

**§273.81 Factors for petitions to include other wastes under 40 CFR part 273.**

(a) The waste or category of waste, as generated by a wide variety of generators, is listed in subpart D of part 261 of this chapter, or (if not listed) a proportion of the waste stream exhibits one or more characteristics of hazardous waste identified in subpart C of part 261 of this chapter. (When a characteristic waste is added to the universal waste regulations of this part 273 by using a generic name to identify the waste category (e.g., batteries), the definition of universal waste in §260.10 of this chapter and §273.9 will be amended to include only the hazardous waste portion of the waste category (e.g., hazardous waste batteries).) Thus, only the portion of the waste stream that does exhibit one or more characteristics (i.e., is hazardous waste) is subject to the universal waste regulations of this part 273;

(b) The waste or category of waste is not exclusive to a specific industry or group of industries, is commonly generated by a wide variety of types of establishments (including, for example, households, retail and commercial businesses, office complexes, conditionally exempt small quantity generators, small businesses, government organizations, as well as large industrial facilities);

(c) The waste or category of waste is generated by a large number of generators (e.g., more than 1,000 nationally) and is frequently generated in relatively small quantities by each generator;

(d) Systems to be used for collecting the waste or category of waste (including packaging, marking, and labeling practices) would ensure close stewardship of the waste;

(e) The risk posed by the waste or category of waste during accumulation and transport is relatively low compared to other hazardous wastes, and specific management standards proposed or referenced by the petitioner (e.g., waste management requirements appropriate to be added to 40 CFR 273.13, 273.33, and 273.52; and/or applicable Department of Transportation requirements) would be protective of

human health and the environment during accumulation and transport;

(f) Regulation of the waste or category of waste under 40 CFR part 273 will increase the likelihood that the waste will be diverted from non-hazardous waste management systems (e.g., the municipal waste stream, non-hazardous industrial or commercial waste stream, municipal sewer or stormwater systems) to recycling, treatment, or disposal in compliance with Subtitle C of RCRA.

(g) Regulation of the waste or category of waste under 40 CFR part 273 will improve implementation of and compliance with the hazardous waste regulatory program; and/or

(h) Such other factors as may be appropriate.

[60 FR 25542, May 11, 1995, as amended at 64 FR 36490, July 6, 1999]

**PART 279—STANDARDS FOR THE MANAGEMENT OF USED OIL**

**Subpart A—Definitions**

Sec.  
279.1 Definitions.

**Subpart B—Applicability**

279.10 Applicability.  
279.11 Used oil specifications.  
279.12 Prohibitions.

**Subpart C—Standards for Used Oil Generators**

279.20 Applicability.  
279.21 Hazardous waste mixing.  
279.22 Used oil storage.  
279.23 On-site burning in space heaters.  
279.24 Off-site shipments.

**Subpart D—Standards for Used Oil Collection Centers and Aggregation Points**

279.30 Do-it-yourselfer used oil collection centers.  
279.31 Used oil collection centers.  
279.32 Used oil aggregate points owned by the generator.

**Subpart E—Standards for Used Oil Transporter and Transfer Facilities**

279.40 Applicability.  
279.41 Restrictions on transporters who are not also processors or re-refiners.  
279.42 Notification.  
279.43 Used oil transportation.  
279.44 Rebuttable presumption for used oil.
