

Fishery Conservation and Management

§ 648.143

Management Plan for the Black Sea Bass Fishery adopted by the Commission. The Regional Administrator will determine the date on which the annual coastwide quota will have been harvested; beginning on that date and through the end of the calendar year, the EEZ north of 35°15.3' N. lat. will be closed to the possession of black sea bass. The Regional Administrator will publish notification in the FEDERAL REGISTER advising that, upon, and after, that date, no vessel may possess black sea bass in the EEZ north of 35°15.3' N. lat. during a closure, nor may vessels issued a moratorium permit land black sea bass during the closure. Individual states will have the responsibility to close their ports to landings of black sea bass during a closure, pursuant to the Fishery Management Plan for the Black Sea Bass Fishery adopted by the Commission.

(3) Landings in excess of the annual coastwide quota will be deducted from the quota allocation for the following year in the final rule that establishes the annual quota. The overage deduction will be based on landings for the current year through September 30, and landings for the previous calendar year that were not included when the overage deduction was made in the final rule that established the annual coastwide quota for the current year. If the Regional Administrator determines during the fishing year that any part of an overage deduction was based on erroneous landings data that were in excess of actual landings for the period concerned, he/she will restore the overage that was deducted in error to the appropriate quota allocation. The Regional Administrator will publish notification in the FEDERAL REGISTER announcing the restoration.

(e) *Research quota.* See § 648.21(g).

[61 FR 58467, Nov. 15, 1996, as amended at 66 FR 12911, Mar. 1, 2001; 66 FR 42161, Aug. 10, 2001; 67 FR 6881, Feb. 14, 2002; 68 FR 10183, Mar. 4, 2003; 69 FR 62822, Oct. 28, 2004; 70 FR 311, Jan. 4, 2005]

§ 648.141 Closure.

EEZ closure. The Regional Administrator shall close the EEZ to fishing for black sea bass by commercial vessels issued a moratorium permit for the remainder of the calendar year by

publishing notification in the FEDERAL REGISTER if he or she determines that the action or inaction of one or more states will cause the applicable target exploitation rate specified in § 648.140(a) to be exceeded. The Regional Administrator may reopen the EEZ if earlier action or inaction by a state has been remedied by that state without causing the applicable specified target exploitation rate to be exceeded.

§ 648.142 Time restrictions.

Vessels that are not eligible for a moratorium permit under § 648.4(a)(7), and fishermen subject to the possession limit may possess black sea bass from January 1 through December 31, unless this time period is adjusted pursuant to the procedures in § 648.140.

[70 FR 35046, June 16, 2005]

§ 648.143 Minimum sizes.

(a) The minimum size for black sea bass is 11 inches (27.94 cm) total length for all vessels issued a moratorium permit under § 648.4 (a)(7) that fish for, possess, land or retain black sea bass in or from U.S. waters of the western Atlantic Ocean from 35° 15.3 N. Lat., the latitude of Cape Hatteras Light, North Carolina, northward to the U.S.-Canadian border. The minimum size may be adjusted for commercial vessels pursuant to the procedures in § 648.140.

(b) The minimum size for black sea bass is 12 inches (30.5 cm) TL for all vessels that do not qualify for a moratorium permit, and for party boats holding a moratorium permit, if fishing with passengers for hire or carrying more than five crew members, and for charter boats holding a moratorium permit, if fishing with more than three crew members. The minimum size may be adjusted for recreational vessels pursuant to the procedures in § 648.140.

(c) The minimum size in this section applies to the whole fish or any part of a fish found in possession (e.g., fillets), except that party or charter vessels possessing valid state permits authorizing filleting at sea may possess fillets smaller than the size specified if skin

§ 648.144

50 CFR Ch. VI (10–1–06 Edition)

remains on the fillet and all other state requirements are met.

[61 FR 58467, Nov. 15, 1996, as amended at 63 FR 27868, May 21, 1998; 66 FR 39292, July 30, 2001; 66 FR 66357, Dec. 26, 2001; 67 FR 50373, Aug. 2, 2002; 68 FR 44236, July 28, 2003]

§ 648.144 Gear restrictions.

(a) *Trawl gear restrictions*—(1) *General.* (i) Otter trawlers whose owners are issued a black sea bass moratorium permit and that land or possess 500 lb (226.8 kg) or more of black sea bass from January 1 through March 31, or 100 lb (45.4 kg) or more of black sea bass from April 1 through December 31, must fish with nets that have a minimum mesh size of 4.5 inch (11.43-cm) diamond mesh applied throughout the codend for at least 75 continuous meshes forward of the terminus of the net, or for codends with less than 75 meshes, the entire net must have a minimum mesh size of 4.5 inch (11.43-cm) diamond mesh throughout.

(ii) Mesh sizes shall be measured pursuant to the procedure specified in § 648.104(a)(2).

(2) *Net modifications.* No vessel subject to this part shall use any device, gear, or material, including, but not limited to nets, net strengtheners, ropes, lines, or chafing gear, on the top of the regulated portion of a trawl net; except that, one splitting strap and one bull rope (if present) consisting of line or rope no more than 3 inches (7.6 cm) in diameter may be used if such splitting strap and/or bull rope does not constrict, in any manner, the top of the regulated portion of the net, and one rope no greater than 0.75 inches (1.9 cm) in diameter extending the length of the net from the belly to the terminus of the codend along the top, bottom, and each side of the net. “Top of the regulated portion of the net” means the 50 percent of the entire regulated portion of the net that (in a hypothetical situation) will not be in contact with the ocean bottom during a tow if the regulated portion of the net were laid flat on the ocean floor. For the purpose of this paragraph, head ropes shall not be considered part of the top of the regulated portion of a trawl net.

(3) *Mesh obstruction or constriction.* (i) A fishing vessel may not use any mesh

configuration, mesh construction, or other means on or in the top of the net, as defined in paragraph (a)(2) of this section, that obstructs the meshes of the net in any manner, or otherwise causes the size of the meshes of the net while in use to diminish to a size smaller than the minimum established pursuant to paragraph (a)(1)(i) of this section.

(ii) No person on any vessel may possess or fish with a net capable of catching black sea bass in which the bars entering or exiting the knots twist around each other.

(4) *Stowage of nets.* Otter trawl vessels subject to the minimum mesh-size requirement of paragraph (a)(1)(i) of this section may not have “available for immediate use” any net or any piece of net that does not meet the minimum mesh size requirement, or any net, or any piece of net, with mesh that is rigged in a manner that is inconsistent with the minimum mesh size requirement. A net that is stowed in conformance with one of the methods specified in § 648.23(b) and that can be shown not to have been in recent use, is considered to be not “available for immediate use.”

(5) *Roller gear.* Rollers used in roller rig or rock hopper trawl gear shall be no larger than 18 inches (45.7 cm) in diameter.

(b) *Pot and trap gear restrictions*—(1) *Gear marking.* The owner of a vessel issued a black sea bass moratorium permit must mark all black sea bass pots or traps with the vessel’s USCG documentation number or state registration number.

(2) All black sea bass traps or pots must have an escape vent placed in a lower corner of the parlor portion of the pot or trap that complies with one of the following minimum sizes: 1.375 inches (3.49 cm) by 5.75 inches (14.61 cm); or a circular vent 2.375 inches (6.03 cm) in diameter; or a square vent with sides of 2 inches (5.08 cm), inside measure; however, black sea bass traps constructed of wooden lathes may have instead an escape vent constructed by leaving a space of at least 1.375 inches (3.49 cm) between one set of lathes in the parlor portion of the trap. These dimensions for escape vents and lathe
