### § 1645.5 Calculation of share prices.

(a) *Calculation of share price.* The share price for each TSP Fund for each business day will apply to all sources of contributions for that fund. The total net earnings (as computed under § 1645.3) for each fund will be divided by the total fund basis (as computed under § 1645.6) for that fund. The resulting number, computed to ten decimal places, represents the incremental change in the value of that fund from the last business day to the current business day. The share price for that fund for the current business day is the sum of the incremental change in the share price for the current business day
