

TABLE 2 OF § 1051.245—DESIGN-CERTIFICATION TECHNOLOGIES FOR CONTROLLING FUEL-LINE PERMEATION

If the fuel-line permeability control technology is . . .	Then you may design-certify with a fuel line permeation emission level of . . .
(i) Hose meeting Category 1 permeation specifications in SAE J2260 (incorporated by reference in § 1051.810).	15 g/m ² /day.
(ii) Hose meeting the R11–A or R12 permeation specifications in SAE J30 (incorporated by reference in § 1051.810).	15 g/m ² /day.

(3) We may establish additional design certification options where we find that new test data demonstrate that the use of other technology designs will ensure compliance with the applicable emission standards.

[67 FR 68347, Nov. 8, 2002, as amended at 69 FR 2442, Jan. 15, 2004; 70 FR 40497, July 13, 2005]

§ 1051.250 What records must I keep and make available to EPA?

(a) Organize and maintain the following records:

- (1) A copy of all applications and any summary information you send us.
- (2) Any of the information we specify in § 1051.205 that you were not required to include in your application.
- (3) A detailed history of each emission-data vehicle. For each vehicle, describe all of the following:
 - (i) The emission-data vehicle's construction, including its origin and buildup, steps you took to ensure that it represents production vehicles, any components you built specially for it, and all the components you include in your application for certification.
 - (ii) How you accumulated vehicle or engine operating hours, including the dates and the number of hours accumulated.
 - (iii) All maintenance, including modifications, parts changes, and other service, and the dates and reasons for the maintenance.
 - (iv) All your emission tests, including documentation on routine and standard tests, as specified in 40 CFR part 1065, and the date and purpose of each test.
 - (v) All tests to diagnose engine or emission-control performance, giving

the date and time of each and the reasons for the test.

- (vi) Any other significant events.
- (4) Production figures for each engine family divided by assembly plant.
- (5) Keep a list of engine identification numbers for all the engines you produce under each certificate of conformity.
 - (b) Keep data from routine emission tests (such as test cell temperatures and relative humidity readings) for one year after we issue the associated certificate of conformity. Keep all other information specified in paragraph (a) of this section for eight years after we issue your certificate.
 - (c) Store these records in any format and on any media, as long as you can promptly send us organized, written records in English if we ask for them. You must keep these records readily available. We may review them at any time.
 - (d) Send us copies of any maintenance instructions or explanations if we ask for them.

[70 FR 40497, July 13, 2005]

§ 1051.255 What decisions may EPA make regarding my certificate of conformity?

- (a) If we determine your application is complete and shows that the engine family meets all the requirements of this part and the Act, we will issue a certificate of conformity for your engine family for that model year. We may make the approval subject to additional conditions.
 - (b) We may deny your application for certification if we determine that your engine family fails to comply with emission standards or other requirements of this part or the Act. Our decision may be based on a review of all information available to us. If we deny your application, we will explain why in writing.
 - (c) In addition, we may deny your application or suspend or revoke your certificate if you do any of the following:
 - (1) Refuse to comply with any testing or reporting requirements.
 - (2) Submit false or incomplete information (paragraph (e) of this section applies if this is fraudulent).
 - (3) Render inaccurate any test data.
