

## § 74.8

### § 74.8 Approval labels.

(a) Certificates of approval will be accompanied by photographs of designs for the approval labels to be affixed to each coal mine dust personal sampler unit.

(b) The labels showing approval by the National Institute for Occupational Safety and Health and by MSHA shall contain such information as MSHA or Institute may require and shall be reproduced legibly on the outside of a sampler unit as directed by the appropriate bureau.

(c) The applicant shall submit full-scale designs or reproductions of approval labels and a sketch or description of the position of the labels on each unit.

(d) Use of the approval labels obligates the applicant to whom the certificates of approval were issued to maintain the quality of the complete coal mine dust personal sampler unit and to guarantee that the complete sampler unit is manufactured or assembled according to the drawings and specifications upon which the certificates of approval were based. Use of the approval labels is authorized only on sampler units which conform strictly with the drawings and specifications upon which the certificates of approval were based.

[35 FR 4326, Mar. 11, 1970, as amended at 37 FR 26712, Dec. 15, 1972]

### § 74.9 Material required for record.

(a) As part of the permanent record of the investigation, the National Institute for Occupational Safety and Health will retain a complete coal mine dust personal sampler unit, and MSHA will retain a pump unit, that has been tested and certified. Material not required for record purposes will be returned to the applicant at his request and at his expense on written shipping instructions to MSHA or Institute.

(b) As soon as a coal mine dust personal sampler unit is commercially available, the applicant shall deliver a complete unit free of charge to the National Institute for Occupational Safety and Health, Department of Health and Human Services, Box 4256, 944

## 30 CFR Ch. I (7-1-06 Edition)

Chestnut Ridge Road, Morgantown, WV 26505.

[35 FR 4326, Mar. 11, 1970, as amended at 37 FR 26712, Dec. 15, 1972; 47 FR 28095, June 29, 1982]

### § 74.10 Changes after certification.

(a) If the applicant desires to change any feature of a certified coal mine dust personal sampler unit, he shall first obtain the approval of the National Institute for Occupational Safety and Health pursuant to the following procedures:

(1) Application shall be made as for an original certificate of approval, requesting that the existing certification be extended to encompass the proposed change. The application shall be accompanied by drawings, specifications and related material, as in the case of an original application.

(2) The application and accompanying material will be examined by the National Institute for Occupational Safety and Health to determine whether testing of the modified sampler unit or components will be required. Testing will be necessary if there is a possibility that the modification may affect the performance of the sampler unit adversely. The National Institute for Occupational Safety and Health will inform the applicant whether such testing is required.

(3) If the proposed modification meets the pertinent requirements of these regulations, a formal extension of certification will be issued, accompanied by a list of new and revised drawings and specifications to be added to those already on file as the basis for the extension of certification.

(b) If a change is proposed in a pump unit of a certified coal dust personal sampler unit, the approval of MSHA with respect to intrinsic safety shall be obtained in accordance with the procedures set forth in paragraph (a) of this section.

[35 FR 4326, Mar. 11, 1970, as amended at 37 FR 26712, Dec. 15, 1972]

### § 74.11 Withdrawal of certification.

Any certificate of approval issued under the regulations in this part may

be revoked for cause by the Institute or MSHA which issued the certificate.

[37 FR 26712, Dec. 15, 1972]

**PART 75—MANDATORY SAFETY STANDARDS—UNDERGROUND COAL MINES**

**Subpart A—General**

Sec.

75.1 Scope.

75.2 Definitions.

**Subpart B—Qualified and Certified Persons**

75.100 Certified person.

75.150 Tests for methane and for oxygen deficiency; qualified person.

75.151 Tests for methane; qualified person; additional requirement.

75.152 Tests of air flow; qualified person.

75.153 Electrical work; qualified person.

75.154 Repair of energized surface high voltage lines; qualified person.

75.155 Qualified hoisting engineer; qualifications.

75.159 Records of certified and qualified persons.

75.160 Training programs.

75.161 Plans for training programs.

**Subpart C—Roof Support**

75.200 Scope.

75.201 Definitions.

75.202 Protection from falls of roof, face and ribs.

75.203 Mining methods.

75.204 Roof bolting.

75.205 Installation of roof support using mining machines with integral roof bolters.

75.206 Conventional roof support.

75.207 Pillar recovery.

75.208 Warning devices.

75.209 Automated Temporary Roof Support (ATRS) systems.

75.210 Manual installation of temporary support.

75.211 Roof testing and scaling.

75.212 Rehabilitation of areas with unsupported roof.

75.213 Roof support removal.

75.214 Supplemental support materials, equipment and tools.

75.215 Longwall mining systems.

75.220 Roof control plan.

75.221 Roof control plan information.

75.222 Roof control plan—approval criteria.

75.223 Evaluation and revision of roof control plan.

**Subpart D—Ventilation**

75.300 Scope.

75.301 Definitions.

75.302 Main mine fans.

75.310 Installation of main mine fans.

75.311 Main mine fan operation.

75.312 Main mine fan examinations and records.

75.313 Main mine fan stoppage with persons underground.

75.320 Air quality detectors and measurement devices.

75.321 Air quality.

75.322 Harmful quantities of noxious gases.

75.323 Actions for excessive methane.

75.324 Intentional changes in the ventilation system.

75.325 Air quantity.

75.326 Mean entry air velocity.

75.327 Air courses and trolley haulage systems.

75.330 Face ventilation control devices.

75.331 Auxiliary fans and tubing.

75.332 Working sections and working places.

75.333 Ventilation controls.

75.334 Worked-out areas and areas where pillars are being recovered.

75.335 Construction of seals.

75.340 Underground electrical installations.

75.341 Direct-fired intake air heaters.

75.342 Methane monitors.

75.343 Underground shops.

75.344 Compressors.

75.350 Belt air course ventilation.

75.351 Atmospheric monitoring systems.

75.352 Actions in response to AMS malfunction, alert, or alarm signals.

75.360 Preshift examination at fixed intervals.

75.361 Supplemental examination.

75.362 On-shift examination.

75.363 Hazardous conditions; posting, correcting and recording.

75.364 Weekly examination.

75.370 Mine ventilation plan; submission and approval.

75.371 Mine ventilation plan; contents.

75.372 Mine ventilation map.

75.373 Reopening mines.

75.380 Escapeways; bituminous and lignite mines.

75.381 Escapeways; anthracite mines.

75.382 Mechanical escape facilities.

75.383 Escapeway maps and drills.

75.384 Longwall and shortwall travelways.

75.385 Opening new mines.

75.386 Final mining of pillars.

75.388 Boreholes in advance of mining.

75.389 Mining into inaccessible areas.

**Subpart E—Combustible Materials and Rock Dusting**

75.400 Accumulation of combustible materials.

75.400-1 Definitions.

75.400-2 Cleanup program.

75.401 Abatement of dust; water or water with a wetting agent.
