

Fishery Conservation and Management

§ 660.411

U.S.-Canada Pacific Salmon Commission, ocean escapement goals, conservation of the salmon resource, any adjudicated Indian fishing rights, and the ocean allocation scheme in the fishery management plan. All inseason adjustments will be based on consideration of the following factors:

- (i) Predicted sizes of salmon runs.
- (ii) Harvest quotas and hooking mortality limits for the area and total allowable impact limitations, if applicable.
- (iii) Amount of commercial, recreational, and treaty Indian catch for each species in the area to date.
- (iv) Amount of commercial, recreational, and treaty Indian fishing effort in the area to date.
- (v) Estimated average daily catch per fisherman.
- (vi) Predicted fishing effort for the area to the end of the scheduled season.
- (vii) Other factors, as appropriate.

§ 660.410 Conservation objectives.

(a) The conservation objectives are summarized in Table 3-1 of the Pacific Coast Salmon Plan.

(b) *Modification of escapement goals.* NMFS is authorized, through an action issued under § 660.411, to modify an escapement goal if—

(1) A comprehensive technical review of the best scientific information available provides conclusive evidence that, in the view of the Council, the Scientific and Statistical Committee, and the Salmon Technical Team, justifies modification of a conservation objective; except that the 35,000 natural spawner floor for Klamath River fall chinook may be changed only by amendment.

(2) For Oregon coastal chinook, specific goals are developed within the overall goal for north coast and south coast stocks; or

(3) Action by a Federal court indicates that modification of an escapement goal is appropriate.

(c) The annual management measures will be consistent with NMFS jeopardy standards or NMFS recovery plans for species listed under the Endangered Species Act.

[61 FR 34572, July 2, 1996, as amended at 62 FR 35451, July 1, 1997; 66 FR 29241, May 30, 2001]

§ 660.411 Notification and publication procedures.

(a) *Notification and effective dates.* (1) Annual and certain other actions taken under §§ 660.408 and 660.410 will be implemented by an action published in the FEDERAL REGISTER, and will be effective upon filing, unless a later time is specified in the action.

(2) Inseason actions taken under § 660.409 will be by actual notice available from telephone hotlines and USCG broadcasts, as specified annually. Inseason actions will also be published in the FEDERAL REGISTER as soon as practicable. Inseason actions will be effective from the time specified in the actual notice of the action (telephone hotlines and USCG broadcasts), or at the time the inseason action published in the FEDERAL REGISTER is effective, whichever comes first.

(3) Any action issued under this section will remain in effect until the expiration date stated in the action or until rescinded, modified, or superseded. However, no inseason action has any effect beyond the end of the calendar year in which it is issued.

(b) *Public comment.* If time allows, NMFS will invite public comment prior to the effective date of any action published in the FEDERAL REGISTER. If NMFS determines, for good cause, that an action must be filed without affording a prior opportunity for public comment, public comments on the action will be received by NMFS for a period of 15 days after filing of the action with the Office of the Federal Register.

(c) *Availability of data.* The Regional Administrator will compile in aggregate form all data and other information relevant to the action being taken and will make them available for public review during normal office hours at the Northwest Region, NMFS. For actions affecting fisheries occurring primarily or exclusively in the fishery management area seaward of California, information relevant to the action also will be made available for public review during normal office hours at the Southwest Region, NMFS.
