

§283.6

of out-of-wedlock live births and the number of total live births among women living in each State and a factor provided by NCHS to adjust for changes in data reporting for those States that have changed their methodology for collecting data on out-of-wedlock births during the bonus period.

(b) We will use the number of total live births and the number of out-of-wedlock births, adjusted for any changes in data collection or reporting, to calculate the decrease in the ratio of out-of-wedlock to total births for each State as follows:

(1) We will calculate the ratio as the number of out-of-wedlock births for the State during the most recent two-year period for which NCHS has final birth data divided by the number of total births for the State during the same period. We will calculate, to three decimal places, the ratio for each State that submits the necessary data on total and out-of-wedlock births described in §283.4.

(2) We will calculate the ratio for the previous two-year period using the same methodology.

(3) We will calculate the proportionate change in the ratio as the ratio of out-of-wedlock births to total births for the most recent two-year period minus the ratio of out-of-wedlock births to total births from the prior two-year period, all divided by the ratio of out-of-wedlock births to total births for the prior two-year period. A negative number will indicate a decrease in the ratio and a positive number will indicate an increase in the ratio.

(c) We will identify which States have a decrease in their ratios large enough to make them potentially eligible for the bonus, as follows:

(1) For States other than Guam, American Samoa and the Virgin Islands, we will use this calculated change to rank the States and identify which five States have the largest decrease in their ratios. Only States among the top five will be potentially eligible for the bonus. We will identify fewer than five such States as potentially eligible if fewer than five experience decreases in their ratios. We will

not include Guam, American Samoa and the Virgin Islands in this ranking.

(2) If we identify more than five States due to a tie in the decrease, we will recalculate the ratio and the decrease in the ratio to as many decimal places as necessary to eliminate the tie. We will identify no more than five States.

(3) For Guam, American Samoa and the Virgin Islands, we will use the calculated change in the ratio to identify which of these States experienced a decrease that is either at least as large as the smallest qualifying decrease identified in paragraph (c)(1) of this section, or a decrease that ranks within the top five decreases when all States and Territories are ranked together. These identified States will be potentially eligible for the bonus also.

(4) We will notify the potentially eligible States, as identified under paragraphs (a) through (c) of this section that they must submit the information on abortions specified under §283.6 if they want to be considered for the bonus.

**§283.6 If a State wants to be considered for bonus eligibility, what data on abortions must it submit?**

(a) To be considered further for bonus eligibility, each potentially eligible State, as identified under §283.5, must submit to ACF data and information on the number of abortions for calendar year 1995 within two months of this notification. This number must measure either of the following:

(1) For calendar year 1995, the total number of abortions performed by all providers within the State; or

(2) For calendar year 1995, the total number of abortions performed by all providers within the State on the total population of State residents only. This is the preferred measure.

(b) States must have obtained these data on abortions for calendar year 1995 within 60 days of publication of the final rule and must include with their submission of 1995 data an official record documenting when they obtained the abortion data.

(c) Within two months of notification by ACF of potential eligibility, the State must submit:

(1) The number of abortions performed for the most recent year for which abortion data are available (as defined in §283.2 to mean the year that is two calendar years prior to the current calendar year). In measuring the number of abortions, the State must use the same definition, either under paragraph (a)(1) or paragraph (a)(2) of this section, for both 1995 and the most recent year; or

(2) If applicable, the adjusted number and information specified in paragraph (d) of this section.

(d) If the State's data collection or reporting methodology changed between 1995 and the bonus year in such a way as to reflect an increase or decrease in the number of abortions that is different than what actually occurred during the period, the State must:

(1) When submitting the number of abortions for the most recent year under paragraph (c)(2), adjust the number to exclude increases or decreases in the number due to changes in methodology for collecting or reporting the data. For example, this calculation should include adjustments for increases or decreases in response rates for providers in reporting abortion data;

(2) Provide a rationale for the adjustment, i.e., a description of how the data collection or reporting methodology was changed. This could include a description of how legislative, policy or procedural changes affected the collection or reporting of abortion data, or an indication of changes in the response rate of providers in reporting abortion data; and

(3) Provide a certification by the Governor, or his or her designee, that the number of abortions reported to ACF accurately reflects these adjustments for changes in data collection or reporting methodology.

**§ 283.7 How will we use these data on abortions to determine bonus eligibility?**

(a) For those States that have met all the requirements under §§283.1 through 283.6, we will calculate the rate of abortions for calendar year 1995 and for the most recent year for which abortion data are available as defined

in §283.2. These rates will equal the number of abortions reported by the State to ACF for the applicable year, divided by total live births among women living in the State reported by NCHS for the same year. We will calculate the rates to three decimal places.

(b) If ACF determines that the State's rate of abortions for the most recent year for which abortion data are available is less than the rate for 1995, and, if the State has met all the requirements listed elsewhere under this part, the State will receive the bonus.

**§ 283.8 What will be the amount of the bonus?**

(a) If, for a bonus year, none of the eligible States is Guam, American Samoa or the Virgin Islands, then the amount of the grant shall be:

(1) \$20 million per State if there are five eligible States; or

(2) \$25 million per State if there are fewer than five eligible States.

(b) If for a bonus year, Guam, the Virgin Islands, or American Samoa is an eligible State, then the amount of the grant shall be:

(1) In the case of such a State, 25 percent of the mandatory ceiling amount as defined in section 1108 of the Act; and

(2) In the case of any other State, \$100 million, minus the total amount of any bonuses paid to Guam, the Virgin Islands, and American Samoa, and divided by the number of eligible States other than Guam, American Samoa and the Virgin Islands, not to exceed \$25 million per State.

**§ 283.9 What do eligible States need to know to access and use the bonus funds?**

(a) States must use the bonus funds to carry out the purposes of the Temporary Assistance for Needy Families Block Grant in section 401 and 404 of the Act. This may include statewide programs to prevent and reduce the incidence of out-of-wedlock pregnancies.

(b) As applicable, these funds are subject to the requirements in, and the limitations of, sections 404 and 408 of the Act.

(c) For Puerto Rico, Guam, the Virgin Islands, and American Samoa, the
