

Environmental Protection Agency

§ 165.3

feasible, as determined by the presiding officer, the procedures at the hearing shall follow the Rules of Practice, set forth in subparts A and B of this part 164.

§ 164.133 Emergency waiver of hearing.

(a) In the case of an application subject to this subpart D which is filed under section 18 of FIFRA, and regulations thereunder, and for which a hearing is required pursuant to § 164.131, the Administrator may dispense with the requirement of convening such a hearing in any case in which he determines:

(1) That the application presents a situation involving need to use the pesticide to prevent an unacceptable risk: (i) To human health, or (ii) to fish or wildlife populations when such use would not pose a human health hazard; and

(2) That there is no other feasible solution to such risk; and

(3) That the time available to avert the risk to human health or fish and wildlife is insufficient to permit convening a hearing as required by § 164.131; and

(4) That the public interest requires the granting of the requested use as soon as possible.

(b) Notice of any determination made by the Administrator pursuant to paragraph (a) of this section shall be published in the FEDERAL REGISTER as soon as practicable after granting the requested use and shall set forth the basis for the Administrator's determination.

PART 165—PESTICIDE MANAGEMENT AND DISPOSAL

Subpart A—General

Sec.

- 165.1 Scope.
- 165.3 Definitions.
- 165.4–165.19 [Reserved]

Subpart B—Nonrefillable Container Standards: Container Design and Residue Removal

- 165.20 General provisions.
- 165.23 Scope of pesticide products included.
- 165.25 Nonrefillable container standards.
- 165.27 Reporting and recordkeeping.
- 165.28–165.39 [Reserved]

Subpart C—Refillable Container Standards: Container Design

- 165.40 General provisions.
- 165.43 Scope of pesticide products included.
- 165.45 Refillable container standards.
- 165.47 What information must I report about my refillable containers?
- 165.48–165.59 [Reserved]

Subpart D—Standards for Repackaging Pesticide Products into Refillable Containers

- 165.60 General provisions.
- 165.63 Scope of pesticide products included.
- 165.65 Registrants who distribute or sell pesticide products in refillable containers.
- 165.67 Registrants who distribute or sell pesticide products to refillers for repackaging.
- 165.70 Refillers who are not registrants.
- 165.71–165.79 [Reserved]

Subpart E—Standards for Pesticide Containment Structures

- 165.80 General provisions.
- 165.81 Scope of stationary pesticide containers included.
- 165.82 Scope of pesticide dispensing areas included.
- 165.83 Definition of new and existing structures.
- 165.85 Design and capacity requirements for new structures.
- 165.87 Design and capacity requirements for existing structures.
- 165.90 Operational, inspection and maintenance requirements for all new and existing containment structures.
- 165.92 What if I need both a containment pad and a secondary containment unit?
- 165.95 What recordkeeping do I have to do as a facility owner or operator?
- 165.97 States with existing containment programs.

AUTHORITY: 7 U.S.C. 136 through 136y.

SOURCE: 71 FR 47422, Aug. 16, 2006, unless otherwise noted.

Subpart A—General

§ 165.1 Scope.

The Part 165 regulations establish standards and requirements for pesticide containers, repackaging pesticides, and pesticide containment structures.

§ 165.3 Definitions.

Act means the Federal Insecticide, Fungicide, and Rodenticide Act.

Agricultural pesticide means any pesticide product labeled for use in a nursery or greenhouse or for use in the production of any agricultural commodity, including any plant, plant part, animal, or animal product produced by persons (including farmers, ranchers, vineyardists, plant propagators, Christmas tree growers, aquaculturalists, horticulturists, orchardists, foresters, or other comparable persons) primarily for sale, consumption, propagation or other use by man or animals.

Appurtenance means any equipment or device which is used for the purpose of transferring a pesticide from a stationary pesticide container or to any refillable container, including but not limited to, hoses, fittings, plumbing, valves, gauges, pumps and metering devices.

Container means any package, can, bottle, bag, barrel, drum, tank, or other containing-device (excluding any application tanks) used to enclose a pesticide. Containers that are used to sell or distribute a pesticide product and that also function in applying the product (such as spray bottles, aerosol cans and containers that become part of a direct injection system) are considered to be containers for the purposes of this part.

Containment pad means any structure that is designed and constructed to intercept and contain pesticides, rinsates, and equipment wash water at a pesticide dispensing area.

Containment structure means either a secondary containment unit or a containment pad.

