

## § 64.401

such carriers shall, to the extent specifically ordered by the Commission, deny equivalent services or facilities in the United States to such foreign government for communications between the United States and the territory of that foreign government or any other point.

(Secs. 201, 214, 303, 308, 48 Stat. 1075, 1082, 1085; 47 U.S.C. 201, 214, 303, 308)

[28 FR 13242, Dec. 5, 1963]

### Subpart D—Procedures for Handling Priority Services in Emergencies

#### § 64.401 Policies and procedures for provisioning and restoring certain telecommunications services in emergencies.

The communications common carrier shall maintain and provision and, if disrupted, restore facilities and services in accordance with policies and procedures set forth in Appendix A to this part.

[65 FR 48396, Aug. 8, 2000]

#### § 64.402 Policies and procedures for the provision of priority access service by commercial mobile radio service providers.

Commercial mobile radio service providers that elect to provide priority access service to National Security and Emergency Preparedness personnel shall provide priority access service in accordance with the policies and procedures set forth in Appendix B to this part.

[65 FR 48396, Aug. 8, 2000]

### Subpart E—Use of Recording Devices by Telephone Companies

#### § 64.501 Recording of telephone conversations with telephone companies.

No telephone common carrier, subject in whole or in part to the Communications Act of 1934, as amended, may use any recording device in connection with any interstate or foreign telephone conversation between any member of the public, on the one hand, and any officer, agent or other person acting for or employed by any such tele-

## 47 CFR Ch. I (10–1–07 Edition)

phone common carrier, on the other hand, except under the following conditions:

(a) Where such use shall be preceded by verbal or written consent of all parties to the telephone conversation, or

(b) Where such use shall be preceded by verbal notification which is recorded at the beginning, and as part of the call, by the recording party, or

(c) Where such use shall be accompanied by an automatic tone warning device, which will automatically produce a distinct signal that is repeated at regular intervals during the course of the telephone conversation when the recording device is in use. *Provided That:*

(1) The characteristics of the warning tone shall be the same as those specified in the Orders of this Commission adopted by it in “Use of Recording Devices in Connection With Telephone Service,” Docket 6787, 11 FCC 1033 (1947); 12 FCC 1005 (November 26, 1947); 12 FCC 1008 (May 20, 1948).

(d) That the characteristics of the warning tone shall be the same as those specified in the Orders of this Commission adopted by it in “Use of Recording Devices in Connection With Telephone Service,” Docket 6787; 11 F.C.C. 1033 (1947); 12 F.C.C. 1005 (November 26, 1947); 12 F.C.C. 1008 (May 20, 1948);

(e) That no recording device shall be used unless it can be physically connected to and disconnected from the telephone line or switched on and off.

(Secs. 2, 3, 4, 5, 301, 303, 307, 308, 309, 315, 317; 48 Stat., as amended, 1064, 1065, 1066, 1068, 1081, 1082, 1083, 1084, 1085, 1089; 47 U.S.C. 152, 153, 154, 155, 301, 303, 307, 308, 309, 315, 317)

[32 FR 11275, Aug. 3, 1967, as amended at 46 FR 29480, June 2, 1981; 52 FR 3654, Feb. 5, 1987]

### Subpart F—Telecommunications Relay Services and Related Customer Premises Equipment for Persons With Disabilities

SOURCE: 56 FR 36731, Aug. 1, 1991, unless otherwise noted.

#### § 64.601 Definitions.

As used in this subpart, the following definitions apply:

(1) *711*. The abbreviated dialing code for accessing relay services anywhere in the United States.

(2) *American Sign Language (ASL)*. A visual language based on hand shape, position, movement, and orientation of the hands in relation to each other and the body.

(3) *ASCII*. An acronym for American Standard Code for Information Inter-exchange which employs an eight bit code and can operate at any standard transmission baud rate including 300, 1200, 2400, and higher.

(4) *Baudot*. A seven bit code, only five of which are information bits. Baudot is used by some text telephones to communicate with each other at a 45.5 baud rate.

(5) *Call release*. A TRS feature that allows the CA to sign-off or be “released” from the telephone line after the CA has set up a telephone call between the originating TTY caller and a called TTY party, such as when a TTY user must go through a TRS facility to contact another TTY user because the called TTY party can only be reached through a voice-only interface, such as a switchboard.

(6) *Common carrier or carrier*. Any common carrier engaged in interstate Communication by wire or radio as defined in section 3(h) of the Communications Act of 1934, as amended (the Act), and any common carrier engaged in intrastate communication by wire or radio, notwithstanding sections 2(b) and 221(b) of the Act.

(7) *Communications assistant (CA)*. A person who transliterates or interprets conversation between two or more end users of TRS. CA supersedes the term “TDD operator.”

(8) *Hearing carry over (HCO)*. A form of TRS where the person with the speech disability is able to listen to the other end user and, in reply, the CA speaks the text as typed by the person with the speech disability. The CA does not type any conversation. Two-line HCO is an HCO service that allows TRS users to use one telephone line for hearing and the other for sending TTY messages. HCO-to-TTY allows a relay conversation to take place between an HCO user and a TTY user. HCO-to-HCO allows a relay conversation to take place between two HCO users.

