

Cancer Institute is sponsoring clinical trials to explore new ways to improve ovarian cancer treatment. The Department of Defense will also dedicate an estimated \$10 million for its Ovarian Cancer Research Program, and the Centers for Disease Control and Prevention (CDC) will invest an estimated \$5 million to ovarian cancer research. The CDC is additionally partnering with private organizations to sponsor ovarian cancer survivor courses for patients, as well as their friends and loved ones, following successful cancer treatment.

During National Ovarian Cancer Awareness Month, we honor the victims and survivors of this disease for their courage, hope, and perseverance, and we thank the families and friends who provide these individuals with comfort and care. Our Nation is grateful to medical professionals, researchers, and all those whose tireless efforts are making a positive difference in the lives of countless women in our country. By working together, we can continue to fight ovarian cancer and help more of our citizens defeat this devastating disease.

NOW, THEREFORE, I, GEORGE W. BUSH, President of the United States of America, by virtue of the authority vested in me by the Constitution and laws of the United States, do hereby proclaim September 2006 as National Ovarian Cancer Awareness Month. I call upon government officials, businesses, communities, health care professionals, educators, volunteers, and the people of the United States to continue our Nation's strong commitment to preventing and treating ovarian cancer.

IN WITNESS WHEREOF, I have hereunto set my hand this twenty-ninth day of August, in the year of our Lord two thousand six, and of the Independence of the United States of America the two hundred and thirty-first.

GEORGE W. BUSH

### **Proclamation 8045 of August 29, 2006**

## **National Prostate Cancer Awareness Month, 2006**

*By the President of the United States of America  
A Proclamation*

The United States continues to move forward in its fight against cancer, yet an estimated 27,000 American sons, fathers, brothers, and husbands will be lost to prostate cancer this year. As we observe National Prostate Cancer Awareness Month, we underscore our commitment to defeating prostate cancer by raising awareness about its risk factors, promoting the importance of early detection and treatment, and advancing our understanding of the disease and how to stop it.

Medical research has shown that there are steps men can take to reduce their chance of developing prostate cancer. For many men, regular exercise and healthy eating habits may decrease the likelihood of developing this deadly disease. Men over the age of 50, African-American men, and men with family medical histories that include prostate cancer face the greatest risk—and they can realize the greatest benefits from early detection, when treatment is most effective. All men should discuss their risk of prostate

cancer with their physicians, determine the best screening and early-detection options, and adopt healthy lifestyles. Young men are also encouraged to find out whether a family member has ever been diagnosed with prostate cancer and to seek medical advice at an earlier age if a medical history exists.

The progress we have made in the battle against prostate cancer is remarkable, yet more work remains. America leads the world in cutting-edge medical research, and the Federal Government will continue to do its part to support work that will lead to better diagnostic tools and innovative treatments for prostate cancer. By providing substantial funding for programs at the National Institutes of Health, National Cancer Institute, Centers for Disease Control and Prevention, and Department of Defense, my Administration aims to improve our ability to prevent, detect, treat, and ultimately cure prostate cancer.

During National Prostate Cancer Awareness Month, America honors the victims and survivors of prostate cancer and applauds the family members and friends who provide love and encouragement. We also commend the medical professionals and researchers who are working to administer care, improve treatments, and find cures. Prostate cancer can be defeated, and we will continue this fight until the day when the battle to beat prostate cancer has been won.

NOW, THEREFORE, I, GEORGE W. BUSH, President of the United States of America, by virtue of the authority vested in me by the Constitution and laws of the United States, do hereby proclaim September 2006 as National Prostate Cancer Awareness Month. I call upon government officials, businesses, communities, health care professionals, educators, and the people of the United States to reaffirm our Nation's strong and ongoing campaign against prostate cancer.

IN WITNESS WHEREOF, I have hereunto set my hand this twenty-ninth day of August in the year of our Lord two thousand six, and of the Independence of the United States of America the two hundred and thirty-first.

GEORGE W. BUSH

### **Proclamation 8046 of September 5, 2006**

### **National Days of Prayer and Remembrance, 2006**

*By the President of the United States of America  
A Proclamation*

This year, we mark the fifth anniversary of the brutal and ruthless terrorist attacks carried out against our Nation on September 11, 2001. We will always remember the thousands of lives lost, and the innocent men, women, and children forever changed by those acts of evil. During these National Days of Prayer and Remembrance, we honor the heroism of the police officers, firefighters, rescue personnel, members of the military, and private citizens who responded selflessly in the face of terror. We also honor the courage and spirit of the mothers and fathers, sons and daughters, brothers
