

## § 801.8

practical use of waste utilization and treatment technology.

(3) Promote and encourage State and local governments and industry to plan for regional waste water treatment and management.

(4) In cooperation with appropriate agencies of the signatory parties, make periodic inspections to ascertain the state of compliance with appropriate water quality standards, and as needed establish and operate water quality monitoring stations.

[38 FR 4662, Feb. 20, 1973, as amended at 38 FR 6386, Mar. 9, 1973]

## § 801.8 Flood plain management and protection.

(a) Periodic inundation of lands along waterways has not discouraged development of flood hazards areas. Major floods cause loss of life, extensive damages, and other conditions not in the public interest. A balanced flood plain management and protection program is needed to reduce the flood hazard to a minimum.

(b) The Commission may regulate the use of flood prone lands with approval of the appropriate signatory party, to safeguard public health, welfare, safety and property, and to sustain economic development.

(c) To foster sound flood plain controls, as an essential part of water resources management, the Commission shall:

(1) Encourage and coordinate the efforts of the signatory parties to control modification of the Susquehanna River and its tributaries by encroachment.

(2) Plan and promote implementation of projects and programs of a structural and nonstructural nature for the protection of flood plains subject to frequent flooding.

(3) Assist in the study and classification of flood prone lands to ascertain the relative risk of flooding, and establish standards for flood plain management.

(4) Promote the use of flood insurance by helping localities qualify for the national program.

(5) Assist in the development of a modern flood forecasting and warning system.

## 18 CFR Ch. VIII (4-1-07 Edition)

## § 801.9 Watershed management.

(a) The character, extent, and quality of water resources of a given watershed are strongly affected by the land use practices within that watershed. Accordingly the Commission will maintain close liaison with Federal, State, and local highway, mining, soil, forest, fish and wildlife, and recreation agencies and with government agencies dealing with urban and residential development programs.

(b) The Commission shall:

(1) Promote sound practices of watershed management including soil and water conservation measures, land restoration and rehabilitation, erosion control, forest management, improvement of fish and wildlife habitat, and land use in highway, urban, and residential development as related to water resources.

## § 801.10 Recreation.

(a) The use of surface water resources of the basin for recreation purposes is extensive. Swimming, fishing, boating, and other water oriented activities have regional and local economic benefit as well as recreational benefit.

(b) The Commission shall cooperate with public and private agencies in the planning and development of water-related recreation and fish and wildlife programs and projects within the basin and shall:

(1) Promote public access to and recreational use of existing and future public water areas.

(2) Promote recreational use of public water supply reservoirs and lakes where adequate treatment of water is provided, and/or where recreational uses are compatible with primary project purposes.

(3) Include recreation as a purpose where feasible, in multipurpose water use planning of reservoirs and other water bodies.

## § 801.11 Public values.

(a) The basin has many points of archeological and historic interest, and is well endowed with vistas of aesthetic significance.

(b) The Commission fully recognizes that the value of these areas cannot be measured simply in economic terms and will strive to preserve and promote

them for the enjoyment and enrichment of present and future generations.

(c) The Commission shall:

(1) Seek the advice and assistance of appropriate societies and governmental agencies in the identification of archeological, historic, and scenic areas and unique lands in any planning or development affecting these attributes of the basin.

#### § 801.12 Electric power generation.

(a) Significant uses are presently being made of the waters of the basin for the generation of electric power at hydro, pumped storage, and thermoelectric generating stations. Increased demands for electric power throughout the East Coast can be expected to result in proposals for the development of additional electric power generating stations located either in the basin or nearby its borders.

(b) There appears to be limited site potential in the basin for additional hydroelectric generation, and considerable potential for additional pumped storage and thermoelectric generation. The direct and indirect effects of existing and proposed electric generation projects will be considered by the Commission. Items of concern will include consumptive uses of water, alteration of natural stream regimen, effects on water quality, and on the other uses of the streams affected.

(c) The Commission, in cooperation with appropriate agencies of the signatory parties, and with other public and private agencies shall:

(1) Conduct a thorough review of applications to relicense existing electric power generating projects and facilities, and applications to amend existing licenses to determine if the proposal is in accord with the comprehensive plan.

(2) Require that the proposed siting and location in the basin of any type of electric generating facility or any facility located outside the basin having an effect on the waters of the basin, shall be planned in direct consultation with the Commission to enable advance consideration of the possible effects of such installation on the water resources of the basin.

#### § 801.13 Proviso.

(a) This part is promulgated pursuant to sections 3.1, 3.5(1), and 15.2 of the Compact and shall be construed and applied subject to all of the terms and conditions of the Compact and of the provisions of Pub. L. 91-575, 84 Stat. 1509: *Provided*, Any provision in this statement of general policies that is inconsistent with the Compact itself shall be null and void.

### PARTS 803-805 [RESERVED]

## PART 806—REVIEW AND APPROVAL OF PROJECTS

### Subpart A—General Provisions

Sec.

- 806.1 Scope.
- 806.2 Purposes.
- 806.3 Definitions.
- 806.4 Projects requiring review and approval.
- 806.5 Projects that may require review and approval.
- 806.6 Transfer of approvals.
- 806.7 Concurrent project review by member jurisdictions.
- 806.8 Waiver/modification.

### Subpart B—Application Procedure

- 806.10 Purpose of this subpart.
- 806.11 Preliminary consultations.
- 806.12 Constant-rate aquifer testing.
- 806.13 Submission of application.
- 806.14 Contents of application.
- 806.15 Notice of application.
- 806.16 Completeness of application.

### Subpart C—Standards for Review and Approval

- 806.20 Purpose of this subpart.
- 806.21 General standards.
- 806.22 Standards for consumptive uses of water.
- 806.23 Standards for water withdrawals.
- 806.24 Standards for diversions.
- 806.25 Water conservation standards.

### Subpart D—Terms and Conditions of Approval

- 806.30 Monitoring.
- 806.31 Term of approvals.
- 806.32 Reopening/modification.
- 806.33 Interest on fees.
- 806.34 Emergencies.
- 806.35 Fees.

AUTHORITY: Secs. 3.4, 3.5 (5), 3.8, 3.10, and 15.2, Pub. L. 91-575, 84 Stat. 1509, *et seq.*
