Since the purpose of the 1961 amendments is to exempt the “first processing, canning, or packing such marine products at sea as an incident to, or in conjunction with, such fishing operations,” it would frustrate this objective to give the phrase “at sea” a technical or special meaning. For example, to define “at sea” to include only bodies of water subject to the ebb and flow of the tides or to saline waters would exclude the Great Lakes which obviously would not comport with the legislative intent. On the other hand, one performing the named activities of first processing, canning, or packing within the limits of a port or harbor is not performing them “at sea” within the meaning of the legislative intent although the situs of performance is subject to tidewaters. In any event it would not appear necessary to draw a precise line as to what constitutes “at sea” operations, for, as a practical matter, such first processing, canning, or packing operations are those closely connected with the physical catching of the fish and are performed on the fishing vessel shortly or immediately following the “catching” and “taking” of the fish.

§ 784.131 “As an incident to, or in conjunction with”, fishing operations.

The statutory language makes clear that the “first processing, canning, or packing,” unlike the other named operations of “catching, taking, propagating, harvesting, cultivating, or farming” are not exempt operations in and of themselves. They are exempt only when performed “as an incident to, or in conjunction with such fishing operations” (see *Farmers Reservoir Co. v. McComb*, 337 U.S. 755). It is apparent from the context that the language “such fishing operations” refers to the principal named operations of “catching, taking, propagating, harvesting, cultivating, or farming” as performed by the fishermen or fishing vessel (compare *Bowie v. Gonzales*, 117 F. 2d

11). Therefore to be “an incident to, or in conjunction with such fishing operations”, the first processing, canning, or packing must take place upon the vessel that is engaged in the physical catching, taking, etc., of the fish. This is made abundantly clear by the legislative history. In Senate Report No. 145, 87th Congress, first session, at page 33, it pointed out:

For the same reasons, there was included in section 13(a)(5) as amended by the bill an exemption for the “first processing, canning, or packing” of marine products “at sea as an incident to, or in conjunction with such fishing operations.” The purpose of this additional provision is to make certain that the Act will be uniformly applicable to all employees on the fishing vessel including those employees on the vessel who may be engaged in these activities at sea as an incident to the fishing operations conducted by the vessel.

In accordance with this purpose of the section, the exemption is available to an employee on a fishing vessel who is engaged in first processing fish caught by fishing employees of that same fishing vessel; it would not be available to such an employee if some or all of the fish being first processed were obtained from other fishing vessels, regardless of the relationship, financial or otherwise, between such vessels (cf. *Mitchell v. Hunt*, 263 F. 2d 913; *Farmers Reservoir Co. v. McComb*, 337 U.S. 755).

§ 784.132 The exempt operations.

The final requirement is that the employee on the fishing vessel must be employed in “the first processing, canning or packing” of the marine products. The meaning and scope of these operations when performed at sea as an incident to the fishing operations of the vessel are set forth in §§ 784.133 to 784.135. To be “employed in” such operations the employee must, as previously explained (see §§ 784.106 and 784.121), be engaged in work which is clearly part of the named activity.

§ 784.133 “First processing.”

Processing connotes a change from the natural state of the marine product and first processing would constitute the first operation or series of continuous operations that effectuate this

change. It appears that the first processing operations ordinarily performed on the fishing vessels at sea consist for the most part of eviscerating, removal of the gills, beheading certain fish that have large heads, and the removal of the scallop from its shell. Icing or freezing operations, which ordinarily immediately follow these operations, would also constitute an integral part of the first processing operations, as would such activities as filleting, cutting, scaling, or salting when performed as part of a continuous series of operations. Employment aboard the fishing vessel in freezing operations thus performed is within the exemption if the first processing of which it is a part otherwise meets the conditions of section 13(a)(5), notwithstanding the transfer by the 1961 amendments of "freezing", as such, from this exemption to the exemption from overtime only provided by section 13(b)(4). Such preliminary operations as cleaning, washing, and grading of the marine products, though not exempt as first processing since they effect no change, would be exempt as part of first processing when done in preparation for the first processing operation described above including freezing. The same would be true with respect to the removal of the waste products resulting from the above described operations on board the fishing vessel.

§ 784.134 "Canning."

The term "canning" was defined in the legislative history of the 1949 amendments (House (Conference) Report No. 1453, 81st Cong., first session; 95 Cong. Rec. 14878, 14932-33). These amendments made the "canning" of marine products or byproducts exempt from overtime only under a separate exemption (section 13(b)(4), and subject to the minimum wage requirements of the Act (see § 784.136 et seq.). The same meaning will be accorded to "canning" in section 13(a)(5) as in section 13(b)(4) (see § 784.142 et seq.) subject, of course, to the limitations necessarily imposed by the context in which it is found. In other words, although certain operations as described in § 784.142 et seq. qualify as canning, they are, nevertheless, not exempt under section 13(a)(5) unless they are performed on marine

products by employees of the fishing vessel at sea as an incident to, or in conjunction with the fishing operations of the vessel.

§ 784.135 "Packing."

The packing of the various named marine products at sea as an incident to, or in conjunction with, the fishing operations of the vessel is an exempt operation. The term "packing" refers to the placing of the named product in containers, such as boxes, crates, bags, and barrels. Activities such as washing, grading, sizing, and placing layers of crushed ice in the containers are deemed a part of packing when performed as an integral part of the packing operation. The packing operation may be a simple or complete and complex operation depending upon the nature of the marine product, the length of time out and the facilities aboard the vessel. Where the fishing trip is of short duration, the packing operation may amount to no more than the simple operation, of packing the product in chipped or crushed ice in wooden boxes, as in the case of shrimp, or placing the product in wooden boxes and covering with seaweed as in the case of lobsters. Where the trips are of long duration, as for several weeks or more, packing the operations on fishing vessels with the proper equipment sometimes are integrated with first processing operations so that together these operations amount to readying the product in a marketable form. For example, in the case of shrimp, the combined operations may consist of the following series of operations—washing, grading, sizing, placing 5-pound boxes already labeled for direct marketing, placing in trays with other boxes, loading into a quick freezer locker, removing after freezing, emptying the box, glazing the contents with a spray of fresh water, replacing the box, putting them in 50-pound master cartons and finally stowing in refrigerated locker.
