

§ 34.3

42 CFR Ch. I (10–1–06 Edition)

(p) *Physical disorder.* A currently accepted medical diagnosis, as defined by the Manual of the International Classification of Diseases, Injuries, and Causes of Death published by the World Health Organization, or by other authoritative sources.

[21 FR 9829, Dec. 12, 1956, as amended at 52 FR 32543, Aug. 28, 1987; 56 FR 25001, May 31, 1991]

§ 34.3 Scope of examinations.

(a) *General.* In performing examinations, medical examiners shall consider those matters that relate to:

(1) A communicable disease of public health significance;

(2)(i) A physical or mental disorder and behavior associated with the disorder that may pose, or has posed, a threat to the property, safety, or welfare of the alien or others;

(ii) A history of a physical or mental disorder and behavior associated with the disorder, which behavior has posed a threat to the property, safety, or welfare of the alien or others and which behavior is likely to recur or lead to other harmful behavior;

(3) Drug abuse or addiction; and

(4) Any other physical abnormality, disease, or disability serious in degree or permanent in nature amounting to a substantial departure from normal well-being.

The scope of the examination shall include any laboratory or additional studies that are deemed necessary, either as a result of the physical examination or pertinent information elicited from the alien's medical history, for the examining physician to reach a conclusion about the presence or absence of a physical or mental abnormality, disease, or disability.

(b) *Persons subject to requirement for chest X-ray examination and serologic testing.* (1) Except as provided in paragraph (b)(1)(v) of this section, a chest X-ray examination, serologic testing for syphilis and serologic testing for HIV of persons 15 years of age and older shall be required as part of the examination of:

(i) Applicants for immigrant visas;

(ii) Students, exchange visitors, and other applicants for a nonimmigrant visa who are required by a consular authority to have a medical examination;

(iii) Aliens outside the United States who apply for refugee status;

(iv) Applicants in the United States who apply for adjustment of status under the immigration statute and regulations;

(v) *Exceptions.* Neither a chest X-ray examination nor serologic testing for syphilis and HIV shall be required if the alien is under the age of 15. Provided, a tuberculin skin test shall be required if there is evidence of contact with a person known to have tuberculosis or other reason to suspect tuberculosis, and a chest X-ray examination shall be required in the event of a positive tuberculin reaction, and serologic testing where there is reason to suspect infection with syphilis or HIV. Additional exceptions to the requirement for a chest X-ray examination may be authorized for good cause upon application approved by the Director.

(2) *Tuberculin skin test examination.* (i) All aliens 2 years of age or older in the United States who apply for adjustment of status to permanent residents, under the immigration laws and regulations, or other aliens in the United States who are required by the INS to have a medical examination in connection with a determination of their admissibility, shall be required to have a tuberculin skin test. Exceptions to this requirement may be authorized for good cause upon application approved by the Director. In the event of a positive tuberculin reaction, a chest X-ray examination shall be required. If the chest radiograph is consistent with tuberculosis, the alien shall be referred to the local health authority for evaluation. Evidence of this evaluation shall be provided to the civil surgeon before a medical notification may be issued.

(ii) Aliens less than 2 years old shall be required to have a tuberculin skin test if there is evidence of contact with a person known to have tuberculosis or other reason to suspect tuberculosis. In the event of a positive tuberculin reaction, a chest X-ray examination shall be required. If the chest radiograph is consistent with tuberculosis, the alien shall be referred to the local health authority for evaluation. Evidence of this evaluation shall be provided to the

civil surgeon before a medical notification may be issued.

(3) *Sputum smear examination.* All aliens subject to the chest X-ray examination requirement and for whom the radiograph shows an abnormality consistent with pulmonary tuberculosis shall be required to have a sputum smear examination for acid-fast bacilli.

(4) *How and where performed.* All chest X-ray films used in medical examinations performed under the regulations in this part shall be large enough to encompass the entire chest (approximately 14 by 17 inches; 35.6×43.2 cm.). Serologic testing for HIV shall be a sensitive and specific test, confirmed when positive by a test such as the Western blot test or an equally reliable test. For aliens examined abroad, the serologic testing for HIV must be completed abroad, except that the Attorney General after consultation with the Secretary of State and the Secretary of Health and Human Services may in emergency circumstances permit serologic testing of refugees for HIV to be completed in the United States.

(5) *Chest X-ray, laboratory, and treatment reports.* The chest X-ray reading and serologic test results for syphilis and HIV shall be included in the medical notification. When the medical examiner's conclusions are based on a study of more than one chest X-ray film, the medical notification shall include at least a summary statement of findings of the earlier films, followed by a complete reading of the last film, and dates and details of any laboratory tests and treatment for tuberculosis.

(c) *Procedure for transmitting records.* For aliens issued immigrant visas, the medical notification and chest X-ray film, if any, shall be placed in a separate envelope which shall be sealed and attached to the alien's visa in such a manner as to be readily detached at the U.S. port of entry. When more than one chest X-ray film is used as a basis for the examiner's conclusions, all films shall be included.

(d) *Failure to present records.* When a determination of admissibility is to be made at the U.S. port of entry, a medical hold document shall be issued pending completion of any necessary examination procedures. A medical

hold document may be issued for aliens who:

(1) Are not in possession of a valid medical notification, if required;

(2) Have a medical notification which is incomplete;

(3) Have a medical notification which is not written in English;

(4) Are suspected to have an excludable medical condition.

(e) The Attorney General, after consultation with the Secretary of State and the Secretary of Health and Human Services, may in emergency circumstances permit the medical examination of refugees to be completed in the United States.

(f) All medical examinations shall be carried out in accordance with such technical instructions for physicians conducting the medical examination of aliens as may be issued by the Director. Copies of such technical instructions are available upon request to the Director, Division of Quarantine, Mailstop E03, CDC, Atlanta GA 30333.

[56 FR 25002, May 31, 1991]

§ 34.4 Medical notifications.

(a) Medical examiners shall issue medical notifications of their findings of the presence or absence of Class A or Class B medical conditions. The presence of such condition must have been clearly established.

(b) *Class A medical notifications.* (1) The medical examiner shall report his/her findings to the consular officer or the INS by Class A medical notification which lists the specific condition for which the alien may be excluded, if an alien is found to have:

(i) A communicable disease of public health significance;

(ii)(A) A physical or mental disorder, and behavior associated with the disorder that may pose, or has posed, a threat to the property, safety, or welfare of the alien or others; or

(B) A history of a physical or mental disorder and behavior associated with the disorder, which behavior has posed a threat to the property, safety, or welfare of the alien or others and which behavior is likely to recur or lead to other harmful behavior;

(iii) Drug abuse or addition.
