

## Federal Energy Regulatory Commission

## § 157.53

of the other divisions of the project applicant as well as the project applicant's Marketing and Energy affiliates as those terms are defined in §358.3(d) and (k) of the Commission's regulations.

(d) Each project applicant conducting an open season under this subpart that is not otherwise subject to the provisions of part 358 of this chapter must comply with the following sections of that part: Sections 358.4(a)(1) and (3); 358.4(e)(3), (4), (5), and (6); 358.5(a), (b), (c)(3) and (5); and 358.5(d). The exemptions from §358.4(a)(1) and (3) set forth in §358.4(a)(4), (5), and (6) of this chapter also apply to each project applicant conducting an open season under this subpart.

[Order 2005, 70 FR 8286, Feb. 18, 2005, as amended by Order 2005-A, 70 FR 35026, June 16, 2005]

### § 157.36 Open seasons for expansions.

Any open season for capacity exceeding the initial capacity of an Alaska natural gas transportation project must provide the opportunity for the transportation of gas other than Prudhoe Bay or Point Thomson production. In considering a proposed voluntary expansion of an Alaska natural gas pipeline project, the Commission will consider the extent to which the expansion will be utilized by shippers other than those who are the initial shippers on the project and, in order to promote competition and open access to the project, may require design changes to ensure that some portion of the expansion capacity be allocated to new shippers willing to sign long-term firm transportation contracts, including shippers seeking to transport natural gas from areas other than Prudhoe Bay and Point Thomson.

[Order 2005-A, 70 FR 35026, June 16, 2005]

### § 157.37 Project design.

In reviewing any application for an Alaska natural gas pipeline project, the Commission will consider the extent to which a proposed project has been designed to accommodate the needs of shippers who have made conforming bids during an open season, as well as the extent to which the project can accommodate low-cost expansion,

and may require changes in project design necessary to promote competition and offer a reasonable opportunity for access to the project.

### § 157.38 Pre-approval procedures.

No later than 90 days prior to providing the notice of open season required by §157.34(a), a prospective applicant must file, for Commission approval, a detailed plan for conducting an open season in conformance with this subpart. The prospective applicant's plan shall include the proposed notice of open season. Upon receipt of a request for such a determination, the Secretary of the Commission shall issue a notice of the request, which will then be published in the FEDERAL REGISTER. The notice shall establish a date on which comments from interested persons are due and a date, which shall be within 60 days of receipt of the prospective applicant's request unless otherwise directed by the Commission, by which the Commission will act on the proposed plan.

[Order 2005-A, 70 FR 35026, June 16, 2005]

### § 157.39 Rate treatment of pipeline expansions.

There shall be a rebuttable presumption that rates for any expansion of an Alaska natural gas transportation project shall be determined on a rolled-in basis.

## Subpart C [Reserved]

## Subpart D—Exemption of Natural Gas Service for Drilling, Testing, or Purging from Certificate Requirements

AUTHORITY: Natural Gas Act, as amended, 15 U.S.C. 717 *et. seq.*, Energy Supply and Environmental Coordination Act, 15 U.S.C. 791 *et. seq.*, Federal Energy Administration Act, 15 U.S.C. 761 *et. seq.*, Natural Gas Policy Act of 1978, Pub. L. 95-621, 92 Stat. 3350, Department of Energy Organization Act, Pub. L. 95-91, E.O. 12009, 42 FR 46267.

### § 157.53 Testing.

(a) Construction and operation of facilities necessary to render direct natural gas service for use in the testing and purging of new natural gas pipeline

facilities are exempted from the certificate requirements of section 7(c) of the Natural Gas Act, when the construction and operation of such facilities are conducted in accordance with paragraph (b) of this section.

(b) Operations undertaken to render direct natural gas service shall be terminated upon the completion of the purging or testing of the pipeline facilities. Persons undertaking any construction or operation of facilities or service under this section shall file an original and two copies of an annual statement, by February 1 of each year, describing their activities hereunder.

[43 FR 56544, Dec. 1, 1978, as amended at 60 FR 53065, Oct. 11, 1995]

### Subpart E [Reserved]

## Subpart F—Interstate Pipeline Blanket Certificates and Authorization Under Section 7 of the Natural Gas Act for Certain Transactions and Abandonment

### § 157.201 Applicability.

(a) *Scope.* This subpart establishes a procedure whereby an interstate pipeline may obtain a blanket certificate authorizing certain construction and operation of facilities and certain certificate amendments and abandonment under section 7 of the Natural Gas Act.

(b) *Who may apply.* This procedure is only applicable to interstate pipelines.

(c) *Cross-reference.* The procedures applicable to transportation by interstate pipelines under blanket certificates are set forth in subpart G of part 284 of this chapter.

(d) *Availability of case-specific certificates.* Nothing in this subpart shall preclude an interstate pipeline from proceeding under any other provision of the Commission's regulations to obtain Commission approval of abandonments or a temporary or permanent certificate of public convenience and necessity.

[Order 234, 47 FR 24266, June 4, 1982, as amended by Order 436, 50 FR 42490, Oct. 18, 1985; Order 603, 64 FR 26606, May 14, 1999]

### § 157.202 Definitions.

(a) *General rule.* Terms defined in the Natural Gas Policy Act of 1978 (NGPA) shall have the same meaning for the purposes of this subpart as they have under the Natural Gas Policy Act of 1978.

(b) *Subpart F definitions.* For purposes of this subpart:

(1) *Certificate holder* means any interstate pipeline with an effective blanket certificate issued pursuant to this subpart.

(2)(i) *Eligible facility* means, except as provided in paragraph (b)(2)(ii) of this section, any facility subject to the Natural Gas Act jurisdiction of the Commission that is necessary to provide service within existing certificated levels. Eligible facility also includes any gas supply facility or any facility, including receipt points, needed by the certificate holder to receive gas into its system for further transport or storage, and interconnecting facilities between transporters that transport natural gas under part 284 of this chapter. Further, eligible facility includes main line, lateral, and compressor replacements that do not qualify under § 2.55(b) of this chapter because they will result in an incidental increase in the capacity of main line facilities, or because they will not satisfy the location or work space requirements of § 2.55(b). Replacements must be done for sound engineering purposes. Replacements for the primary purpose of creating additional main line capacity are not eligible facilities; however, replacements and the modification of facilities to rearrange gas flows or increase compression for the primary purpose of restoring service in an emergency due to sudden unforeseen damage to main line facilities are eligible facilities.

(ii) *Exclusions:* “Eligible facility” does not include:

(A) A main line of a transmission system, except replacement facilities covered under § 157.202(b)(2)(i).

(B) An extension of a main line, except replacement facilities covered under § 157.202(b)(2)(i).

(C) A facility, including compression and looping, that alters the capacity of a main line, except replacement facilities and facility modifications covered
