(b) Each submission of geophysical data or information shall contain, unless otherwise specified by the Regional Director, the following:

(1) An accurate and complete record of each geophysical survey conducted under the permittee's permit, including digital navigational data, if obtained, and final location maps of all survey stations; and,

(2) All seismic data developed under the permit, presented in a format prescribed or approved by the Regional Director and of a quality suitable for processing.

(c) Processed geophysical information shall be submitted with extraneous signals and interference removed as much as possible, and presented in a format and of a quality suitable for interpretive evaluation, reflecting state-of-the-art processing techniques.

(d) Processed, analyzed and interpreted data or information required to be submitted by the Act and this section shall include, but not be limited to, seismic record sections, and interpretations thereof; geologic maps, cross sections, and interpretations thereof; maps of gravitational and magnetic fields and interpretations thereof; and chemical or other analyses of rock samples collected on the refuge and interpretations thereof.