(9) *Non-English language relay service*. A telecommunications relay service that allows persons with hearing or speech disabilities who use languages other than English to communicate with voice telephone users in a shared language other than English, through a CA who is fluent in that language.

(10) *Qualified interpreter*. An interpreter who is able to interpret effectively, accurately, and impartially, both receptively and expressively, using any necessary specialized vocabulary.

(11) *Public Safety Answering Point (PSAP)*. A facility that has been designated to receive 911 calls and route them to emergency services personnel as provided in 47 CFR 64.3000(c).

(12) *Speech-to-speech relay service (STS)*. A telecommunications relay service that allows individuals with speech disabilities to communicate with voice telephone users through the use of specially trained CAs who understand the speech patterns of persons with speech disabilities and can repeat the words spoken by that person.

(13) *Speed dialing*. A TRS feature that allows a TRS user to place a call using a stored number maintained by the TRS facility. In the context of TRS, speed dialing allows a TRS user to give the CA a short-hand” name or number for the user’s most frequently called telephone numbers.

(14) *Telecommunications relay services (TRS)*. Telephone transmission services that provide the ability for an individual who has a hearing or speech disability to engage in communication by wire or radio with a hearing individual in a manner that is functionally equivalent to the ability of an individual who does not have a hearing or speech disability to communicate using voice communication services by wire or radio. Such term includes services that enable two-way communication between an individual who uses a text telephone or other nonvoice terminal device and an individual who does not use such a device, speech-to-speech services, video relay services and non-English relay services. TRS supersedes the terms “dual party relay system,” “message relay services,” and “TDD Relay.”

§ 64.602

47 CFR Ch. I (10-1-07 Edition)

(15) *Text telephone (TTY)*. A machine that employs graphic communication in the transmission of coded signals through a wire or radio communication system. TTY supersedes the term “TDD” or “telecommunications device for the deaf,” and TT.

(16) *Three-way calling feature*. A TRS feature that allows more than two parties to be on the telephone line at the same time with the CA.

(17) *Video relay service (VRS)*. A telecommunications relay service that allows people with hearing or speech disabilities who use sign language to communicate with voice telephone users through video equipment. The video link allows the CA to view and interpret the party’s signed conversation and relay the conversation back and forth with a voice caller.

(18) *Voice carry over (VCO)*. A form of TRS where the person with the hearing disability is able to speak directly to the other end user. The CA types the response back to the person with the hearing disability. The CA does not voice the conversation. Two-line VCO is a VCO service that allows TRS users to use one telephone line for voicing and the other for receiving TTY messages. A VCO-to-TTY TRS call allows a relay conversation to take place between a VCO user and a TTY user. VCO-to-VCO allows a relay conversation to take place between two VCO users.

[68 FR 50976, Aug. 25, 2003, as amended at 69 FR 53351, Sept. 1, 2004]

EFFECTIVE DATE NOTE: At 72 FR 43559, Aug. 6, 2007, §64.601 was amended by: a. Revising the section heading; b. redesignating the introductory text as paragraph (a) introductory text; c. redesignating paragraphs (1) through (18) as paragraphs (a)(1) through (a)(18); d. redesignating newly designated paragraphs (a)(9) through (a)(18) as paragraphs (a)(10) through (a)(19), respectively; e. adding a new paragraph (a)(9); and f. adding a new paragraph, effective Oct. 5, 2007. For the convenience of the user, the added and revised text is set forth as follows:

§64.601 Definitions and provisions of general applicability.

(a) \* \* \*

(9) Interconnected VoIP service. An interconnected Voice over Internet protocol (VoIP) service is a service that:

(i) Enables real-time, two-way voice communications;

(ii) Requires a broadband connection from the user’s location;

(iii) Requires Internet protocol-compatible customer premises equipment (CPE); and

(iv) Permits users generally to receive calls that originate on the public switched telephone network and to terminate calls to the public switched telephone network.

\* \* \* \* \*

(b) For purposes of this subpart, all regulations and requirements applicable to common carriers shall also be applicable to providers of interconnected VoIP service.

§ 64.602 Jurisdiction.

Any violation of this subpart F by any common carrier engaged in intrastate communication shall be subject to the same remedies, penalties, and procedures as are applicable to a violation of the Act by a common carrier engaged in interstate communication.

[65 FR 38436, June 21, 2000]

§ 64.603 Provision of services.

Each common carrier providing telephone voice transmission services shall provide, not later than July 26, 1993, in compliance with the regulations prescribed herein, throughout the area in which it offers services, telecommunications relay services, individually, through designees, through a competitively selected vendor, or in concert with other carriers. Speech-to-speech relay service and interstate Spanish language relay service shall be provided by March 1, 2001. In addition, each common carrier providing telephone voice transmission services shall provide, not later than October 1, 2001, access via the 711 dialing code to all relay services as a toll free call. A common carrier shall be considered to be in compliance with these regulations:

(a) With respect to intrastate telecommunications relay services in any state that does not have a certified program under §64.605 and with respect to interstate telecommunications relay services, if such common carrier (or other entity through which the carrier is providing such relay services) is in compliance with §64.604; or

(b) With respect to intrastate telecommunications relay services in any state that has a certified program under §64.605 for such state, if such