Custom blending means the service of mixing pesticides to a customer's specifications, usually a pesticide(s)-fertilizer(s), pesticide-pesticide, or a pesticide-animal feed mixture, when:

- (1) The blend is prepared to the order of the customer and is not held in inventory by the blender;
- (2) The blend is to be used on the customer's property (including leased or rented property);
- (3) The pesticide(s) used in the blend bears end-use labeling directions which do not prohibit use of the product in such a blend;
- (4) The blend is prepared from registered pesticides; and

(5) The blend is delivered to the end-user along with a copy of the end-use labeling of each pesticide used in the blend and a statement specifying the composition of the mixture.

Dry pesticide means any pesticide that is in solid form and that has not been combined with liquids; this includes formulations such as dusts, wettable powders, dry flowable powders, granules, and dry baits.

Establishment means any site where a pesticidal product, active ingredient, or device is produced, regardless of whether such site is independently owned or operated, and regardless of whether such site is domestic and producing a pesticidal product for export only, or whether the site is foreign and producing any pesticidal product for import into the United States.

Facility means all buildings, equipment, structures, and other stationary items which are located on a single site or on contiguous or adjacent sites and which are owned or operated by the same person (or by any person who controls, who is controlled by, or who is under common control with such person).

Flowable concentrate means a stable suspension of active ingredients in a liquid intended for dilution with water before use.

Nonrefillable container means a container that is not a refillable container and that is designed and constructed for one time containment of a pesticide for sale or distribution. Reconditioned containers are considered to be non-refillable containers.

One-way valve means a valve that is designed and constructed to allow virtually unrestricted flow in one direction and no flow in the opposite direction, thus allowing the withdrawal of material from, but not the introduction of material into, a container.

Operator means any person in control of, or having responsibility for, the daily operation of a facility at which a containment structure is located.

Owner means any person who owns a facility at which a containment structure is required.

Pesticide compatible means, as applied to containers, that the container construction materials will not chemically

react with the formulation. A container is not compatible with the formulation if, for example, the formulation:

- (1) Is corrosive to the container;
- (2) Causes softening, premature aging, or embrittlement of the container;
- (3) Otherwise causes the container to weaken or to create the risk of discharge;
- (4) Reacts in a significant chemical, electrolytic, or galvanic manner with the container, or
- (5) Interacts in a way, such as the active ingredient permeating the container wall, that would cause the formulation to differ from its composition as described in the statement required in connection with its registration under FIFRA section 3.

Pesticide compatible means, as applied to secondary containment, that the containment construction materials are able to withstand anticipated exposure to stored or transferred materials without losing the capacity to provide the required secondary containment of the same or other materials within the containment area.

Pesticide dispensing area means an area in which pesticide is transferred out of or into a container.

Portable pesticide container means a refillable container that is not a stationary pesticide container.

Pressure rinse means the flushing of the container to remove pesticide residue by using a pressure method with a pressure of at least 40 PSI.

Produce means to manufacture, prepare, propagate, compound, or process any pesticide, including any pesticide produced pursuant to section 5 of the Act, and any active ingredient or device, or to package, repackage, label, relabel, or otherwise change the container of any pesticide or device.

Producer means any person, as defined by the Act, who produces any pesticide, active ingredient, or device (including packaging, repackaging, labeling and relabeling).

Refillable container means a container that is intended to be filled with pesticide more than once for sale or distribution.

Refiller means a person who engages in the activity of repackaging pesticide

product into refillable containers. This could include a registrant or a person operating under contract to a registrant.

Refilling establishment means an establishment where the activity of repackaging pesticide product into refillable containers occurs.

Repackage means, for the purposes of this part, to transfer a pesticide formulation from one container to another without a change in the composition of the formulation, the labeling content, or the product's EPA registration number, for sale or distribution.

Rinsate means the liquid produced from the rinsing of the interior of any equipment or container that has come in direct contact with any pesticide.

Runoff means surface water leaving the target site.

Secondary containment unit means any structure, including rigid diking, that is designed and constructed to intercept and contain pesticide spills and leaks and to prevent runoff and leaching from stationary pesticide containers.

Stationary pesticide container means a refillable container that is fixed at a single facility or establishment or, if not fixed, remains at the facility or establishment for at least 30 consecutive days, and that holds pesticide during the entire time.

Tamper-evident device means a device which can be visually inspected to determine if a container has been opened.

Transport vehicle means a cargo-carrying vehicle such as an automobile, van, tractor, truck, semitrailer, tank car or rail car used for the transportation of cargo by any mode.

Triple rinse means the flushing of the container three times to remove pesticide residue by using a non-pressurized method.

Washwater means the liquid produced from the rinsing of the exterior of any equipment or containers that have or may have come in direct contact with any pesticide or system maintenance compound.
