

Fishery Conservation and Management

§ 635.40

fish available for inspection and recovery of the tag by a NMFS scientist, enforcement agent, or other person designated in writing by NMFS.

(d) *Quota monitoring.* If an Atlantic HMS landed under the authority of paragraph (b) of this section is subject to a quota, the fish will be counted against the applicable quota for the species consistent with the fishing gear and activity which resulted in the catch. In the event such fishing gear or activity is otherwise prohibited under applicable provisions of this part, the fish shall be counted against the reserve quota established for that species.

§ 635.34 Adjustment of management measures.

(a) NMFS may adjust the catch limits for BFT, as specified in § 635.23, and the quotas for BFT, shark, and swordfish, as specified in § 635.27.

(b) In accordance with the framework procedures in the Fishery Management Plan for Atlantic Tunas, Swordfish, and Sharks and the Fishery Management Plan for Atlantic Billfishes, NMFS may establish or modify for species or species groups of Atlantic HMS the following management measures: maximum sustainable yield or optimum yield levels based on the latest stock assessment or updates in the SAFE report; domestic quotas; recreational and commercial retention limits, including target catch requirements; size limits; fishing years or fishing seasons; shark fishing regions or regional quotas; species in the management unit and the specification of the species groups to which they belong; species in the prohibited shark species group; classification system within shark species groups; permitting and reporting requirements; Atlantic tunas Purse Seine category cap on bluefin tuna quota; time/area restrictions; allocations among user groups; gear prohibitions, modifications, or use restrictions; effort restrictions; essential fish habitat; and actions to implement ICCAT recommendations, as appropriate.

(c) NMFS may add species to the prohibited shark species group specified in Table 1 of appendix A if, after considering the criteria in paragraphs (c)(1)

through (4) of this section, the species is determined to meet at least two of the criteria. Alternatively, NMFS may remove species from the prohibited shark species group and place them in the appropriate shark species group in Table 1 of appendix A if, after considering the criteria in paragraphs (c)(1) through (4) of this section, NMFS determines the species only meets one criterion.

(1) Biological information indicates that the stock warrants protection.

(2) Information indicates that the species is rarely encountered or observed caught in HMS fisheries.

(3) Information indicates that the species is not commonly encountered or observed caught as bycatch in fishing operations for species other than HMS.

(4) The species is difficult to distinguish from other prohibited species.

Subpart D—Restrictions on Imports

§ 635.40 Restrictions to enhance conservation.

(a) *Determinations.* Upon a determination by NMFS that species of fish subject to regulation or under investigation by ICCAT are ineligible for entry into the United States under 16 U.S.C. 971d (c)(4) or (c)(5), NMFS, with the concurrence of the Secretary of State, will file with the Office of the Federal Register for publication a finding to that effect. Effective upon the date of filing of such finding, all shipments of fish in any form of the species found to be ineligible will be denied entry unless, with respect to a particular shipment, it is established by satisfactory proof pursuant to paragraph (b) of this section that the particular shipment of fish is eligible for entry. Entry will not be denied and no such proof will be required for any such shipment that, on the date of filing was in transit to the United States on board a vessel operating as a common carrier.

(b) *Proof of admissibility.* (1) For the purposes of paragraph (a) of this section and section 6(c) of ATCA, a shipment of fish in any form of the species

§ 635.41

under regulation or under investigation by ICCAT offered for entry, directly or indirectly, from a country named in a finding filed with the Office of the Federal Register for publication under paragraph (a) of this section is eligible for entry if the shipment is accompanied by a completed ATCA COE attached to the invoice certifying that the fish in the shipment:

(i) Are not of the species specified in the finding;

(ii) Are of the species named in the finding, but were not taken in the regulatory area; or

(iii) Are of the species named in the finding, but are products of an American fishery and were lawfully taken in conformity with applicable conservation laws and regulations and landed in the country named in the finding solely for transshipment.

(2) If the fish are offered for entry under paragraph (b)(1)(i) or (b)(1)(ii) of this section, the ATCA COE must be executed by a duly authorized official of the country named in the finding and the ATCA COE must be validated by a consular officer or consular agent of the United States. Such validation must be attached to the ATCA COE.

(3) If the fish are offered for entry under paragraph (b)(1)(iii) of this section, the ATCA COE must be executed by a consular officer or consular agent of the United States and be accompanied by the declaration(s) required by 19 CFR 10.79. The “Declaration of Master and Two Members of Crew on Entry of Products of American Fisheries” required by 19 CFR 10.79 must contain a further statement as follows: “We further declare that the said fish were caught by us in full compliance with part 635, title 50, Code of Federal Regulations, and such other conservation laws and regulations as were applicable at the time the fishing operation was in progress.”

(c) *Removal of import restrictions.* Upon a determination by NMFS that the conditions no longer exist that warranted the finding under paragraph (a) of this section, NMFS will remove the import restriction by filing with the Office of the Federal Register for publication notification of removal effective on the date of filing. However, for 1 year from the date of filing every ship-

50 CFR Ch. VI (10–1–06 Edition)

ment of fish in any form that was subject to the finding under paragraph (a) of this section will continue to be denied entry, unless the shipment is accompanied by a certification executed by an authorized official of the country of export and authenticated by a consular officer or consular agent of the United States certifying that no portion of the shipment is composed of fish taken prior to or during the import restriction.

§ 635.41 Products denied entry.

(a) All shipments of Atlantic bigeye tuna, or its products, in any form, harvested by a vessel under the jurisdiction of Bolivia or Georgia will be denied entry into the United States.

(b) All shipments of tuna or tuna-like species, or their products, in any form, harvested in the ICCAT convention area by a fishing vessel that is required to be listed, but not listed on the ICCAT record of authorized vessels will be denied entry into the United States.

(c) All shipments of tuna or tuna-like species, or their products, in any form, harvested in the ICCAT convention area by a fishing vessel listed on the ICCAT record as engaged in illegal, unreported, and unregulated fishing will be denied entry into the United States.

(d) All shipments of tuna or tuna-like species, placed in cages for farming and/or transshipment, harvested in the ICCAT convention area and caught by a fishing vessel included on the ICCAT list as engaged in illegal, unreported, and unregulated fishing will be denied entry into the United States.

(e) For the purposes of this section, it is a rebuttable presumption that any shipment containing swordfish, bluefin tuna, bigeye tuna, or their products offered for entry into the United States has been harvested by a vessel or vessels of the exporting nation.
