

§3.10

36 CFR Ch. I (7-1-07 Edition)

(b) Where authorized, operation of a PWC on park waters is subject to the following conditions:

(1) No person may operate a PWC unless each person aboard is wearing a Type I, II, III, or V PFD approved by the United States Coast Guard.

(2) A person operating a PWC equipped by the manufacturer with a lanyard-type engine cut-off switch must attach such lanyard to his person, clothing, or PFD, as appropriate for the specific vessel.

(3) No person may operate a PWC anytime between sunset and sunrise.

(4) No person may operate a PWC by jumping the wake, becoming partially airborne or completely leaving the water while crossing the wake of another vessel within 100 feet of the vessel creating the wake.

(5) If a park area is located within a State that has more restrictive regulations for the operation of PWC, then applicable State law applies in lieu of paragraphs (b)(1) through (b)(4) of this section.

§3.10 What are the regulations regarding operating a vessel while under the influence of alcohol and/or drugs?

(a) Operating or being in actual physical control of a vessel is prohibited while:

(1) Under the influence of alcohol, a drug or drugs, or any combination thereof, to a degree that renders the operator incapable of safe operation; or

(2) The alcohol concentration in the operator's blood or breath is 0.08 grams or more of alcohol per 100 milliliters of blood or 0.08 grams or more of alcohol per 210 liters of breath.

(b) If State law that applies to operating a vessel while under the influence of alcohol establishes more restrictive limits of alcohol concentration in the operator's blood or breath, those limits apply rather than the limits specified in paragraph (a) of this section.

(c) The provisions of this section also apply to an operator who is or has been legally entitled to use alcohol or drugs.

§3.11 When is testing for alcohol or drugs required?

(a) At the request or direction of an authorized person who has probable cause to believe that an operator of a

vessel has violated provisions of §3.10, the operator must submit to one or more testing procedures of the blood, breath, saliva or urine for the purpose of determining blood alcohol and/or drug content.

(1) Refusal by an operator to submit to a test is prohibited and proof of refusal may be admissible in any related judicial proceeding.

(2) Any test or tests for the presence of alcohol and drugs must be determined by and administered at the direction of an authorized person.

(3) Any test must be conducted by using accepted scientific methods and equipment of proven accuracy and reliability operated by personnel certified in its use.

(b) The results of chemical or other quantitative tests are intended to supplement the elements of probable cause used as the basis for the arrest of an operator charged with a violation of §13.10. If the alcohol concentration in the operator's blood or breath at the time of testing is less than alcohol concentrations specified in §13.10(a)(2), this fact does not give rise to any presumption that the operator is or is not under the influence of alcohol.

(c) The provisions of paragraph (b) of this section are not intended to limit the introduction of any other competent evidence bearing upon the question of whether the operator, at the time of the alleged violation, was under the influence of alcohol, or a drug, or drugs, or any combination thereof.

§3.12 May I use a vessel to tow a person for water skiing or other similar activities?

(a) The towing of a person by a vessel is allowed only in designated waters, and in accordance with conditions established by the superintendent under §§1.5 and 1.7 of this chapter.

(b) Towing a person using a parasail, hang-glider or other airborne device may be allowed only in accordance with a permit issued by the superintendent under §1.6 of this chapter.

(c) Where towing is designated, the following conditions apply:

(1) Towing is allowed only between the hours of sunrise and sunset.

National Park Service, Interior

§ 3.17

(2) In addition to the boat operator, a person at least 12 years of age must be present to observe the action of the person being towed.

(3) A person being towed must wear a United States Coast Guard approved Type I, II, III, or V PFD.

(4) A person being towed may not commit any act in a manner that endangers, or is likely to endanger, any person or damage property.

(5) Operating a vessel that does not have the capacity to carry the person(s) being towed in addition to the operator and observer is prohibited.

(6) No person shall operate a power driven vessel using a tow rope 20 feet or less in length when towing a person.

§ 3.13 What conditions apply to the use of Marine Sanitation Devices (MSD)?

(a) Discharging sewage from any vessel, whether treated or not, in any body of fresh water is prohibited.

(b) The owner or operator of any vessel on park fresh water that is equipped with toilet facilities and/or a MSD that is capable of discharge, must lock or otherwise secure the valves or mechanism of the device. Acceptable methods of securing the device include:

(1) Closing the seacock and removing the handle;

(2) Padlocking the seacock in the closed position;

(3) Using a non-releasable wire-tie to hold the seacock in the closed position; or

(4) Locking the door to the space enclosing the toilets with a padlock or door handle key lock.

(c) The superintendent may modify the requirements of this section through a special regulation.

§ 3.14 Am I required to remove a sunken, grounded, or disabled vessel?

(a) Except as provided in paragraph (b) of this section, the owners or authorized salvager of a sunken, grounded, or disabled vessel must remove the vessel, all component parts and equipment, and all associated cargo thereof in accordance with procedures established by the superintendent. In establishing removal procedures, the superintendent is authorized to:

(1) Establish a reasonable date by which vessel removal operations must be complete;

(2) Determine times and means of access to and from the vessel; and

(3) Specify the manner or method of removal.

(b) The superintendent may waive the requirements of paragraph (a) of this section or prohibit removal of the vessel, equipment, or cargo upon a written determination that:

(1) The removal would constitute an unacceptable risk to human life;

(2) The removal would result in extensive resource damage; or

(3) The removal is impracticable or impossible.

§ 3.15 What is the maximum noise level for the operation of a vessel?

(a) A person may not operate a vessel at a noise level exceeding:

(1) 75dB(A) measured utilizing test procedures applicable to vessels underway (Society of Automotive Engineers SAE—J1970); or

(2) 88dB(A) measured utilizing test procedures applicable to stationary vessels (Society of Automotive Engineers SAE—J2005).

(b) An authorized person who has reason to believe that a vessel is being operated in excess of the noise levels established in paragraph (a) of this section may direct the operator of the vessel to submit the vessel to an on-site test to measure the noise level.

§ 3.16 May I swim or wade in park waters?

Swimming or wading is allowed in waters, subject to closures or restrictions designated by the superintendent in accordance with §§ 1.5 and 1.7 of this chapter.

§ 3.17 What regulations apply to swimming areas and beaches?

(a) The superintendent may designate areas as swimming areas or swimming beaches in accordance with §§ 1.5 and 1.7 of this chapter.

(b) Within designated swimming areas, the use of a surfboard or similar rigid device is prohibited.
