

(2) Ensure that the in-flight security coordinator notifies all crewmembers of the threat, any evaluation thereof, and any measures to be applied; and

(3) Immediately notify the appropriate airport operator.

(b) *Flight: Inspection.* Upon receipt of a specific and credible threat to the security of a flight, each aircraft operator must attempt to determine whether or not any explosive or incendiary is present by doing the following:

(1) Conduct a security inspection on the ground before the next flight or, if the aircraft is in flight, immediately after its next landing.

(2) If the aircraft is on the ground, immediately deplane all passengers and submit that aircraft to a security search.

(3) If the aircraft is in flight, immediately advise the pilot in command of all pertinent information available so that necessary emergency action can be taken.

(c) *Ground facility.* Upon receipt of a specific and credible threat to a specific ground facility at the airport, the aircraft operator must:

(1) Immediately notify the appropriate airport operator.

(2) Inform all other aircraft operators and foreign air carriers at the threatened facility.

(3) Conduct a security inspection.

(d) *Notification.* Upon receipt of any bomb threat against the security of a flight or facility, or upon receiving information that an act or suspected act of air piracy has been committed, the aircraft operator also must notify TSA. If the aircraft is in airspace under other than U.S. jurisdiction, the aircraft operator must also notify the appropriate authorities of the State in whose territory the aircraft is located and, if the aircraft is in flight, the appropriate authorities of the State in whose territory the aircraft is to land. Notification of the appropriate air traffic controlling authority is sufficient action to meet this requirement.

**§ 1544.305 Security Directives and Information Circulars.**

(a) TSA may issue an Information Circular to notify aircraft operators of security concerns. When TSA determines that additional security meas-

ures are necessary to respond to a threat assessment or to a specific threat against civil aviation, TSA issues a Security Directive setting forth mandatory measures.

(b) Each aircraft operator required to have an approved aircraft operator security program must comply with each Security Directive issued to the aircraft operator by TSA, within the time prescribed in the Security Directive for compliance.

(c) Each aircraft operator that receives a Security Directive must—

(1) Within the time prescribed in the Security Directive, verbally acknowledge receipt of the Security Directive to TSA.

(2) Within the time prescribed in the Security Directive, specify the method by which the measures in the Security Directive have been implemented (or will be implemented, if the Security Directive is not yet effective).

(d) In the event that the aircraft operator is unable to implement the measures in the Security Directive, the aircraft operator must submit proposed alternative measures and the basis for submitting the alternative measures to TSA for approval. The aircraft operator must submit the proposed alternative measures within the time prescribed in the Security Directive. The aircraft operator must implement any alternative measures approved by TSA.

(e) Each aircraft operator that receives a Security Directive may comment on the Security Directive by submitting data, views, or arguments in writing to TSA. TSA may amend the Security Directive based on comments received. Submission of a comment does not delay the effective date of the Security Directive.

(f) Each aircraft operator that receives a Security Directive or Information Circular and each person who receives information from a Security Directive or Information Circular must:

(1) Restrict the availability of the Security Directive or Information Circular, and information contained in either document, to those persons with an operational need-to-know.

(2) Refuse to release the Security Directive or Information Circular, and information contained in either document, to persons other than those with

an operational need-to-know without the prior written consent of TSA.

### Subpart E—Screener Qualifications When the Aircraft Operator Performs Screening

#### § 1544.401 Applicability of this subpart.

(a) *Aircraft operator screening.* This subpart applies when the aircraft operator is conducting inspections as provided in § 1544.207(c).

(b) *Current screeners.* As used in this subpart, “current screener” means each individual who first performed screening functions before the date the aircraft operator must begin use of the new screener training program provided by TSA. Until November 19, 2002, each current screener must comply with § 1544.403. Until November 19, 2002, each aircraft operator must apply § 1544.403 for each current screener. On and after November 19, 2002, each such current screener must comply with §§ 1544.405 through 1544.411, and each aircraft operator must comply with §§ 1544.405 through 1544.411 for such individuals.

(c) *New screeners.* As used in this subpart, “new screener” means each individual who first performs screening functions on and after the date the aircraft operator must begin use of the new screener training program provided by TSA. Each aircraft operator must apply §§ 1544.405 through 1544.411 for individuals who first perform screening functions for new screeners.

#### § 1544.403 Current screeners.

This section applies to current screeners. This section no longer applies on and after November 19, 2002.

(a) No aircraft operator may use any person to perform any screening function, unless that person has:

(1) A high school diploma, a General Equivalency Diploma, or a combination of education and experience that the aircraft operator has determined to have equipped the person to perform the duties of the position.

(2) Basic aptitudes and physical abilities including color perception, visual and aural acuity, physical coordination, and motor skills to the following standards:

(i) Screeners operating X-ray equipment must be able to distinguish on the X-ray monitor the appropriate imaging standard specified in the aircraft operator’s security program. Wherever the X-ray system displays colors, the operator must be able to perceive each color;

(ii) Screeners operating any screening equipment must be able to distinguish each color displayed on every type of screening equipment and explain what each color signifies;

(iii) Screeners must be able to hear and respond to the spoken voice and to audible alarms generated by screening equipment in an active checkpoint environment;

(iv) Screeners performing physical searches or other related operations must be able to efficiently and thoroughly manipulate and handle such baggage, containers, and other objects subject to security processing; and

(v) Screeners who perform pat-downs or hand-held metal detector searches of persons must have sufficient dexterity and capability to thoroughly conduct those procedures over a person’s entire body.

(3) The ability to read, speak, and write English well enough to—

(i) Carry out written and oral instructions regarding the proper performance of screening duties;

(ii) Read English language identification media, credentials, airline tickets, and labels on items normally encountered in the screening process;

(iii) Provide direction to and understand and answer questions from English-speaking persons undergoing screening; and

(iv) Write incident reports and statements and log entries into security records in the English language.

(4) Satisfactorily completed all initial, recurrent, and appropriate specialized training required by the aircraft operator’s security program, except as provided in paragraph (b) of this section.

(b) The aircraft operator may use a person who has not completed the training required by paragraph (a)(4) of this section during the on-the-job portion of training to perform security functions provided that the person:

(1) Is closely supervised, and
