

each contact or group of related contacts in the rulemaking docket when it is opened.

*5. Does DOT policy permit ex parte contacts during the comment period?*

No, during the comment period, the public docket is available for written comments from any member of the public. These comments can be examined and responded to by any interested person. Because this public forum is available, DOT policy discourages ex parte contacts during the comment period. They are not necessary to collect the information the agency needs to make its decision.

*6. What if the FAA believes it needs to meet with members of the public to discuss the proposal?*

If the FAA determines that it would be helpful to invite members of the public to make oral presentations to it regarding the proposal, we will announce a public meeting in the FEDERAL REGISTER.

*7. Are any oral contacts concerning the proposal permitted during the comment period?*

If you contact the agency with questions regarding the proposal during the comment period, we can only provide you with information that has already been made available to the general public. If you contact the agency to discuss the proposal, you will be told that the proper avenue of communication during the comment period is a written communication to the docket.

*8. If a substantive ex parte contact does occur during the comment period, what does FAA do?*

While FAA tries to ensure that FAA personnel and the public are aware of DOT policy, substantive ex parte contacts do occasionally occur, for example, at meetings not intended for that purpose. In such a case, we place a summary of the contact and a copy of any materials provided at the meeting in the rulemaking docket. We encourage participants in such a meeting to file written comments in the docket.

*9. Does DOT policy permit ex parte contacts the comment period has closed?*

DOT policy strongly discourages ex parte contacts initiated by commenters to discuss their position on the proposal once the comment period has closed. Such a contact at this time would be improper, since other interested persons would not have an opportunity to respond. If we need further information regarding a comment in the docket, we may request this from a commenter. A record of this contact and the information provided is placed in the docket. If we need to make other contacts to update factual information, such as economic data, we will disclose this information in the final rule docket or in the economic studies accom-

panying it, which are available in the docket.

*10. What if FAA needs to meet with interested persons to discuss the proposal after the comment period has closed?*

If FAA determines that it would be helpful to meet with a person or group after the close of the comment period to discuss a course of action to be taken, we will announce the meeting in the FEDERAL REGISTER. We will also consider reopening the comment period. If an inappropriate ex parte contact does occur after the comment period closes, a summary of the contact and a copy of any material distributed during meeting will be placed in the docket if it could be seen as influencing the rulemaking process.

*11. Under what circumstances will FAA reopen the comment period?*

If we receive an ex parte communication after the comment period has closed that could substantially influence the rulemaking, we may reopen the comment period. DOT policy requires the agency to carefully consider whether the substance of the contact will give the commenter an unfair advantage, since the rest of the public may not see the record of the contact in the docket. When the substance of a proposed rule is significantly changed as a result of such an oral communication, DOT policy and practice requires that the comment period be reopened by issuing a supplemental NPRM in which the reasons for the change are discussed.

*12. What if I have important information for FAA and the comment period is closed?*

You may always provide FAA with written information after the close of the comment period and it will be considered if time permits. Because contacts after the close of the comment may not be seen by other interested persons, if they substantially and specifically influence the FAA's decision, we may need to reopen the comment period.
