

§ 501.28

39 CFR Ch. I (7-1-06 Edition)

§ 501.28 Protection and control of internal and security components.

Any physical or electronic access to the internal components of a meter, as well as any access to software or security parameters, must be conducted within an approved factory or meter repair facility under the manufacturer's direct control and active supervision. The Postal Service must have checked a meter out of service before any component, software, or security parameter is accessed or modified in any way, or internal repairs are undertaken. This does not apply to Postal Service-approved user, field, or Postal Service access to a specific internal component or software. To prevent unauthorized use, the manufacturer or any third party acting on its behalf must keep secure any equipment or other component that can be used to open or access the internal, electronic, or secure components of a meter.

[68 FR 2699, Jan. 21, 2003]

§ 501.29 Computerized remote postage meter resetting.

(a) *Description.* The Computerized Remote Postage Meter Resetting System (CMRS) permits postal licensees using specially designed postage meters to reset their meters at their places of business via telephonic communications. Authorized meter manufacturers that offer CMRS services are known as meter resetting companies (MRCs). To reset a meter, the licensee telephones the MRC and provides identifying data. Before proceeding with the setting transaction, the MRC must verify the data and ascertain from its own files whether the licensee has sufficient funds on deposit with the Postal Service. If the funds are available or the manufacturer opts to provide a funds advance in accordance with paragraph (b)(5) of this section, the MRC may complete the setting transaction.

(b) *Deposits with the Postal Service.* (1) Deposits in the Postal Service Fund at Treasury are backed in full faith and credit by the U. S. Treasury.

(2) A CMRS licensee is required to have funds available on deposit with the Postal Service before resetting a meter or the manufacturer may opt to provide a funds advance in accordance

with paragraph (b)(4) of this section. The details of this deposit requirement are covered within the Acknowledgment of Deposit Requirement document. By signing this document, the licensee agrees to transfer funds to the Postal Service through a lockbox bank, as specified by the MRC, for the purpose of prepayment of postage. The MRC representative must provide all new CMRS licensees with this document when a new account is established. The document must be completed and signed by the licensee and sent to the licensing post office by the MRC.

(3) The MRC is required to incorporate the following language into its meter rental agreements:

ACKNOWLEDGMENT OF DEPOSIT REQUIREMENT

By signing this meter rental agreement, you represent that you have read the Acknowledgment of Deposit Requirement and are familiar with its terms. You agree that, upon execution of this Agreement with [the MRC], you will also be bound by all terms and conditions of the Acknowledgment of Deposit Requirement, as it may be amended from time to time.

(4) The licensee is permitted to make deposits in one of three ways: check, electronic funds transfer (or wire transfer), or automated clearinghouse (ACH) transfer. These deposits are to be processed by the lockbox bank. The lockbox bank must wire daily all available balances to the Postal Service.

(5) If the MRC chooses to offer advancement of funds to licensees, the MRC is required to maintain a deposit with the Postal Service equal to at least 1 day's average funds advanced. The total amount of funds advanced to licensees on any given day may not exceed the amount the manufacturer has on deposit with the Postal Service. The MRC is not authorized to perform settings in excess of the licensee's balance in any other circumstance. The Postal Service shall not be liable for any payment made by the MRC on behalf of a licensee that is not reimbursed by the licensee because the MRC is solely responsible for the collection of advances.
